Professional Summary

- Software Engineer professional with experience of 12.8 years as **QA Lead / Technical Delivery Manager.**
- Develop and implement comprehensive testing and quality assurance strategies.
- Perform **IoT testing, AEM Testing, Cloud Testing, SAP Testing, Regression Testing, Integration Testing, Database testing and System Testing to ensure the quality and stability of applications.**
- Partner with **cross-functional teams to ensure seamless integration of testing into development**.
- **Experience across multiple platforms – BFSI/ERP/Embedded/AEM/SAP/EdTech/Oracle/Cloud.**
- Manage end-to-end testing (manual and automation), create and execute regression suites and support data setup. Design and execute test cases for inbound and outbound data flows.
- Extensive experience with **Waterfall Model, SDLC, STLC, Agile, Kanban and Scrum** methodologies.
- Profound experience in **global Banking domain application testing and Core Banking Systems (CBS).**
- Prepared comprehensive and overall test plans and test strategy documents.
- Provide regular status updates, track KPIs and experience in leading SIT teams and managing complex seamless integration testing projects. Experience supporting onsite - offshore delivery models.
- Familiarity with API testing tools such as Postman, Swagger, Insomnia and automation/testing frameworks for both manual and automated API testing.
- Validating returned data against schemas, checking correctness, completeness, data types, and constraints essential for data integrity.
- Experience in manual and automated testing using tools like JIRA, SOAP UI, Selenium, Deffy.
- Experience with **PMO, CAB, CCB, Management tools** like **GitHub, Jira, Trello, Asana, Azure DevOps.**
- **Identify and troubleshoot defects, analyse test coverage,** and predict gaps in requirements for **testing Cloud Platforms -Azure / AWS / Snowflake / GCP.**
- Define and implement QA strategy aligned with product and platform goals.
- Performed **user acceptance testing, smoke testing, sanity testing, IoT smart device testing, system testing, Cross-browser testing, Compatibility testing, Database testing, API testing, Adhoc testing.**
- Design and plan the short term and long term test plan for the **Fintech, Ecom and AEM** cloud migration.
- Understanding requirements/user stories, **estimate, test design, prepare test cases**, **Manual test** execution, report defects and tracking, prepare test metrics.
- Lead end-to-end testing for **large-scale ERP**, **SAP module and Salesforce CRM** systems
- **Managed and engaged in QA activity for large scale** end to end **implementing SAP, Oracle Cloud, AEM as SaaS, Microsoft business solutions (Microsoft Dynamics 365) to different verticals of business.**
- Oversee and manage the **full testing process for blockchain, crypto, and energy trading software.**
- Lead client discussions for scoping, presenting POC demo, proposal writing, and SoW negotiation
- Experience in R&D and test case execution and troubleshooting of ETC devices and HHC devices.
- Execute functional and non-functional test cases according to detailed test cases description.
- **Maintenance and update of test documents and MS Office.**

Work Experience

1) Working as **QA Lead** at Insight, Gurgaon from July 2024 to till date.
2) Worked as **QA Lead cum Delivery Manager** at Flexsin, Noida from July 2020 to July 2024.
3) Worked as **Test Lead cum Delivery Manager** at Nityo infotech, Delhi from Oct 2018 to July 2020.
4) Worked as **Test Engineer** at Qualitest, Bangalore from June 2015 to Oct 2018.
5) Worked as **Test Engineer** at Bharat Electronics Limited, Bangalore from Jan 2012 to Dec 2015.

Education

B.E. (Computer Science & Engineering) from Visveswaraiah Technological University, INDIA in 2012

Technical Skills

Tools & Technology:	**AI, Azure DevOps, AWS, GCP, SharePoint, MS Dynamics 365, Postman, SAP, ERP, Odoo, IoT, Zoho, Asana, Trello, TFS, AEM, Oracle EBS, MTM, Microsoft Azure,** JIRA, Confluence, Bugzilla, HP ALM, ClearQuest, firebase, Clever tap, basecamp, Oracle Database Utilities,, CRXDE Lite, WCM, MSM, Zephyr
Language known :	**Java, Python, C# .Net, API**, C, C++, **Shell Scripting, MySQL, SQL*Plus**, PostgreSQL.

Significant projects

1. Project Name : AEM Cloud Migration.
   Tools : Jira, **Zephyr,** Confluence, AWS, Trillo, Adobe Analytics, Diffy
   Operating System : Windows, Android, iOS.
   Client : Global
   Domain : **AEM, ERP, Hospitality, Oil & Gas,** CRM, **Airlines, Salesforce**

Responsibilities as QA Lead:

- Define, document, and maintain the overall testing strategy, integration testing, user acceptance testing (UAT) and writing end-to-end business test cases aligned with user needs and business goals
- Monitors and controls the Execution (coding, testing) phases, work with QA Team to secure all testing environments, ensures there is a test plan and strategy in place for **AEM as a Cloud Service testing**
- Lead **pre-sales and marketing team** and Delivery the overall testing sign-off from the business head.
- Communicate and coordinate to anticipate bottlenecks, identify, assess, track and mitigate issues, risks and work with team members and management to mitigate and escalate as deemed suitable.
- Continuously identify opportunities for test optimization for B2B SaaS, fintech, enterprise software environments.

2. Project Name : Artes
   Tools : **Zephyr, TFS, ClearQuest, HP ALM**, **Blockchain, MS Dynamics 365**, **Azure DevOps**
   Operating System : **Windows, Macintosh, iOS, Android**
   Client : Global
   Domain : **Blockchain, Embedded, HealthCare, AEM 6.5**, Data flow Integration

Responsibilities as QA Lead cum Delivery Manager:

- Lead Indian and Chinese for team in software Testing and prepare release for SIT team
- Conduct functional, integration, and regression testing for **HealthCare and Salesforce** (Sales Cloud, Service Cloud, or custom implementations).
- Validate Salesforce data models, workflows, triggers, and API integrations (REST/SOAP APIs).
- Triggering SWID on machine and checking the stability on standalone system.
- **Hardware and Software integrated software Testing**.

3. Project Name : RMDR digital
   Tools : **Asana,** NodeJS, **Postgres, Cassandra, MS Dynamics 365**, Sharepoint, **TFS, IoT**
   Client : Global
   Domain : Drives, **Embedded Electronics, Salesforce, remote monitoring** (/Industry services)

Responsibilities as Test Lead cum Delivery Manager:

- **Testing for Cloud implementation of drives & monitoring system for global product**.
- Performing in Functional Testing, Automation Testing, Content Management Testing, GUI Testing,
- Support **systems integration testing (SIT) and user acceptance testing (UAT) functional testing** for complex and cross functional applications.

4. Project Name : MWFBI
   Tools : Rally, Zoho, HP ALM, **Zephyr, Guidewire, Blockchain,** Team space.
   Client : Mountain West
   Domain : **Banking, AEM, P&C insurance, Blockchain, HealthCare, Fintech.**

Responsibilities as QA Lead:

- Responsible for **Mobile and Web P&C insurance** application integration with external servers.
- Experience in debugging and troubleshooting issues in Mac and Win environments for **UAT functional testing.**

5. Project Name : SHB
   Tools : Bugzilla, AEM 6.5, **Tomcat, SSO, IBM WebSphere**, AWS, Credit Processing System
   Operating System : **Windows, Macintosh, iOS, Android**
   Client : Crisil
   Domain : **Banking, ERP, AI, Airlines, Investment Banking**

Responsibilities as Test Lead:

- Liaise with business and ITS stakeholders, including **FinTech** Partners and Directors
- Understanding Configuration and credit rating functions of the (CPS) Credit Processing System.
- Performing **Single Sign-On and cross-browser compatibility test** of the SHBCPS application.
- Reporting Key outcomes of onsite discussions to the management in status meetings.

6. Project Name : SHAKTI

Tools : Oracle Database Utilities, Acronis True Image.
Client : Indian Army
Domain : Defence and Aerospace, GPS, DGPS, Standalone System (Embedded Electronics)

Key responsibilities:

- Analyzing their order of **connections at all commander and control ETC.**
- Participate in **integration testing of SAP business suit application**
- Working on **HHC and** analyzing their order of **connections at all commander and control ETC.**

7. Project Name : AKSHAY
Client : Indian Navy
Domain : Defence and Aerospace, Standalone System (Embedded Electronics)

Key responsibilities:

- Involved in **mobile application implementations**.
- Extensive experience in modern workplace engineering including but not limited to Modern device management, Microsoft 365 suite, Azure.
- Participate in design & execution of **regression tests, Load testing, stress testing and integration tests**.
