## CAREER SUMMARY

Results-driven Business Analyst with 5+ years of experience in defining product vision, gathering requirements, and delivering scalable solutions across Agile environments. Experienced in bridging customers, engineering teams, and stakeholders to incubate new features, prioritize customer needs, and launch resilient applications. Skilled in KPI tracking, process optimization, and exploring AI-driven use cases to improve efficiency and customer experience.

## TECHNICAL SKILLS

**Testing:** API Testing & Integration, UAT

**Tools**: JIRA, Confluence, NewRelic, Data Visualization Tools, UML

**Technologies:** XML, JSON, SQL, Power BI, Azure, GCP, AI/ML use case exploration, Cloud-based product deployment

**Techniques**: Sprint Planning, Gap Analysis, BRD/PRD Creation, A/B Testing, Product Roadmap Planning, Metrics-driven Analysis

**Soft Skills**: Cross-functional Collaboration, Stakeholder Communication, Analytical Thinking

**Documentation & Agile:** BRD/PRD Creation, User Stories, Agile/Scrum, Data Flow Diagrams, SixSigma

## CERTIFICATIONS

- **Certified Scrum Master**
- **Foundations of Project Management** (Google/Coursera)

## WORK EXPERIENCE

**Mystifly Consulting Pvt Ltd, Bengaluru** | *Product Analyst/Business Analyst* (July 2022 – Present)

- Collected and analyzed business requirements, converting them into functional specifications, user stories, and detailed test plans.

- **Owned product lifecycle activities** from requirement gathering to deployment for fare search and booking APIs, ensuring features aligned with customer needs and competitive benchmarks.
- **Authored clear PRDs, user stories, and acceptance criteria**, collaborating with engineering and QA teams to translate business requirements into functional solutions.
- **Facilitated Agile ceremonies** (sprint planning, reviews, retrospectives) and worked closely with cross-functional teams to deliver on sprint commitments.
- **Established a feedback loop** with customers and internal teams to prioritize feature requests, refine requirements, and scope product releases.
- Partnered with engineering to **optimize API performance**, improving reliability and response time while ensuring scalable integration with multiple suppliers.
- Defined and monitored **key success metrics** (adoption, conversion rate, API performance) through SQL queries and Power BI dashboards to guide decision-making.
- Conducted **gap analysis and competitor research**, contributing to product roadmap discussions and identifying opportunities for innovation.
- **Communicated product vision and priorities** to stakeholders and leadership, ensuring alignment on goals and delivery timelines.

**Altisource Business Solutions Pvt Ltd** | *Business Analyst (*Oct 2020 – Dec 2021)

- Managed end-to-end documentation for data sources and analytics workflows to ensure reproducibility and compliance.
- Built interactive dashboards in Power BI, improving reporting efficiency by 20%.
- Provided supply-demand insights through data tracking, aiding decision-making across teams.
- Collaborated with stakeholders to integrate market trends and operational insights into ongoing strategies.
- Assisted in documenting business processes, workflows, and standard operating procedures during the early stages of product development.
- Accountable for estimating, prioritizing, planning, and coordinating testing activities, resulting in a 15% increase in testing efficiency.
- Worked with development and QA teams to review and validate XML/JSON-based API request/response structures during early-stage system integrations, ensuring adherence to functional specifications and business rules.

**Dixon Technologies India Pvt. Ltd** | *Quality Analyst (*Sep 2018 – Jul 2020)

- Analyzed manufacturing data to identify inefficiencies, contributing to defect reduction and process improvements.
- Collaborated with cross-functional teams (engineering and customer teams) during new product introductions.
- Developed and maintained quality dashboards and internal reports to support continuous improvement.
- Gained foundational exposure to SDLC and manual testing processes by assisting in test case execution, defect logging, and basic verification of internal tools and processes.
- Supported senior QA engineers in documenting test scenarios, checklists, and internal walkthroughs for process validations.
- Participated in training sessions and shadowed cross-functional teams to understand product workflows, quality assurance standards, and client communication protocols.
- Developed a strong base in structured problem-solving using techniques like 5 Whys and root cause analysis, forming a transition path toward business analysis and product work.

## EDUCATION

B. Tech | Sree Vidyanikethan Engineering College, Tirupati | 73.95% | 2013 – 2017

## ACHIEVEMENTS, SKILLS AND COMPETENCIES

Received Power House Award in 1st Quarter 2025

## LANGUAGES

Professional Proficiency: English, Hindi, Kannada
