Naveena Balasani

SR. QUALITY LEAD CONSULTANT

Mobile No: +91 9966657686 **E-mail:** Naveena.balasani14@gmail.com **Address:** Bandlaguda jagir, Hyderabad

To secure a leadership position in Software Quality Assurance where I can leverage my 14+ years of testing experience across diverse domains to drive high-quality software delivery, mentor teams, and contribute to organizational growth through strong test strategies, process improvements, and quality excellence.

PROFESSIONAL SUMMARY

- 13+ years of comprehensive experience in Software Testing & Quality Assurance across banking and finance , healthcare, insurance, media and entertainment, and telecom domains.
- Proficient in Manual, Functional, Regression, Smoke, Sanity, performance, API, Selenium and Salesforce testing with solid expertise in mobile and web application testing.
- Strong background in test planning, design, execution, defect management, and reporting using JIRA, HP ALM, Rally, and ICM.
- Hands-on in Automation Testing with Selenium frameworks and API testing using Postman.
- Skilled in cross-browser and cross-platform testing including iOS, Android, Apple TV, Roku, and Chromecast.
- Skilled helm chart deployments on kubernetes cluster using Linux,kubectl cli via gitbash on cluster
- Expertise in data configuration and integrations using Nifi, JMeter , grafana and promtheus
- Proficient in backend validation using SQL, Teradata, DB2,Azure cosmos, ADF, azure bus services Cassandra.
- Adept in Agile & Waterfall methodologies, well-versed with SDLC/STLC processes.
- Certified ISTQB Tester with proven ability to lead QA teams, streamline processes, and ensure high-quality deliveries.
- Experienced QA Engineer with a strong focus on payment verification, including Amex Epay system testing, transaction flow validation, and compliance with security standards like PCI-DSS.
- Proficient in testing mobile and streaming platforms including iOS, Android, tvOS and ROKU, with expertise in build generation (.ipa/.apk), crash log analysis, cross-version/device validation, and tools such as Xcode and charles.

SKILLS

Technical Skills: Scripting & Languages, Linux, Charles proxy, SQL, Xcode, Bash scripting, Nifi, Postman, SAP UI, Splunk, JMeter, Azure cosmos DB, unix, java, kubecli, grafana, git, bitbucket, workbench, JMeter

Soft Skills: Communication, Problem-solving, Adaptability, Leadership

Core Competencies: Client & Team Collaboration, CI/CD Pipeline Implementation & Automation, Kubernetes & Docker Containerization, Helm Chart Deployments & Configurations, Cloud Computing (AWS – Certified DevOps Professional), Log Analysis & Troubleshooting (Pod Logs, Kafka Logs)

WORK EXPERIENCE

Tata Consultancy Services, Hyderabad

Associate Lead Consultant – Quality Assurance (Hyderabad) (Apr 2022 - Present)

Domain: Healthcare, Telecom

Key Clients/Projects:

Myijer-Migration: Legacy System to Modernization Using Azure Services

Align 360 (Healthcare): Conducted manual testing, iPad testing, and Salesforce validation for dental care applications.

Ericsson-CENX (Telecom): Performed test planning, cloud app integrations and deployments, end to end testing, backend validation, and cross-team collaboration for telecom service assurance platform.

Roles and Responsibilities:

Analyzed system specifications and developed test plans to validate application functionalities.

Executed manual, functional, integration, end-to-end, UAT, and pre-production testing across modules.

Performed Salesforce and iOS/iPad testing for healthcare client applications.

Designed and executed test cases to validate data integrity during migration from legacy systems to Azure Cosmos DB

Conducted defect tracking and resolution using JIRA, ensuring faster closure of issues.

Well versed in devops testing and system deployments using linux ,kubectl cli towards kubernetes clusters presents on gcp cloud

Prepared test summary reports and provided sign-off for release readiness.

Virtusa Consulting Services, Hyderabad

Lead Consultant – Quality Assurance (Hyderabad) (Apr 2020 - Apr 2022)

Domain: Health care and Health Insurance

Key Clients/Projects:

Ensurance (Insurance): Developed test strategies, executed manual testing, and validated application readiness for production release.

Roles and Responsibilities:

Led robust software testing projects, and aligned strategies with organizational objectives, resulting in high-quality software releases and optimum client satisfaction.

Designed, executed, and reviewed test cases to ensure compliance with business requirements.

Conducted integration, regression, and pre-production testing.

Supported teams by identifying requirement gaps and leading sign-off meetings.

Documented test results and prepared summary reports for management

Cognizant Technology Solutions, Hyderabad

Associate (Hyderabad) (Aug 2011 - Mar 2020)

Domain: Banking and Finance, Media and Entertainment, Health care

Supported testing initiatives as a collaborative team member, while contributing to software quality and client satisfactory project outcomes.

Key Clients/Projects:

NBC (Media and Entertainment): Tested iOS, Android, and streaming apps (Apple TV, Roku, Chromecast). Validated functionality using Charles Proxy, Xcode, and JIRA.

AMEX (Banking &Finance): Automated regression suites, performed data quality checks, epay-payments process checks and executed cross-browser Selenium testing.

Express Scripts (Healthcare/Insurance): Designed test cases for Workers Compensation, HIPAA compliance, and Billing systems. Validated mainframe and Teradata database processes.

Created test scenarios, executed test cases, and performed root cause analysis during multiple project life cycles.

Roles and Responsibilities:

Conducted mobile app testing across iOS, Android, Apple TV, and Chromecast devices.

Validated backend data using SQL queries and supported automation for regression testing.

Actively collaborated with cross-functional teams to improve test coverage and minimise defects.

CERTIFICATIONS

- AWS Certified Devops professional
- TCS Gen Al certifier
- ISTQB certified tester.
- Agile and Selenium

EDUCATION

Chaithanya Bharathi Institute of Technologies(CBIT), Hyderabad (2008 - 2011)
Masters of Computer Application

ACHIEVEMENTS

- Bagged on the Spot award and Pillar of the Month Awards

PROJECTS

Align 360, Health care

- Align 360, Healthcare: Analyzed client system specifications and business requirements to develop detailed test plans, ensuring comprehensive application functionality.
- Designed and executed test cases to perform manual testing across various application modules, ensuring alignment with quality standards.
- Conducted integration, end-to-end, pre-production, and sign-off testing to validate system integrity and readiness.
- Managed test data and facilitated efficient defect tracking using JIRA, improving issue resolution workflows.
- Performed specialized testing on iPad and Salesforce platforms, ensuring cross-platform compatibility and functionality.

CENX system, Ericsson

- CENX System, Ericsson: Analyzed client system specifications and business requirements, leading to the development of effective testing strategies.
- Spearheaded Helm chart deployments via CI/CD pipelines and manual execution with Linux, Kubectl, and Git Bash on Kubernetes clusters, optimizing deployment processes.
- Updated and configured SAP UI in JSON format, ensuring alignment with test requirements and enhancing system flexibility.
- Integrated adapters on the CENX system using the Nifi integration tool, facilitating seamless data flow and system interoperability.
- Resolved application deployment, integration, and operational issues by analyzing pod logs and Kafka logs, enhancing system reliability.
- Monitored and managed system stability, performance, security, and scalability utilizing Grafana and Prometheus tools, ensuring peak operational efficiency.
- Validated backend data using Cassandra DB, guaranteeing data integrity and accuracy.

Ensurance, Insurance domain

- Ensurance, Insurance Domain: Analyzed end-client system specifications and business requirements, translating needs into effective testing strategies.
- Developed comprehensive test plans targeted at ensuring full application functionality compliance.
- Designed test cases that confirmed requirements for executing testing and efficient identification of defects, reporting and root cause analysis.
- Provided pivotal support to team members by clarifying gaps, driving sign-off meetings which aided in a streamlined project lifecycle.
- Played a crucial role in integration, E2E, and pre-prod sign-off testing thus facilitating project progression from development to pre-production phases.

NBC Client:GlobalTITLEMANAGEMENT

- NBCClient: Global TITLE MANAGEMENT: Acquired a strong understanding of client requirements and project functionalities, contributing to effective test strategies.
- Conducted test design, test execution, and root cause analysis to ensure application reliability and performance.
- Managed test data and facilitated efficient defect tracking using JIRA, enhancing issue resolution workflows.
- Verified TITLE metadata utilizing POSTMAN, ensuring data accuracy and integrity.
- Performed execution tasks through SQL Server Studio, guaranteeing proper database operations and data management.

NBC Client: GMO CPC(iOS, Android) and CPCTVOS (apple tv, chromecast -streaming devices) apps
- NBC Client: GMO CPC(iOS, Android) and CPCTVOS (Apple TV, Chromecast - Streaming Devices) Apps: Understood and implemented client requirements, facilitating effective testing strategies.
- Conducted test design, test execution, and root cause analysis to ensure high-quality app functionality across mobile and streaming platforms.
- Utilized JIRA for maintaining test data and managing defect tracking, which enhanced collaborative problem-solving.
- Configured and optimized Charles proxy settings and debugged network traffic challenges, ensuring smooth operations and improved app performance.
- Tested and verified app functionality on various iOS devices including iPhones, iPads, and Apple TVs, thereby enhancing iOS compatibility.
- Utilized Xcode to install live versions, capture detailed device logs, and streamline debugging processes, enhancing issue identification and resolution.

Amex Client,AMEX IDN testing
- Amex Client, AMEX IDN Testing: Acquired thorough understanding of client needs and project goals for testing.
- Automated regression suites using Selenium to ensure consistent and efficient testing practices.
- Executed data quality checks on migrated data and validating feeds, enhancing accuracy.
- Performed test design, execution, root cause analysis, and defect tracking using Quality Center for structured testing.
- Validated feed processing and node setups for new feeds promoting enhanced data integration and system integrity.

Amex Client,AMEX Internationa; brochureware testing(Next gen)
- Amex Client, AMEX International Brochureware Testing (Next Gen): Achieved in-depth understsanding of client needs and specifications to implement testing.
- Executed regression testing for varied functionality involving diverse operational structures.
- Designed test via ICM template, conduct test and performed root cause analysis, leading to efficient bug detection.
- Tested multiple browsers using Selenium scripts and validate responsiveness across diverse Operating Systems promoting cross-platform excellence.
- Maintained test data, monitored test progress, and tracked results using Rally, thereby enhancing test management.
- Implemented Selenium automation, resulting in improved testing efficiency.

Express Scripts Inc, HIPPA,Compunds, Workers compensation
- Express Scripts Inc, HIPPA, Compounds, Workers Compensation: Drove quality assurance lifecycle via a comprehensive analysis leading to a detailed test plan.
- Employed automation tools to execute testing cycles of software that reduces costs associated with traditional testing methods and provided efficient test results.
- Customized test cases and designed testing scenarios focusing on the requirements of the end clients leading to high customer satisfaction rates.
- Logged and tracked software defects with HP ALM and QC facilitating the management of issues found during testing ensuring the implementation quality goals are met.
- Ensured clear and accurate test documentation resulting in detailed record keeping with well-organized plans and outcomes for easy management.

Express Scripts Inc, Billing & Remittance
- Express Scripts Inc, Billing & Remittance: Proactively analyzed requirements and design documents to determine appropriate business processes and prevent system errors.
- Developed structured test scenarios and test cases based on detailed business requirements to validate essential system functionalities.
- Used Teradata database to conduct testing, while efficiently extracting values by validating core business tasks.
- Tested with TSG and CRT tools and performed quality control by uploading TCs and reporting the malfunctions.
- Performed TCs by uploading into TCs into ALM and reported system problems.

Myijer-Migration
Project Scope:

Migrated data from a legacy system to a modernized system using Azure services such as Azure Data Factory (ADF), Azure Cosmos DB, and Azure Service Bus.
Ensured seamless data transformation, migration, and communication between systems through automated pipelines and messaging services.

Key Responsibilities:

- Designed and executed test cases to validate data integrity during migration from legacy systems to Azure Cosmos DB.
- Validated ETL pipelines in ADF to ensure accurate data extraction, transformation, and loading.
- Tested Azure Service Bus configurations to ensure reliable message routing between topics.
- Collaborated with developers and DevOps teams to ensure alignment with project goals and quality standards.
- Performed regression testing and end-to-end validation to ensure data consistency and system reliability.

Amex Epay System
Scope: Enhanced and modernized the Amex Epay system, focusing on improving transaction processing, security, and user experience.
Key Responsibilities:

- Designed, executed, and documented test cases to validate new features and enhancements in the Epay system.

- Performed functional testing, regression testing, and end-to-end testing to ensure system stability and correctness.
- Collaborated with developers and business analysts to understand requirements and ensure test coverage.
- Validated user flows, transaction processing, and error handling to ensure compliance with business and regulatory standards.
- Monitored and reported defects using defect tracking tools (e.g., Jira, HP ALM) and tracked them until resolution.
- Participated in UAT (User Acceptance Testing) and provided feedback to ensure alignment with business expectations.
