CAREER OBJECTIVE

To leverage my technical expertise in global market to drive impactful & sustainable solutions, I aim to contribute innovative & sustainable practices to help companies to optimize their global impact

PROFILE SUMMERY

- A Senior AI & Big Data Technical Consultant has over 11+Years of experience in emerging cutting-edge Big Data technologies with the expertise in AI, Multi & Hybrid Cloud solutions in AWS, Azure, GCP, OCI Design Architectures & Deployments on Cloudera's Enterprise-grade AI, Data & Analytics platform
- Designed & implemented Big Data solutions for AI, BFSI, SCM, Healthcare, Retail, Transport & Logistics, Agriculture, Telecommunications, Presales & Marketing, Risk & Compliance projects
- Providing advisory services & thought leadership over complex data strategy models, modernising AI analytics environments by leveraging cloud based platforms & big data technologies, including integration of existing data collaboration & analytics platforms with services which allows enterprise teams to collaborate on projects & help to create a single source for all data assets on its platform
- Designing & implementing AI-forward and data-driven business landscape, which claims to have to become a next-generation platform for data & AI governance
- Implementation of Hybrid Blockchain security & threat preventive architecture solutions integrated with AI, IoT, Big Data & Biometrics to deliver users a more streamlined & personalized experience on enterprise services using multi-cloud environments
- Experienced Solutions Architect with 7+ years of expertise in enterprise architecture frameworks such as TOGAF, ABACUS, Zachman and ArchiMate along with proven ability to design, implement and optimize scalable architectures that align with business objectives
- Led enterprise-wide TOGAF implementation with OCI-Multicloud interconnect framework to improve business-IT alignment by 30% & spearheaded cloud migration strategies using AWS & Azure reducing operational costs by 25%
- Certified Professional in Oracle Cloud Infrastructure 2025 Certified Multicloud Architect Professional

WORK EXPERIENCE

Bravezone Softech Pvt Ltd-Pune **08/2022 – Present**
AI & Big Data Technical Consultant:

- Architected & deployed enterprise-grade AI/ML & RAG data pipelines across AWS, Azure, GCP & OCI, integrating with vector databases like Pinecone & Milvus to enable real-time semantic search and retrieval-augmented generation for healthcare, e-commerce & SCM clients
- Designed & implemented data pipelines integrating Google BigQuery with Oracle Cloud Infrastructure for real-time analytics across multicloud environments & collaborated with cross-functional teams to deliver multicloud integration strategies to reduce latency across GCP, OCI & AWS
- Led ERP migration of legacy workloads to OCI using GitHub, Terraform and OCI Resource Manager, improving performance & reducing costs by 25% and conducted trainings on OCI-multicloud deployments and mentored multiple teams on hybrid cloud strategies and AI readiness
- Developed IAM policies & implemented federated identity management across OCI & other cloud platforms to streamline access control and established automated security baselines using OCI Security Zones & Cloud Guard, reducing manual audits by 30%
- Led cross-functional teams to deliver multicloud AI solutions for Healthcare & E-commerce sectors and aligned them with technical delivery for business outcomes

AI : Sustainable-AI & Enterprise-AI

- AI Digital Twinning : Designed complete architecture for AWS IoT TwinMaker as part of digital transformation, prepared & provided existing diverse data from multiple sources like IoT data, Video data, Application data, Event data to digitally replicate real-world systems such as buildings, factories, industrial equipment's, construction projects & interior for AI Model
- Developed and maintained ETL workflows using AI agents & Oracle Data Integrator (ODI), Apache Airflow and BigQuery SQL to support cross-platform data ingestion and transformation
- Designed & deployed OpenAI Multi-cloud architecture to host Generative AI applications with SingleStore Helios on AWS & Azure to create personalized banking services and created RAG pipelines which can frame various data sources for seamlessly connect & integrate different LLM providers like openAI, Groq, Mistral AI, with AI frameworks like LangChain, LlamaIndex, Chainlit, using Literal AI as an observability & evaluation platform

Fujitsu Consulting India Pvt Ltd-Pune **07/2021 – 08/2022**

Technical Consultant-TETC

- Confluent Kafka- Led service delivery to convince & strengthen client trust for end-to-end deployment of Confluent Kafka cluster in multi-cloud environment via Fujitsu's existing data delivery platform
- Successfully engaged in multi-module collaboration with Confluent Kafka ecosystem to enable secure data access, trust-free messages & value exchange which allows seamless integration, tamper-proof record sharing, facilitating interoperability and shared security
- Created & successfully executed multiple migration playbooks such as Hybrid & Multi-cloud data migration, ERP on-prem to cloud project migration, legacy bare-metal systems to cloud migration by achieving stakeholders priorities & business performance with zero downtime
- Automated ETL processes across GCP and OCI using Composer DAGs, Oracle Data Integrator (ODI) and BigQuery SQL for scalable data transformation for the migration of on-prem Oracle workloads to OCI**,** integrating with BigQuery for advanced reporting and ML model training
- Engineered robust data pipelines using Cloud Composer (Apache Airflow) to orchestrate workflows across Google Cloud (BigQuery) and Oracle Cloud Infrastructure (OCI)
- Architected multicloud data lake solutions leveraging BigQuery, Oracle Autonomous Data Warehouse, and OCI Object Storage for scalable, cost-efficient analytics
- Architected Kafka clusters for real-time fraud detection, integrating with blockchain and smart contracts
- Implemented multi-tenant Kafka architecture with namespace isolation and quota enforcement
- Integrated Kafka with LangChain, LlamaIndex and Literal AI for real-time observability in GenAI applications
- Delivered training on OCI multicloud deployments and Kafka operations to internal and client teams
- Used Cloud Services: Azure Synapse, Azure AI, Logic APP, Amazon One Enterprise, AWS Augmented AI

AJ Techsoft Pvt Ltd-Pune **01/2017 – 07/2021**

Big Data Solution's Architect(03/2019 – 07/2021)

- Experienced in designing architectures for Multicloud solutions on AWS & Microsoft Azure for data governance & auditing
- Configured Kafdrop Web-UI using both protobuf descriptor file & schema registry & integrated with Azure Event Hub with Kubernetes orchestration across EKS & Azure
- Implemented data governance and security policies across GCP and OCI using IAM roles, VCN peering and encryption standards & led the migration of legacy Oracle workloads to OCI while integrating with BigQuery for advanced reporting and machine learning use cases
- Integrated Kafka with Apache Flink and NiFi for real-time data processing and transformation
- Led Kafka upgrades and performance tuning to support mission-critical workloads in BFSI and Healthcare domains
- Experienced in CDH5.13 – CDP7.1 with CM7.11, Big Data Ecosystem, Impala, Spark, Flink, Kafka, NiFi

❖ **Extensively Used AWS, Microsoft Azure & GCP Services:**

- Data Ingestion**:** AWS IoT, Kinesis Stream, Lambda, Azure Funtion, IoT Hub, Event Hub, PubSub, CloudIoT
- Data Modelling**:** AWS Lake Formation, Glue ETL, Kinesis Analytics, Azure Data Lake Store, Cloud Storage
- Big Data Processing/Computation**:** EMR, Sagemaker, Databricks, Stream Analytics, DataProc, DataPrep
- Data Warehouse**:** RedShift, ElasticSearch, RDS, Azure Synapse Analytics, Azure Data Factory, BigQuery
- Data Governance & Data Cataloging**:** AWS Data Catalog, Lake Formation, AWS Glue, BigQuery Omni,
- Orchestration & Presentation**:** Cloud Composer, Airflow, Athena, QuickSight, PowerBI, CloudFuntion
- Other Services: EC2, Image Builder, VPC, CloudFormation, CloudWatch, Data Pipeline, AWS Audit, ECS, EKS, Amazon Managed Blockchain, AWS Supply Chain, Incident Manager, Kinesis Data Firehose

Big Data Architect **02/2018 – 02/2019**

- Automated data synchronization between Oracle DB and BigQuery using GoldenGate, Dataflow and Cloud Functions for near real-time insights
- Created dashboards and visualizations in Looker and Oracle Analytics Cloud (OAC) using BigQuery datasets for executive-level reporting
- Designed & deployed event-driven architectures using OCI Events, Pub/Sub and Cloud Functions to trigger multicloud workflows and data syncs
- Implemented Kerberos-based authentication and SSL encryption for secure data transmission
- Excellent in designing architectures, creating workflows using diagrams.net, glify, lucidchart, nuclino ect
- Experienced in creating various dashboard metrics, alarms & notifcations for servers using AWS Cloud
- Excellent in analysing systems, benchmarking, identifying performance challenges & providing solution
- Design of cloud architectures for customers looking to migrate or develop new PaaS, IaaS & hybrid solutions by using AWS Migration Hub, AWS Application Migration Service, DataSync

Big Data & Hadoop Administrator **01/2017 – 02/2018**

- Implementation of both open source kubernetes and fault tolerant Amazon EKS for deployment, administration and operations of kubernetes clusters, stateful sets, network polices
- Working on kubernetes cluster security, storage orchestration, load balancing and scaling, high availability, disaster recovery, service discovery, rollouts and rollbacks
- Provided & implemented various security policies to protect data at rest & data in motion using Kerberos, IAM Roles, Active Directory, Apache Ranger
- Setting EC2 instances to build fault-tolerant and high availability applications
- Design solutions for data storage, monitoring and deployment of the clusters while continuously enhancing performance using AWS Auto Scaling features of AWS EC2 instances
- Responsible for CDH & CM upgrades, commissioning & decommissioning nodes, enabling name node & resource manager HA

Freelance Software Engineer-Remote **06/2014 – 12/2016**

- Designed & developed scalable solutions across India, UK & Southeast-Asia using Core Java-J2EE, Java 8+, Spring MVC, Spring Cloud 1.0 release for E-commerce, Healthcare & Fintech clients
- Developed CI/CD pipelines using Github Actions, Jenkins, Terraform, Docker & Kubernetes deploying to EC2 & Azure app services
- Built a Healthcare appointment platform for secure scheduling system with Spring Boot & Kafka for real-time notifications and audit logging
- Developed payment gateway integrations module using Spring Boot, Hibenate & MongoDB

ACADEMIC & OTHER DETAILS

Bachelor of Computer Science & Engineering- BAMU Chhatrapati Sambhajinagar, Maharashtra

Passport No. - U9136442
