MAKTHUDDIN SHAIK

9110303881 | makthuddin.shaik87@gmail.com

Summary

Cloud & DevOps Engineer with 9 years of IT experience (5+ in Cloud & DevOps), skilled in **GCP**, **AWS, Kubernetes**, **Terraform**, and **Python**. Expert in **multi-cloud automation, CI/CD,** cost optimization, and AI/ML integration using **n8n AI Agents** for intelligent, cross-cloud workflows and incident response.

Experience

Cloud & Senior DevOps Engineer Oct 2022 to May 2025

Cognizant Technology Solutions

- Architected multi-region GCP deployments, ensuring **99.99%** uptime and disaster recovery compliance.
- Integrated **Vertex AI** for predictive monitoring and anomaly detection in logs.
- Deployed **EKS** on Fargate for secure execution of containerized workloads.
- Automated CI/CD pipelines using Cloud Build and Jenkins, reducing release cycle time by **40%.**
- Established Application Load Balancer with Target Groups for efficient microservices routing.
- Optimized Kubernetes clusters on GKE, enhancing system resilience by **30%.**
- Developed Lambda-driven automation for instance lifecycle management and snapshot cleanup.
- For analytics modernization, you used incremental data synchronization from **on-premise databases** to **BigQuery**.
- Implemented cost governance policies, achieving annual savings of **$20K** through GCP Billing recommendations.
- Integrated **AI-based monitoring agents** to automatically analyze deployment logs and generate health reports.
- Automatically provision migrated workloads with Terraform and Ansible instead of manually setting up **on-premise servers**.
- Migrated the **on-premise** databases and storage systems to **AWS RDS**, **EFS** and GCP **Cloud SQL** with no data loss using snapshots and replication.
- Designed and deployed automation flows connecting **AWS, GCP, Jenkins, and Slack** using **n8n**.

Cloud & DevOps Engineer May 2020 to Jun 2022

RNTBCI (Renault-Nissan Technology and Business Cen

- Built GCP-first hybrid automation with Terraform and Ansible for **GKE, Cloud SQL**, and Pub/Sub, enabling faster provisioning and migration.
- Set up a VPC Transit Gateway to enable a hub-and-spoke model with multiple VPCs connected across multiple regions.
- Established **AWS Backup** policies for **DynamoDB, RDS, and EBS.**
- Developed event-driven automation with Cloud Functions + **Pub/Sub** for infrastructure tasks.
- Established hybrid connectivity between on-prem data centers and GCP using Cloud VPN and Shared VPCs, enabling secure communication during transition.
- S3 Cross-Region Replication (CRR) is configured to meet DR requirements.
- Elastic Beanstalk environments are managed for web application hosting.
- Supported cloud migration from on-prem to GCP, accelerating adoption of Cloud Run and BigQuery for enterprise analytics.
- Applied GCP AI APIs (Vision, NLP) in DevOps pipelines for automated document validation and monitoring.
- Established IAM roles and policies for least privilege, and enforced MFA.
- Developed Step Functions for complex workflow automation.
- Implemented incremental data synchronization from **on-prem** databases to **BigQuery** for analytics modernization.
- Deployed **AWS WAF** with Shield Advanced for web application security.
- Enabled **CloudTrail** and **Config Rules** for monitoring and continuous compliance.

Software Engineer Jun 2019 to Dec 2019

AT & T

- Created CI/CD pipelines (Cloud Build + Jenkins) for GCP workloads (GCE, BigQuery, Dataproc), reducing release cycles by 35%.
- Developed custom AMIs and launch templates.
- Built data ingestion pipelines with AWS Kinesis Data Firehose, and Lambda.
- Automated EC2 scaling with Auto Scaling Groups (ASG) and CloudWatch alarms.
- Implemented AI-based anomaly detection scripts (Python + Vertex AI) for monitoring system metrics.
- Created S3 lifecycle policies for cost-effective data retention.
- Executed analytical jobs on AWS Glue, along with Athena, for ad-hoc querying.
- Automated VM lifecycle and backup policies with GCP SDK + Terraform, improving DR readiness.
- Monitored infrastructure with SNS alerts through CloudWatch metrics.

Business Data Analyst Jun 2017 to Oct 2018

Bajaj Allianz

- Performed data analysis and predictive modelling for claims, underwriting, and investment decisions.
- Automated reporting workflows, reducing errors, and improving efficiency by 30%.
- Delivered real-time insights via dashboards, enhancing business strategy, and risk management.

Skills

- **Cloud Platforms:** AWS (EC2, VPC, S3, Route 53, ECS, EKS, CloudWatch, IAM, KMS, CloudFormation, CloudWatch, Step Functions, AWS Systems Manager, AWS Lambda, AWS X-Ray, ELK Stack, S3, EBS, EFS, Glacier, AWS Glue), GCP (Compute Engine, VPC, Cloud Storage, Cloud DNS, GKE, Cloud Monitoring, Pub/Sub, BigQuery, Cloud Function, App Engine, Cloud Data Fusion, Cloud SQL Insights, central networking hub)
- **DevOps & CI/CD:** Jenkins, Git, GitHub, GitLab CI/CD, Cloud Build, ArgoCD, Nexus, CI/CD Pipelines.
- **Infrastructure as Code (IaC):** Terraform, AWS CloudFormation, Ansible
- **Containerisation and Orchestration:** Docker, Kubernetes (EKS, GKE), Helm, Containerisation, and Microservices
- **Scripting and Automation:** Python (Boto3, Google Cloud SDK), Bash, and Ansible Vault, n8n (AI Agents, workflow automation),anomaly detection, auto-remediation.
- **Monitoring & Logging:** AWS CloudWatch, GCP Cloud Monitoring/Logging (Stackdriver), Prometheus, Grafana, New Relic, AppDynamics.
- **Security and Compliance:** IAM, KMS, Secrets Manager (AWS and GCP), Ansible Vault, Security Audits, Cloud Governance, AWS Direct Connect, Transit Gateway, and VPN
- **Operating Systems & Networking:** Linux (Ubuntu, RHEL), Load Balancers (ALB, ELB, GCP LB), Auto Scaling Groups, DNS Management.

Certifications

- AWS Solutions Architect Associate Certification.
- GCP Associate Cloud Engineer.

Education

PGDM | Marketing & HR – ICBM-SBE

B.Sc Graduate - Osmania University
