Professional Summary

Principal Engineer with 14+ years of experience in software development, system architecture, and cloud-native platforms across fintech, healthcare, and SaaS domains. Skilled in designing and delivering scalable solutions on AWS and GCP, with expertise in microservices, serverless applications, and enterprise-grade software design. Proven track record in building real-time data pipelines (ETL, Dataflow, Pub/Sub, BigQuery) and integrating AI/LLM technologies (GPT-4, Gemini 2.5) into production systems — including solutions such as GenBI, a healthcare data intelligence tool that enables customers to converse with their data. Achieved 35% infrastructure cost reduction through architectural optimizations while mentoring and leading high-performing teams to deliver innovative, business-aligned solutions.

Skills

Languages & DB: Python, SQL, and Golang (Basic), PostgreSQL, MySQL, and BigQuery | **Cloud & Architecture:** AWS (Lambda, S3, RDS), GCP (Dataflow, Pub/Sub, BigQuery, Composer, Cloud SQL), Microservices, Serverless applications, and Cloud cost optimization | **Orchestration & Streaming:** Airflow, Kafka | **AI/LLM**: OpenAI APIs (GPT-4), Vertex AI (Gemini 2.0, 2.5), Rasa Framework, AI-driven workflows, Qdrant (vector db), text embeddings and vibe coding | **CI/CD & DevOps:** GitHub Actions , Docker , Kubernetes , Code Quality | **Visualization & Analytics**: Metabase, Apache Superset | **Leadership:** Engineering Leadership , Team Scaling , Product Development , POCs/Feasibility Analysis

Work History

Principal Software Engineer, 03/2024 to Current
Taliun Solutions LLP – Pune, India

- Owned architecture and technology innovation for healthcare data platforms, providing technical leadership and mentoring to accelerate the development pace.
- Designed and delivered HealthCompiler, a healthcare data product, overseeing architecture, implementation, and engineering best practices.
- Built GenBI, an AI-powered intelligence tool integrated into HealthCompiler, enabling customers to *converse with their data and derive insights* using Vertex AI Gemini 2.5, vector databases, and embeddings.
- Developed multiple POCs for presales and client engagements, demonstrating technical feasibility, and building credibility with healthcare customers.
- Led the team in mentoring and coaching, fostering engineering excellence, and aligning development practices for rapid, high-quality delivery.
- Drove innovation through POCs and architectural enhancements, positioning the product for scalability and future AI/LLM integrations.

Senior Software Engineer, 04/2022 to 10/2023
Payla Services GmbH – Berlin, Germany

- Designed and implemented Payla's BNPL platform (a white-label solution for the European market) from the ground up, serving as a core architect and developer.
- Built and deployed multiple microservices using Python, Django, Docker, and Kubernetes, ensuring modularity, maintainability, and scalability.
- Architected high-traffic systems to handle over 1,000 concurrent users and thousands of daily transactions, with low latency and high reliability.

- Implemented observability, monitoring, and performance optimizations, improving system uptime, and reducing incident resolution times.
- Collaborated with stakeholders and product teams to align technical design with business goals, enabling faster onboarding of partners.

Senior Software Engineer, 07/2021 to 03/2022
Grandperspective GmbH – Berlin, Germany

- Developed critical features for hazardous gas monitoring systems, improving reliability by 60% and reducing false positives by 25-30%.
- Enhanced system observability and implemented robust CI/CD workflows, leading to a 80% reduction in incident resolution time.

Software Engineer, 03/2019 to 06/2021
LYNX BV Germany Branch – Berlin, Germany

- Automated customer onboarding and CDD processes improve efficiency by 60% and reduce manual effort by 76 hours per week.
- Designed and implemented APIs; built ETL pipelines for data visualization and KPIs from six CRMs, enabling twenty new business insights and reports.

Earlier Roles (2011 – 2019)

Msbc Solutions (Project Manager) | Ahmedabad, India (July 2017 - Feb 2019)
TrellisSoft / Vavni Services (Project Lead) | Gandhinagar, India (Apr 2016 - July 2017)
Vavni Services / Buzzworks / ReadyBytes (Software Engineer) | India (2011 - 2017
Delivered multiple enterprise software projects, migrations, and AI/ML solutions.
Led cross-functional teams through acquisitions and platform transitions.
Developed POCs for innovative approaches and contributed to architecture design.

Education

MCA: Computer Applications, 07/2009 to 05/2011
Jaipur National University - Jaipur

'A' Level Certification: Computer Applications, 01/2008 to 03/2009
DOEACC - New Delhi
