Shiva Kumar Chelloju

9553411498 | chellojushivakumar@gmail.com | LinkedIn | Github |Hyderabad 500068

Skills

Languages & Core: JavaScript, TypeScript, Python
Frontend: React.js, React-Native, Next.js, Redux, Webpack, Micro Frontend, Performance Optimization
Testing & Tools: Jest, React Testing Library, Git, CI/ CD
Backend: Node.js, Express.js, Nest.js (Microservices), MongoDB (CRUD, Aggregations), RESTful APIs, JWT Tokens

Work History

Front-End Developer
CaprusIT, Hyderabad Jan 2022 – Present

- Took ownership of **end-to-end feature delivery**—from gathering stakeholder requirements and architecting solutions to implementing production-ready features.
- Integrated **REST APIs**, along with **JWT-based authentication**, for secure and efficient data handling across platforms.
- Enhanced app performance by **50%** through **code splitting**, **lazy loading**, and optimized **Webpack** bundling.
- Boosted **unit test coverage** from 40% to 90% using **Jest**, significantly reducing post-release bugs.
- Leveraged **AI-powered** coding agents (e.g., Cursor) to accelerate development workflows, improve code quality, and enhance productivity.
- Collaborated in **Agile teams**, contributing to sprint planning, code reviews, documentation, and CI/CD automation workflows.

Aauti | React Native, Redux, Hoc

- Developed **cross-platform mobile applications** using **React Native**, delivering consistent, high-performance experiences across Android and iOS.
- Built and maintained **scalable mobile UIs** using **Redux Toolkit**, and **React Hooks**, improving code modularity and reusability.

Saayam| ReactJs, NextJs, Redux Toolkit

- Developed and maintained Next.js applications using the App Router architecture, implementing server and client components for optimal performance and maintainability.
- Implemented global state synchronization between server-rendered and client-rendered components using Redux + Context integration.
- Integrated **Redux Toolkit** and React Context API for state management, enabling predictable data flow across complex UI components.
- Utilized Next.js Server Components and data fetching functions (fetch, getServerSideProps, revalidate) for **SSR/ISR** rendering and real-time content updates.

Aauti School | Typescript, React.js, React Native, Nest.js, Express.js, Node.js, MongoDB

- Built a seamless, feature-rich **education platform** by leveraging modern web technologies and **AI (**Artificial Intelligence**)**, enhancing learning experiences for students and teachers.
- Designed responsive layouts and reusable UI components with **Material UI** and **Bootstrap**, improving readability, consistency, and mobile responsiveness.
- Built scalable **microservices using Nest.js**, enabling modular development, improved maintainability, and support for high-concurrency workloads
- Integrated **AI-powered** automatic content generation and evaluation, reducing manual effort and accelerating content delivery.
- Maintained and optimized **CI/CD** pipelines in Azure, enabling faster, reliable, and automated deployments.
- Created reusable **NPM packages** and published **artifacts** in Azure, enhancing modularity, scalability, and code reusability across projects.

- Implemented secure private chat for Teacher–Parent communication and enabled group collaboration through **webhooks**, fostering better engagement.
- Implemented secure login solutions using **SSO** and **OAuth 2.0,** reducing password fatigue for users and streamlining multi-platform access.

Full-Stack Trainee
NxtWave, Hyderabad Nov 2020 – Dec 2021

- Continuous Capacity Building Program Intensive Bootcamp Trainee
- Developed a Keen understanding on the Fundamentals of Programming with Python concepts
- Able to build impressive Static, Dynamics and Responsive Website using JS

Projects

Tasty Kitchens (Swiggy/Zomato Clone) https://sktastykitchens.ccbp.tech

- Implemented a responsive Online Food Ordering System like Swiggy/Zomato where users can see popular restaurants with sort by rating, specific restaurant details, adding or removing food items to cart, and payments section.
- Implemented a responsive Online Food Ordering System like Swiggy/Zomato where users can see popular restaurants with sort by rating, specific restaurant details, adding or removing food items to cart, and payments section.Used fetch to call REST APIs for popular restaurants with sort by, specific restaurant details.
- Implemented username and password authentication and persisted login state using client storage.
- Implemented a protected route to ensure only authenticated users can access the pages like home, specific restaurant details, etc.
- **Technologies used:** HTML, CSS, JavaScript, React.js, Bootstrap, React Slick, Figma, client storage , JWT Token, Authentication

Nxt Watch (YouTube Clone) https://shivasnxtwatch.ccbp.tech

- NxtWatch application which is a clone for YouTube where users can log in and can see a list of videos like Trending, Gaming, Saved videos, and also can search videos and view specific video details, and users can toggle the theme (Light/Dark).
- Authenticating by taking username, password and doing login post HTTP API Call.
- Persisted user login state by keeping jwt token in local storage, sending it in headers of further API calls to authorize the user.
- Redirecting to the login page if the user tries to open Home, Trending, Gaming, Saved videos, Video item details routes which need authentication by implementing protected routes.
- **Technologies used:** React.js, JS CSS, Bootstrap, Routing, Rest API Calls, Local Storage, JWT Token, Authorization, Authentication.

Nxt Trendz (ECommerce Clone - Amazon, Flipkart) https://nxttrendzstore.ccbp.tech

- Implemented Nxt Trendz application, which is a clone for ECommerce applications like Amazon, Flipkart where users can login and can see list of products with search, filters, sort by, etc.
- Implemented Different pages and routes for Login, Products, Product details using React Router components Route, Switch, Link, props, state, lists, event handlers, form inputs.
- Authenticating and authorizing users by taking username, password and doing login POST HTTP API Call and implement filters by sending them as query parameters to product api calls.
- Persisted user login state by keeping jwt token in local storage, sending it in headers of further Api calls to authorize the user.
- **Technologies used:** React.js, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

Education

University College Of Engineering and Technology, M.G University, Nalgonda **2014 - 2018**
B.Tech in Electrical & Electronics Engineering (EEE) [**66.75%]**

Jawahar Navodaya Vidyalaya, Nagarjuna Sagar **2012 - 2014**

Intermediate (MPC) [**76.60%]**
