Chennai, TN 600001

PROFESSIONAL SUMMARY

Results-driven Systems Engineer with 3.7 years at TCS, specializing in C development for telecommunication software.
Seeking to be a part of an organization where I can utilize my skills and provide a significant contribution to the success of my employer and also my individual growth.

SKILLS

C, C++, SIP, ISDN (q931), SDP, RTP, UDP, TCP

SOFTWARE

Linux, SIPp, SIP Inspector, MS Word, Excel, Visual Studio Code, Wireshark

VERSION CONTROL

Mecurial, Git

ISSUE MANAGEMENT TOOLS

Youtrack, Jira

AWARDS AND RECOGNITION

Received 'Star of the Quarter' award twice for delivering features on time and without regression
Received 'Star of the Month' award for consistency in work

ACADEMICS

Panimalar Engineering College
Chennai, •09/2021

***B.E*: ECE CGPA :** 8.45

Ascent Junior College
Vizag, •04/2017

***Aggregate* :** 96.1%

St. Josephs Girls High School
Vizag, •03/2015

***Aggregate* :** 94.2%

LANGUAGES

English, Tamil, Telugu, Hindi

Soft Skills

Good verbal and written communication skills.
Willingness to learn new languages and technologies
Comprehensive problem-solving abilities
Fairly good at multitasking.

WORK HISTORY

TCS - Systems Engineer
Chennai, India•11/2021 - 05/2025

- Project Name : Alcatel OmniPCX Enterprise (OXE)

The Alcatel OmniPCX Enterprise (OXE) is an integrated communications solution for medium-sized businesses and large corporations. It combines the best of the old (legacy TDM phone connectivity) with the new (a native IP platform and support for Session Initiation Protocol, or SIP) to provide an effective and complete communications solution.

- Experienced C developer with 3.7 years of expertise in designing, developing, and optimizing telecommunication software.
- Debugging and profiling the logs from the customer site using gdump and mtracer tools.
- Analyzing user requirements and implementing enhancements (features) related to OXE.
- Involved in the complete unit testing of the features, and publishing relevant test documentation.
- Solving CRs that were raised by customers and implementing enhancements in the Source Code.
- Reviewing peer code changes, coordinating with team members, conducting knowledge transfer sessions.

Features Worked
Seplos is an Alcatel proprietary SIP end points.

1. ***Seplos Encryption:***

This development was mainly intended to encrypt the communication involving SIP end points. End to end encryption was done with Single key and Double Key concepts. It has been implemented for both Public and Private trunks.

2. ***Encryption Lock Icon Seplos Phone sets:***

This development is to display a lock icon on the display of the phone sets if the communication is secured using SIP architecture.

3. ***Support of ALE-300, 400, 500:***

This development was done for the integration of new phone types with advanced features like support of voicemail, e.t.c.,

4. ***Pragrammable keys for SIP Extensions:***

This development was done for the syncronization between the keys programmed from the phone set and the console
