DEBAPRIYA KANJILAL

Software Quality Assurance Leader | Salesforce and Pega Testing | Agile Delivery Specialist | Testing Manager | Automation

Phone: +91-8583867321 **Email: debapriya.kanjilal117@gmail.com**

PROFILE SUMMARY

- Seasoned Software Quality Assurance Leader with 14+ years of progressive experience in delivering high-impact QA solutions across Telecom, BFSI, Retail, and Life Sciences domains; known for leading large-scale QA teams (45+ members) and driving end-to-end testing transformations.
- Proven expertise in driving Agile Scrum practices, including sprint planning, daily stand-ups, backlog grooming, retrospectives, and defect triage—ensuring iterative delivery, enhanced team collaboration, and continuous quality improvement across multi-sprint projects.
- Spearheaded test strategies and execution for complex, multi-release application ecosystems, with hands-on exposure to Salesforce, Pega, Java and cloud-based solutions—delivering consistent quality across manual and automation testing lifecycles.
- End-to-end ownership of software testing lifecycle (STLC) and release management, including crafting detailed Master Test Plans, test cases in AccelQ, traceability matrices, risk-based testing, and closure reports across Agile and hybrid environments.
- Demonstrated leadership in cross-functional stakeholder engagement, defect triage coordination, and managing test delivery across geographically distributed teams—bridging business expectations with technical execution seamlessly.
- Led QA automation frameworks from the ground up using Selenium with Python, enhancing regression test efficiency across projects like DOTS & Polaris, and introduced macro-based tools and PDF comparators, resulting in tangible productivity gains.
- Award-winning contributor, recognized as the “Pillar of the Month” and appreciated by client executives for stupendous performance on mission-critical insurance applications and audit-intensive projects like RBC’s GL Attestation.
- Exceptional command over quality governance and continuous improvement initiatives, frequently driving testing centers of excellence, conducting knowledge-sharing sessions for 70+ participants, and mentoring junior QA professionals across functions.
- Adept at requirements analysis, estimation, and QA deliverables for RFPs/RFQs, with proven success in pre-sales support, resource planning, and cost optimization strategies for Fortune 500 clients.
- Hands-on experience across test management and defect tracking tools including HP ALM, JIRA, HP Octane, AccelQ, and strong skills in API Testing (Postman), Database Testing (SOQL, SQL Server), and Salesforce Configuration.
- Combines deep technical proficiency with strategic vision—capable of owning complete QA delivery, while actively contributing to business analysis, process optimization, and client satisfaction across all projects.

COMPETENCIES

- Test Strategy & Planning
- Automation Testing (Selenium, UFT, AccelQ)
- Software Testing Lifecycle (STLC)
- Manual Testing & Execution
- Quality Assurance & Quality Control (QA/QC)
- Defect Management & Triage
- Agile/Scrum Methodology
- API Testing (Postman)
- Salesforce Testing & Configuration
- Requirement Analysis & Traceability
- RFP/RFQ & Pre-sales Support

- Test Data Management
- Database Testing (SQL, SOQL)
- Client & Stakeholder Management
- Team Leadership & Mentorship
- SDLC (Software Development Lifecycle)
- Release & Configuration Management

EDUCATION & CERTIFICATIONS

- 2010 – B.Tech. in Food Technology, Techno India College of Engineering & Technology, Kolkata
- ISTQB Certified Tester – Foundation Level (CTFL)
- Salesforce Certified Administrator (SCA)
- Salesforce Platform App Builder (SU21)
- Salesforce CPQ/CLM Certified

WORK EXPERIENCE

- Tata Consultancy Services (TCS) – Assistant Consultant | Feb 2022 – Aug 2025
- Pursuit Software – Test Lead | Nov 2021 – Feb 2022
- Cognizant Technology Solutions – Software Quality Assurance Lead | Nov 2010 – Sept 2021

Key Result Areas:

- Synthesized and maintained monthly SLA trackers for 20+ concurrent projects, ensuring alignment with contractual obligations.
- Authored and disseminated comprehensive daily and weekly project status reports to clients and stakeholders, fostering transparency and informed decision-making.
- Facilitated and led defect triage calls and actively engaged in daily Scrum stand-ups to address blockers and streamline resolution paths.
- Contributed to RFP processes by formulating resource allocation plans and estimating project costs for clients across diverse geographies.
- Collaborated in weekly resource loading discussions, enabling optimal staffing and efficient resource utilization.
- Engineered multiple PDF comparator tools to automate validation, reduce manual effort, and enhance testing efficiency.
- Delivered and moderated knowledge-sharing sessions on niche testing topics—including Kubernetes—with active participation from 70+ attendees.
- Evaluated and documented the complete QA lifecycle: requirement gathering, estimations, test planning, strategy creation, scripting, execution, defect tracking, reporting, metric analysis, and global team coordination.
- Executed the full system testing lifecycle, including the design, development, and implementation of test plans, cases, and processes to drive timely defect resolution.
- Formulated test strategies and test plans for multiple projects, while reviewing requirements, designs, strategies, and test cases to ensure quality standards.
- Interfaced with cross-functional teams to monitor project progress and enforce adherence to quality benchmarks.
- Validated test execution on new hardware, software, and solutions, while coordinating cross-organizational test execution efforts.
- Advised QA delivery teams on estimations, proposal development, test approaches, and customized training requirements.
- Tracked and analyzed the entire quality and release lifecycle, identifying trends and optimization opportunities.
- Liaised with developers to troubleshoot issues, report defects, and facilitate swift remediation.
- Orchestrated Agile ceremonies, including Scrum planning, sprint reviews, retrospectives, backlog grooming, story estimation, and release planning.
- Implemented project plans within strict timelines while defining QA best practices for support and documentation.

- Architected test strategies, constructed test plans, and approved test cases in alignment with client and business expectations.
- Presented QA status and progress reports to senior leadership, enabling strategic oversight and delivery assurance.

Knowledge Purview:

- Expertise in Salesforce configuration, including workflows, automation, and object modeling.
- Skilled in functional, regression, system integration, and UAT testing of **Salesforce Sales Cloud** modules including Leads, Opportunities, Accounts, and Contacts.
- Developed macro-based tools to streamline manual testing and improve efficiency.
- Proficient in PEGA testing using Out-of-the-Box (OOTB) wizards.
- Skilled in resource management and team leadership as a test manager.
- Acted as Business Analyst across multiple projects, translating requirements into test strategies.
- Conducted API endpoint testing using Postman for service validation.
- Strong command of SOQL for data querying via Salesforce Workbench.
- Prepared Project Status Reports, Defect Reports, and Test Closure Reports.
- Experienced in building traceability matrices and managing the defect lifecycle.
- Proficient in client communication, providing updates, issue resolution, and support.
- Hands-on experience with SQL queries in SQL Server 2008 R2 for backend validation.

HIGHLIGHTS

- "Pillar of the Month" Award (2015) – Recognized for exceptional performance on Abbvie KAM Solutions and Abbvie WEC projects.
- Received multiple client appreciations, including from the Business Unit Director, for outstanding contributions to a critical insurance application.
- Earned several Business Unit recognitions for consistent high performance and delivery excellence.

Major Projects Delivered:

- Orion Migration
- DOTS and Polaris Automation
- Edge Colo CRT BDT
- GL Attestation Database Upgrade
- Medvantage Cloud Device Implementation
- Customer Web Portal Services
- Abbvie KAM Solutions and Abbvie WEC
- Client Financial Review (Phase 1 & 2)
- e-Apps Migration Testing

PERSONAL DETAILS

Address : CE/1/A/92, CE Block, Street Number 228, New Town Action Area 1, Kolkata - 700156
Languages : English, Hindi & Bengali
DOB : 11th December 1988

PROJECTS UNDERTAKEN

Project #1: Orion Migration – Comcast | Domain: Telecom | Technology: Java, Jira | Role: Offshore Test Manager

Overview: Led end-to-end testing across multiple applications (OCO, SQO, etc.) under the Orion program, managing bi-monthly parallel deployments.
Key Responsibilities:

- Lead a QA team of 45+ engineers, including experienced and freshers, across multiple functional testing projects in Telecom domain.
- Collaborated with business analysts, developers, and product owners to resolve requirement gaps.
- Managed **defect lifecycle in JIRA and HP Octane**, ensuring timely defect triage and closure.
- Implemented process improvements and mentored junior QA team members.
- Delivered test metrics, dashboards, and quality reports to stakeholders.
- Achieved **100% on-time delivery** of QA deliverables across 2 consecutive sprints.
- Independently handled client/internal escalations.

Project #2: DOTS & Polaris Automation – ACS | Domain: Publishing | Technology: Java, Jira, Selenium | Role: Offshore SIT & Module Test Lead

Overview: Automated regression testing for DOTS and Polaris, previously executed manually post each release.
Key Responsibilities:

- Developed DOTS UI automation framework from scratch using **Selenium with Python**.
- Created and managed test cases in Jira.
- Executed E2E and technical tests; led overall test coordination.
- Enhanced test quality and guided junior team members.

Project #3: Edge Colo CRT BDT– Frontier Communications | Domain: Telecom | Technology: CRT, AccelQ, HP QC |Role: Offshore SIT & Module Test Lead

Overview: Oversaw implementing Salesforce Sales Cloud to streamline the client's sales lifecycle, including Lead management, Lead conversion, Account & Contact management, and Opportunity tracking.
Key Responsibilities:

- Analyzed business requirements and functional documents for Sales Cloud customizations.
- Created test scenarios, test cases, and test data for Salesforce Sales Cloud modules.
- Performed functional and regression testing of Lead creation, Lead conversion, Opportunity management, Account and Contact management, and Campaign tracking.
- Validated workflow rules, validation rules, dependent picklists, and page layouts.
- Supported System Integration Testing (SIT) with third-party apps integrated with Salesforce.
- Assisted in User Acceptance Testing (UAT) by preparing execution reports and addressing user feedback.
- Logged and tracked defects in Jira and AccelQ, collaborated with developers to ensure timely closure.
- Participated in Agile ceremonies like sprint planning, daily stand-ups, and retrospectives.
- Led integration/system testing and defect management.
- Identified quality gaps and coached team on best practices.

Project #4: MedVantage Cloud Device Implementation – Johnson & Johnson | Domain: Life Sciences | Technology: Salesforce.com, JIRA| Role: QA Analyst

Overview: Worked on Salesforce-based MedVantage application tailored for life sciences organizations.
Key Responsibilities:

- Developed automated workflows, validation rules, and approval processes.
- Customized user interfaces, profiles, and permissions.
- Executed iPad/desktop testing and resolved SIT/UT configuration defects.

Project #5: GL Attestation DB Upgrade – Royal Bank of Canada | Domain: BFS | Technology: HP ALM, UFT | Role: Offshore SIT & Module Test Lead

Overview: Led testing for database migration of the Pega-based GL Attestation system used for audits.
Key Responsibilities:

- Worked across 15+ Agile sprints managing SIT efforts.
- Designed and executed functional, integration, and DB validation tests.

- Ran and fixed code in **UFT** for regression cycles.
- Used SQL for backend testing and supported UAT.
- Estimated test efforts and improved QA processes.

Project #6: CWS (Customer Web Portal Services) SFDC Implementation – Manulife Japan | Domain: Insurance | Technology: SFDC, QC | Role: Offshore QA Lead

Overview: Led QA for the Salesforce-based Client Web Portal designed for both new and existing customers.
Key Responsibilities:

- Managed end-to-end QA activities across two project phases.
- Acted as Business Analyst to confirm test coverage with dev team.
- Conducted cross-browser and mobile testing (iPad, Android).
- Tracked and reported defects; represented QA in client calls.

Project #7: AbbVie KAM Solutions & WEC – AbbVie | Domain: Life Sciences | Technology: Veeva CRM, BlackBird, QC ALM | Role: QA Analyst

Overview: Tested Veeva CRM-based Key Account Management solution designed for account-specific planning.
Key Responsibilities:

- Independently managed test design and execution.
- Developed RTMs and executed tests on desktop and iPad.
- Logged and tracked defects; created daily defect reports.

Project #8: Client Financial Review (Phases 1 & 2) – Wells Fargo | Domain: BFS | Technology: QC ALM | Role: QA Team Lead

Overview: Tested a web service-based application aggregating client financial data for holistic reporting.
Key Responsibilities:

- Designed test scenarios from functional requirements.
- Managed test data and coverage; handled test planning and estimation.
- Led defect triage meetings; provided training to new QA team members.

Project #9: e-Apps Migration – OCBC | Domain: BFSI | Technology: QC | Role: QA Analyst

Overview: Tested OCBC's web-based e-Apps (eView, eTeller, eSecurity) integrated with core banking and ATM systems.
Key Responsibilities:

- Created and executed test cases; validated customer and account data workflows.
- Logged and tracked defects; developed daily/weekly test reports.
- Ensured test coverage and coordination across modules.
