To contribute my 5+ years of experience in Jira, JSM, workflow customization, automation, and user support to help organizations improve service delivery, governance, and collaboration using Atlassian tools.

PROFESSIONAL SUMMARY

- 5+ years of experience in Jira Administration and Atlassian development across Server, Data Centre, and Cloud environments.
- Expertise in installation, configuration, upgrades, and migration of Jira, Confluence, and Jira Service Management.
- Strong hands-on experience with Groovy scripting and Script Runner for automation, validations, listeners, and custom workflows.
- Proficient in creating and managing workflows, issue types, screens, custom fields, and transition conditions/validators.
- Skilled in configuring permission schemes, notification schemes, security levels, and project roles for governance.
- Extensive experience in Jira Service Management (JSM) setup, including SLAs, request types, portals, and automation rules.
- Designed and maintained advanced JQL filters, dashboards, and boards for Agile and Kanban teams.
- Worked with major Atlassian Marketplace add-ons such as JSU, JMWE, Xray, Tempo, Insight, Email This Issue, Dynamic Forms, and Risk Register.
- Strong knowledge of automation using triggers, conditions, and actions to reduce manual effort and improve workflows.
- Performed migrations from legacy platforms and Atlassian Server/DC to Jira Cloud with data integrity and minimal downtime.
- Integrated Jira with third-party tools using REST APIs, DVCS, application links, and webhooks.
- Generated reports and analytics using Jira's native reporting and third-party plugins to support decision-making.
- Provided user support, conducted trainings, and implemented best practices for teams and stakeholders.
- Ensured security, compliance, and governance standards through access control and role-based permissions.
- Collaborated with cross-functional teams to optimize Jira usage for project management, release planning, and service operations.

EDUCATION

Bachelor of Science in Computers| Vishaka Defence Academy
Degree obtained April 2021

- Distinguished member of Andhra university, GPA: 9.1

EXPERIENCE

PROJECT- 3

Company	**: Trantor Software**
Project	**: Velocity EHS (Environment, Health, Safety)**
Duration	**: Aug 2024-jan 2025)**
Role	**: JIRA Administrator & Developer.**
Tools	**: JIRA Software, JSM, JWM, Groovy, Confluence, Bitbucket.**

Responsibilities and contributions:

- Install, configure, upgrade, and maintain Jira, Confluence, and Jira Service Management across Server, Data Centre, and Cloud.
- Design and customize workflows, issue types, screens, custom fields, conditions, validators, and post functions.
- Develop automation scripts using Groovy and Script Runner to streamline processes and reduce manual tasks.
- Create and manage JQL filters, dashboards, and boards for Agile, Scrum, and Kanban teams.
- Set up and administer Jira Service Management (JSM) including SLAs, request types, customer/agent portals, and queues.
- Manage user access, roles, and permissions to ensure proper governance, compliance, and security.
- Configure notification schemes, permission schemes, security levels, and project roles.
- Handle migrations from Server/Data Centre to Cloud and perform data imports/exports with minimal downtime.
- Integrate Jira with external tools using webhooks, REST APIs, application links, DVCS accounts, and other connectors.
- Administer Atlassian Marketplace apps such as Script Runner, JMWE, Tempo, Xray, Insight, Email This Issue, and others.
- Generate reports and analytics to track performance, bottlenecks, and project progress.
- Perform release and change management using Jira to plan, track, and coordinate deployments.
- Provide user training, support, and troubleshooting to teams and stakeholders.
- Implement automation rules using Jira Automation (Triggers, Conditions, Actions) to improve efficiency.
- Ensure platform stability, backups, and performance optimization for Jira and related applications**.**

PROJECT- 2

Company	**: Accenture**
Project	**: ETON**
Duration	**: Sep-2022 to June-2024**
Role	**: JIRA Administrator & Developer.**
Tools	**: JIRA Software, JSM, JWM, Groovy, Confluence, Bitbucket.**

Responsibilities and contributions:

- Led end-to-end migration of Jira projects from legacy ticketing systems to Atlassian Cloud with zero data loss.
- Designed and implemented custom workflow automations to support ITSM, Agile, and DevOps processes.
- Built reusable Groovy scripts for bulk updates, auto-assignments, validations, and custom post functions.
- Configured Insight/Assets for asset management and linked CI items with Jira issues.
- Managed release planning and change requests using Jira for deployment coordination.
- Created audit reports and compliance dashboards to track governance and security controls.
- Collaborated with product owners and scrum masters to optimize sprint workflows and backlog management.
- Set up multi-project configurations with shared workflows, permission schemes, and global settings.
- Integrated Jira with CI/CD tools like Jenkins, Bitbucket, GitHub, and Azure DevOps.
- Performed health checks, performance tuning, indexing, and backup strategies for Jira environments.

- Planned and executed Jira migrations from Server/Data Centre to Cloud, ensuring data integrity and minimal downtime.
- Performed user, project, and workflow migration using JCMA, site import, and custom scripts.
- Automated repetitive admin tasks using Script Runner, Groovy scripts, and Jira Automation rules.
- Built custom post-functions, listeners, and validators using Groovy to enhance Jira workflows.
- Integrated Jira with external tools like Bitbucket, GitHub, Azure DevOps, Jenkins, and Slack using APIs and webhooks.
- Configured application links, OAuth credentials, and DVCS accounts for seamless development tracking.
- Developed automation for bulk issue transitions, field updates, notifications, and task escalations.
- Worked on migrating add-ons, workflows, custom fields, filters, and dashboards to Cloud environments.

PROJECT- 1

Company	**: Accenture**
Project	**: BNY MELLON**
Duration	**: Feb-2021 to July-2022**
Role	**: JIRA Administrator.**
Tools	**: JIRA Software, JSM, JWM, Confluence, Bitbucket.**

Responsibilities and contributions:

- Create and manage Jira users, groups, and project roles.
- Configure basic project settings like issue types, workflows, and screens.
- Set up and manage permissions and notification schemes.
- Create and maintain JQL filters, dashboards, and boards for teams.
- Assist with creating custom fields and updating issue layouts.
- Support teams with user access, issue changes, and troubleshooting.
- Configure email notifications for issue updates and assignments.
- Help manage Jira Service Management portals and request types.
- Document configuration changes and follow admin best practices.
- Coordinate with senior admins or developers for escalations and enhancements.

TECHNICAL SKILLS

- **Operating System: Windows & Cloud**
- **Tools : JIRA, JSM, JWM, CONFLUNECE, BITBUCKET, GROOVY, AZURE DEVOPS, POWER BI**
- **Software : Atlassian**

Declaration:

I do hereby confirm that the information given above is true to the best of my knowledge and belief.
