CHETAN MAHAKALKAR

DEVOPS ENGINEER

SUMMARY

With over 4 years of experience in Cloud, DevOps, CI/CD, and Infrastructure as Code, I have developed a strong focus on AWS Cloud, becoming proficient in Docker, Kubernetes (EKS & AKS), Terraform, and Jenkins. I have acquired skills in executing scalable solutions, streamlining CI/CD pipelines using GitLab, Jenkins, and AWS DevOps, and optimizing cloud infrastructure. I am also familiar with and have experience in using monitoring tools like Prometheus, Grafana. I have a proven ability to lead DevOps initiatives that enhance automation and integrate new technologies, driving efficiencies and innovation across both development and operations teams.

WORK EXPERIENCE

DevOps Engineer| Cybage Software Pvt. Ltd.

Project 1| ALM DevOps COE (2021 - 2022)

- Supported multiple projects by designing cloud architectures on AWS, ensuring scalability and best practices.
- Set up and optimized CI/CD pipelines using Jenkins and AWS DevOps, automating software delivery workflows.
- Developed Infrastructure as Code (IaC) solutions using Terraform for AWS, streamlining infrastructure deployments.
- Conducted POCs for AWS tools, evaluating performance, security, and cost efficiency.
- Integrated security best practices into DevOps workflows using AWS IAM, and DevSecOps principles.
- Led knowledge-sharing sessions on AWS DevOps, helping teams adopt cloud-native and containerized solutions.

DevOps Engineer| Cybage Software Pvt. Ltd.

Project 2 | Amadeus (2022 -Present)

- Set up and managed CI/CD pipelines in GitLab, automating build and deployment processes for smooth development workflows.
- Deployed GitLab runners on AWS EC2 spot instances to optimize build performance and reduce costs.
- Managed Kubernetes clusters on Amazon EKS for high availability and scalability.
- Created and maintained Helm charts for easy and consistent Kubernetes deployments.
- Deployed static websites on S3 using a CI/CD pipeline and set up CloudFront for better performance and security.
- Automated infrastructure provisioning using Terraform (AWS) for consistent, repeatable deployments.
- Used Terraform to automate infrastructure setup, making deployments faster and more reliable.
- Configured AWS Config to ensure security rules are followed for S3 buckets and other cloud resources.
- Set up Prometheus and Grafana for monitoring Kubernetes clusters, tracking resource usage, and creating dashboards for better visibility.
- Improved CI/CD processes by optimizing pipelines and making deployments faster and more stable.

EDUCATION

PG-DAC (CDAC)

Diploma in Advance Computing
2021

Bachelors of engineering

KITS, Ramtek 2015 – 2020

TECHNOLOGY STACK:

- **Cloud Services:** AWS
- **Containerization and Orchestration:** Docker, Kubernetes, Helm, Ansible
- **CI/CD Tools:** Jenkins, GitLab, AWS Devops
- **Infrastructure as Code:** Terraform
- **Monitoring and Visualization:** Prometheus, Grafana, Log Analytics
- **Scripting and Programming:** Shell Scripting, Java, Python
- **Operating Systems:** Linux,VMware
