Objective

To work in a lively professional environment where I can establish of delivery by complying with all deliverable schedules and find my place for success of the organization along with my personal growth by meeting the precise quality standards and deadlines.

Experience Summary

- ❖ Having experience of 18 years in the software industry in the area of software testing.
- ❖Experience in Performance Testing with JMeter, Flood.io and Appedo Tool.
- ❖Experience in Web/ Mobile automation (Android, IOS)
- ❖Experience in API testing Manual and Automation
- ❖Hands on experience on Core Java, Rest assured Jars for API Automation
- ❖Good Experience of Manual and Automation Testing of web applications.
- ❖With TestNG and Page Object Model Framework with TestNG.
- ❖Involved in Framework Design and enhancement.
- ❖Good knowledge of Automation Life Cycle.
- ❖Actively involved in Preparing and Executing Test Cases. Have given complicated test scenarios to improve the quality of the product.
- ❖Knowledge in Problem solving and Tracking Bugs using Bug tracking Tools like Bugzilla, JIRA, Mantis and Bit bucket.
- ❖Good Experience on build tool like ANT, Maven and continuous integration Jenkins
- ❖Knowledge on version control tool SVN.
- ❖Prepared Traceability Matrix to ensure the test case coverage for all requirements.
- ❖Having work experience with Agile (Scrum) methodology.
- ❖Experience in preparing Test plan & Test Strategy documents.
- ❖Hands on Experience of Preparing Test Reports.
- ❖Very Good in XML and Database Testing.
- ❖Experience in setting up the QA Team from the scratch as per company needs.
- ❖Able to handle multiple Projects within the timelines.
- ❖Able to work individually or Handling a Team.
- ❖Experience in testing Native and Hybrid apps.

Professional Experience

1. Working with Qualitrix Technologies as a Manager-Automation Architect from April 2022 to till date
2. Working with VDart Digital as a QA Engineer from April 2019 to 31-03-2022
3. Worked with TechArtus Solutions as a QA Lead from Jan 2015 to Dec 2018.
4. Worked as a QA Lead for Prospectz Online from August 2011 to Dec 2014.
5. Managing partner for GSS Infratech from Jan 2009 to July 2011.
6. Worked as Technical Associate for Tech Mahindra from October 2006 to December 2008.
7. Worked for V2 Solutions from February 2006 to September 2006.
8. Worked for Cyberteck solutions as a Test Engineer from June 2003 to Jan 2006

Educational Qualification

- Bachelor of Electronics & Instrumentation Engineering B. Tech 2003 from J.N.T.U. Hyderabad.
- 2 years HDSE from Aptech Computers Limited.

Technical Skills

Operating Systems	Windows 7, 8, 10,11 and Ubutu
Languages	Java, Asp.net, PL/SQL, Rest assured,
Scripting Languages	Java Script, Groovy
RDBMS	Oracle11g, MS SQL
Testing Tools	HP Quality Center, Selenium, JMeter, Load impact, Appedo Tool, Appium, Perfecto, Flood, AccelQ
Tools	Edit plus, Front page, Toad, SQL Navigator, FileZilla
Technologies	Html, DHtml, Cascading style sheets
Bug Tracking Tools	Mantis, Bugzilla, MQC, JIRA
Version Control Tools	VSS, RapidSVN 0.9.1(Subversion), Star Team, git Lab

PROJECTS :

Completed 4 Projects in Qualitrix successfully.

Client : https://www.sharekhan.com/ (Qualitrix)
Project 13 : Sharekhan (From March 2023 to Till Date)

Ask any market veteran and you will know that consistently making money from the markets is not easy at all. It requires a serious approach that involves serious research, serious risk analysis and serious discipline. Our full-service model, which consists of an expert Research team, experienced Relationship Managers, wide network of branches, information packed trading & investing platforms and education is designed to help you understand the required serious approach. It also helps you get the power of our experience and expertise on your sid

Roles & Responsibilities:

- ✓Done Performance Testing before the releases and major changes like Active-Active, User Store Changes, Refresh token retries, DS Upgrade 7.1, Nginx config for reverse proxy changes.
- ✓Involved in understanding the requirements with the Business Team.
- ✓Involved in designing and reviewing of test cases for Performance Testing
- ✓Regression testing was performed after Each New build of the application.
- ✓Reporting bugs through JIRA.
- ✓Prepared Scripts in Groovy in JSR 223 Preprocessor for JMeter
- ✓Prepared Testing related docs in Confluence.
- ✓Implemented Strategy to test Mobile Testing
- ✓Created a list of milestones and checkpoints and set measurable criteria to check the quality on timely basis.

- ✓Defining processes for test plan in Confluence and several phases of testing cycle like Joint integration Testing
- ✓Setting up goals and objectives for the team.
- ✓Defining the SLA's for the Endpoints
- ✓Finding the bottlenecks of the Application

Environment: Android App, iOS App and Web Application Built on Java, AWS

Client : https://www.phablecare.com/ (Qualitrix)
Project 12 : Phablecare (From Sep 2022 to Till Date)

We're on a mission to build healthcare solutions that put the patient first.
Our product is designed to empower users with quality insights and deliver care for their unique needs. Accessibility is a core part of our feature design and ideation, and we work together with a common, dedicated, and meticulous focus on optimizing every flow for the elderly. At Phable, we envision a complete chronic disease care ecosystem, driven by a highly intelligent network of care providers, technology partners and patients.

Roles & Responsibilities:

- ✓Done Performance Testing before the releases and major changes like Active-Active, User Store Changes, Refresh token retries, DS Upgrade 7.1, Nginx config for reverse proxy changes.
- ✓Involved in understanding the requirements with the Business Team.
- ✓Involved in designing and reviewing of test cases for Performance Testing
- ✓Regression testing was performed after Each New build of the application.
- ✓Reporting bugs through JIRA.
- ✓Prepared Scripts in Groovy in JSR 223 Preprocessor for JMeter
- ✓Prepared Testing related docs in Confluence.
- ✓Implemented Strategy to test Mobile Testing
- ✓Created a list of milestones and checkpoints and set measurable criteria to check the quality on timely basis.
- ✓Defining processes for test plan in Confluence and several phases of testing cycle like Joint integration Testing
- ✓Setting up goals and objectives for the team.
- ✓Defining the SLA's for the Endpoints
- ✓Finding the bottlenecks of the Application

Environment: Android App, iOS App and Web Application Built on Java, AWS

Client : https://www.ef.com/ (Qualitrix)
Project 11 : Education First (From July 2022 to December 2022)

Our experiential learning programs—focused on language, travel, cultural exchange, and academics—help turn dreams into opportunities for people of all ages and nationalities.Earn a degree, certificate, or credential.We offer degree programs at secondary, university, and post-graduate levels. Students who attend our schools go on to study.at the world's best universities. We are also associated with Hult

International Business School, renowned for its top-ranked graduate and undergraduate programs.An EF language course can help you talk to the world, in English and other widely spoken languages. We have fully accredited schools in 50 of the world's most exciting cities, as well as EF English Live – the world's largest online English school.

Roles & Responsibilities:

- ✓Given Solutions for the Selenium code which was written early and make them work.
- ✓ Migrated around 300 scenarios from Selenium to AccelQ tool.
- ✓Involved in Meetings and Scrum calls to get the updates and implemented the same.
- ✓Handled the team.
- ✓Created a list of milestones and checkpoints and set measurable criteria to check the quality on timely basis.
- ✓Setting up goals and objectives for the team.
- ✓Being the focal point of contact for the QA team for all the escalations related to testing and Quality assurance.

Environment: Sales force Application

Client : https://www.eshipper.com/ (Qualitrix)
Project 10 : eshipper (From April 2022 to October 2022)

We're a one-stop shop for shipping born in Canada.
goal is to help business owners and online sellers like you grow, locally and globally.
We offer a single place where all your shipping and fulfillment needs are met.
Our longtime partnerships with carriers give you the competitive edge:
exclusive shipping rates and faster delivery times. That's how we help grow "customer love" for your business**.**

Roles & Responsibilities:

- ✓Done Performance Testing before the releases and major changes like Active-Active, User Store Changes, Refresh token retries
- ✓Involved in understanding the requirements with the Business Team.
- ✓Involved in designing and reviewing of test cases for Performance Testing
- ✓Reporting bugs through JIRA.
- ✓Prepared Scripts in Groovy in JSR 223 Preprocessor for JMeter
- ✓Prepared Testing related docs in Confluence.
- ✓Created a list of milestones and checkpoints and set measurable criteria to check the quality on timely basis.
- ✓Setting up goals and objectives for the team.
- ✓Being the focal point of contact for the QA team for all the escalations related to testing and Quality assurance.

Environment: Java, Oracle Database, API

Client : Toyota Motors North America
Project 9 : ForgeRock – IDP (From April 2019 to 31-March-2023)

Architecture for CT ForgeRock IDP: Since CT services will require a standard based, more modern identity provider, decision was made to move away from Azure AD solution to ForgeRock products. The new IDP is designed, how the deployment looks and how it interacts with other components across TMNA ecosystem. Migration: All current customer identities are hosted within Azure AD. There are multiple TMNA services that integrate with Azure AD using Microsoft provided frameworks. In addition to this, there are various peripheral services that augment the capabilities of Azure AD (DCS & OCPR) as well as multiple custom policies created for various purposes. The migration strategy will be around having ForgeRock serve a single product and slowly onboard other applications and services to the new ecosystem. That product will be OneApp**.**

Roles & Responsibilities:

- ✓Done Performance Testing before the releases and major changes like Active-Active, User Store Changes, Refresh token retries, TMNA Redesign, DS Upgrade 7.1, Nginx config for reverse proxy changes.
- ✓Involved in understanding the requirements with the Business Team.
- ✓Involved in designing and reviewing of test cases for manual & Automation testing & Performance Testing
- ✓Regression testing was performed after Each New build of the application.
- ✓Reporting bugs through JIRA.
- ✓Prepared Scripts in Groovy in JSR 223 Preprocessor for JMeter
- ✓Prepared Testing related docs in Confluence
- ✓Implemented Strategy to test Mobile Testing
- ✓Created a list of milestones and checkpoints and set measurable criteria to check the quality on timely basis.
- ✓Defining processes for test plan in Confluence and several phases of testing cycle like Joint integration Testing
- ✓Setting up goals and objectives for the team.
- ✓Being the focal point of contact for the QA team for all the escalations related to testing and Quality assurance

Environment: Kubernetes-For devops, orchestration, JDK-Java code compilation, Apache Tomcat-Web service hosting, Nginx-As a front for web services, Docker-For containerization of services, Auth0 - Jwt libraries-JWT Validation, Spring Security Crypto-PIN Hashing, Maven-JWT Validation, FR - AM-Authentication Services, FR - IDM-Management and synchronization of identities for users, FR - DS-Storing the user details, configstore, and cts store, HELM-For deploying containers.
Tools: JMeter, Flood.io, Rest assured Jars, IntelliJ

Employer : TechArtus Solutions

Client : TATA Digital Health Plus
Project 8 : https://www.tatahealth.com/index.html (From June 2015 to Dec 2018)

Tata Digital Health leverages the power of digital technology to empower healthcare providers and consumers in India. Our services will facilitate seamless integration of data from multiple stakeholders to aggregate health data on a single platform. Our vision is to be the most innovative and trusted platform for health and wellness and for connecting providers with their patients.

TATA Health consists of group of Products Electronic Medical Records, Practice Management, Remote Monitoring, Lab on Rent and Virtual Care+.

Roles & Responsibilities:

- ✓Involved in understanding the requirements with the Business Team.
- ✓Involved in designing and reviewing of test cases for manual & Automation testing
- ✓Performed GUI, Functionality, System, Compatibility and Regression testing.
- ✓Regression testing was performed after Each New build of the application.
- ✓Reporting bugs through JIRA.
- ✓Prepared Scripts and Framework for Selenium.
- ✓Prepared Test Plan and Test Strategy Docs
- ✓Involved preparing Automation Framework.
- ✓Implemented Strategy to test Mobile Testing
- ✓Created a list of milestones and checkpoints and set measurable criteria to check the quality on timely basis.
- ✓Defining processes for test plan and several phases of testing cycle.
- ✓Setting up goals and objectives for the teams. Motivating teams and taking informative quick decisions.
- ✓Being the focal point of contact for the QA team for all the escalations related to testing and Quality assurance for multiple projects.
- ✓Responsible for delivering the Bug Free Products for the customers.

Environment: Java, SQL, PHP (Laravel Framework), Angular JS, Java Script, Android Studio. **Tools:** JMeter, Selenium and Appium.

******* Currently handling projects like Dealglobber, TATA MP Dash Board, Rosetta Labs, WAMSS and The Time Machine etc. apart from TATA Project.

Client : KPN online I Business pvt Ltd
Project 7 : www.ibuyfresh.com (From August 2014 to May 2015.)

Kovai Pazhamudir group, since its establishment in 1965 has emerged to become the leading retailers of fruits and vegetables in South India. Kovai Pazhamudir group now has branches spread over Tamilnadu and Pondicherry. Serving on an average, 30000 in-house customers per day, Kovai Pazhamudir serves a wide variety of fruits and vegetables from both national as well as international market. We operate in the name of Pazhamudir Nilayam and Kovai Pazhamudir Nilayam. Welcome to ibuyfresh.com, Chennai's favorite online grocery store. There is no need to rush to the supermarkets and stand in long queues anymore; we are bringing the grocery shopping experience to your own house. Start browsing through our wide range of products and brands, add them to the cart and pay when it is delivered to your doorstep at the time of your convenience. Shopping has never been more fun and easier! Starting from fruits and vegetables, groceries to dairy products and personal care products, we have every household necessity under the sun. At ibuyfresh.com, we strive to get you high quality products at the best available prices. Order online grocery in Chennai only from ibuyfresh.com, your one-stop online store for all the household needs.

Roles & Responsibilities:

- ✓Identified the Test Requirements based on Business Requirements of the application.
- ✓Involved in designing and reviewing of test cases for manual testing
- ✓Test case Execution.
- ✓Performed GUI, Functionality, System, Compatibility and Regression testing.
- ✓Regression testing was performed after Each New build of the application.
- ✓Reporting bugs through Mantis.
- ✓Prepared Scripts and Framework for Selenium.
- ✓Prepared Test Plan and Test Strategy Docs
- ✓Involved preparing Automation Framework.
- ✓Jmeter, Selenium, Appedo and Load Impact tools implemented.
- ✓Responsible for Website, Mobile Site and Apps like Android and IOS.
- ✓Implemented Strategy to test Mobile Testing

Environment: PHP, SQL, Java Script **Tools:** Appedo, Jmeter, Selenium, Load Impact and Test Flight

Employer : Prospectz Online PVT Limited

Project 6 : Trakstar. (From June 2013 to July 2014.)
Client : Infostretch (www.infostretch.com)

Trakstar is Test management tool and Web Based Miniature Version of Mercury Quality Center. Modules in TrakStar

- ➢Administration**:** To manage users, projects and user defined fields
- ➢Test Case - A set of test data and test programs -Organize the Test Cases within folders with N-Level of nesting
- ➢Test Suite – A Test Suite is a collection of Test Cases -Organize the Test Suites within folders with N-Level of nesting
- ➢Test Suite Run --Test Cases in Test Suites can be executed in this module
- ➢Test Reports – Generate reports based on the Test Suite Run instances.
- ➢Import**-**We Can Import .CSV files to the Project
- ➢Customize**-**We can customize user defined lists & System Defined Lists

Roles & Responsibilities:

- ✓Identified the Test Requirements based on Business Requirements of the application.
- ✓Involved in designing and Reviewing of test cases for manual testing
- ✓Test case Execution.
- ✓Performed GUI, Functionality, System, Compatability and Regression testing.
- ✓Regression testing was performed after Each New build of the application.
- ✓Reporting bugs through Mantis.
- ✓Prepared Scripts and Framework for QTP.Recording the Objects in Object.
- ✓Exported Test Cases, Requirements and Defects in HP QC.
- ✓Prepared Test Plan.
- ✓Involved preparing Automation Framework.

Environment: PHP, SQL, Java Script. **Tools:** QTP, HP Quality Center.

Project 5 : Call Center Management.
Client : Mind Pearl US (From Aug 2011 to Apr 2013)**.**

This project provides complete listings of articles, books, benchmarking, studies, Vendors, contact center software training, Call Centre solution, technologies, and Best practices for managers and consultants. There are many ways to define a call center. Customers usually see the call center as a solution provider whereas businesses commonly defines the call center in terms of its function. The following are some call center functions.

- ✓Receive problem reports
- ✓Records and tracks those problems
- ✓Providing solution to the problem
- ✓Recognize and acts on situations to prevent problems
- ✓Report's problem trends to management for improved return on investment for the company
- ✓Maintain customer satisfaction and Gather market data for the business.

Roles & Responsibilities:

✓Involved in designing and reviewing of test cases for manual testing.
✓Participated preparing Test plan and Test Strategy
✓Performed Unit Testing, Systems Testing and Integration Testing
✓Regression testing was performed after Each New build of the application.
✓Looking Admin Activities for Mercury Quality Center 9.0 and Exported Testcases, Requirements and Defects in MQC.
✓Worked in Deployment Activities using Star Team (Version Control Tool).

Environment: JAVA, ORACLE 10g, Third Party Tools and. Net2008
Tools: SQL Navigator, TOAD & File Zilla for FTP.

Employer : Tech Mahindra

Project 4 : Network Engineering Journey (NEJ)
Client : British Telecom (www.BT.COM) (From Jan 2008 To Dec 2008).

NEJ -The overall aim of the Network Engineering Journey (NEJ) is to put into place a World class inventory management system and transform the end-to-end Planning and recording process so that the speed of provisioning and repair can be significantly improved.
NIMS - Network Instruction Management System is used to track and control the Installation and upgrade of existing BT core and access networks. It is logically Separated system for OR and RoBT. Jobs created on NIMS are passed through Planning and authorization phases and progressed till closure (work completion). It interfaces with systems such as FIST, COSMOSS, ASC and B2B. User Community includes Planners form Wideband, Newsites, Netsolve etc.

Roles & Responsibilities:

✓Involved in designing and reviewing of test cases for manual testing.

✓Review receivables. Identify and collate customer requirements.
✓Prepare project deliverables. Conduct team meetings.
✓Contribute to project review meetings and audits.
✓Day to day tracking of project. Prepare Estimation. CAT support on need basis.
✓Technical point of contact for designated area. Lead the designated test teams.
✓Define Directory Structure needed for CM.Define Access Restrictions.
✓CI Register Generation. Maintain software baseline repository only for NAS Server project folder Project PC.

Environment: JAVA, ORACLE 8i, XML,
Tools: SQL Navigator, HP Quality Center, QTP, StarTeam.

Project 3 : Network Capacity Analysis and Design (NCAD)
Client : British Telecom (www.BT.COM) (From Oct 2006 To Dec 2007).

The main focus of NCAD is to address Capacity Planning ('Design & Dimensioning') for the 21C Network and associated services. The Goal statement of NCAD for 21C is to:" Provide support for the design and dimensioning of the 21C Network and associated services to achieve world class unit costs and utilization, in reduced planning cycles." NCAD is a COTS product implementation by VPI systems for Network capacity planning and management. Telecordia provides the necessary consultancy to VPI systems in terms of design of the application and they interact with BT solution design group in coming up with the design of the systems. The objective of this project is to provide the necessary input information/data to NCAD system from different logical inventory systems, like PACS, BERT, DMT etc., in terms of providing a single common interface.

Roles & Responsibilities:

✓Involved in designing and reviewing of test cases for manual testing.
✓Performed Unit Testing, system Testing and Integration Testing
✓Regression testing was performed after Each New build of the application.
✓Prepared Scripts and Framework for QTP.Recording the Objects in Object Repository, Using .NET Extensability.Creating Custom Server in C# Using Visual Studio .Net 2005.
✓Looking Admin Activities for Mercury Quality Center 9.0 and Exported Testcases, Requirements and Defects in MQC.

Environment: JAVA, ORACLE 9i, XML, JAVA, Third Party Tools and. Net2005
Tools: SQL Navigator, TOAD & File Zilla for FTP.UNIX.

Employer : V2 Solutions

Project 2 : Resume Tracking System. (From Feb 2006 to September 2006.)
Client : V2 Solutions (www.v2solutions.com)

Resume tracking system, these deals with User (candidate), HR, Interviewer, When candidate sends a resume how the resume triggers among the User, HR and Interviewer. Modules in Resume Tracking System.

- User (Resume Upload): - End user can fill the Details on the Add Resume page with word as Attachment
- HR**: -** HR Can Save the New Resume Details and HR Assign the interview to interviewer
- Interviewer**: -**Interviewer can take the interview and send back interview feed back to the HR team
- Reports**: -**Management can see the Resumes, HR wise, Technology wise and as well as interviewer.

Roles & Responsibilities:

- ✓Involved in designing and writing of test cases for manual testing.
- ✓Participated preparing Test plan
- ✓Performed GUI and Functionality testing
- ✓Regression testing was performed after Each New build of the application.
- ✓Exported Test cases to Mercury Quality Center.

Employer : Cyberteck Solutions

Project 1 : Common Billing System. (From June 2003 to Jan 2006).

Client : Southern Power Distribution Company Ltd**.**

Common Billing Software a complete billing solution for Southern Power Distribution Company Ltd Spanning 6 districts with over 40 Lakhs consumers. This software is a client server system with server at ERO offices and Clients at the Accounting Agencies. Main Modules in the system perform following functions: Records Reading, Calculates bills of consumers according to the latest tariff order, Prints bill. Communicates with SBM through Command Transfer feature and the Graphical Capabilities provides easy way to assess the complete history of any consumer in the Entire Installation area. Security provided through password protection.

Responsibilities

- ✓Coding Reports, data generation for web in VB 6 for Common Billing System for accounting agencies billing.
- ✓Black box and white box testing of Common Billing System.
- ✓Writing down Test cases for each functionality and executing them.
- ✓Help design and development using Html help.
- ✓Installation and maintenance of Software at 5 ERO and 7 Accounting Agencies

Environment

Visual Basic, Oracle, MS Excel 2000
