SHAKTHI NADHAN N

AWS DEVOPS ENGINEER

Hyderabad, India 500081 ♦ +91-9840112652 ♦ Shakthinana0105@outlook.com

Total IT Experience: 8.8 Years | Relevant AWS & DevOps Experience: 5+ Years

SUMMARY

Dynamic AWS Cloud and DevOps Engineer with over 5 years of extensive experience in cloud infrastructure automation, CI/CD implementation, and container-based deployments. Possesses expertise in managing AWS services, scripting with Bash, and constructing Jenkins pipelines to streamline production-grade workflows. Demonstrates proficiency in Infrastructure as Code using Terraform and orchestrating with Kubernetes. Recognized for effective management of real-time incidents, optimization of deployment processes, and fostering collaboration across cross-functional teams to drive project success.

SKILLS

- **Cloud Infrastructure & Monitoring:** AWS (EC2, S3, IAM, CloudWatch, CloudTrail), Prometheus, Grafana
- **Infrastructure as Code (IaC):** Terraform (modules, reusable templates)
- **Scripting & Automation:** Bash, Python (for log parsing, backups, infra tasks)
- **ITSM & Issue Management:** ServiceNow, Jira (ticket handling, incident response, escalation)
- **CI/CD & Automation:** Jenkins, GitHub Triggers, Git, Jenkins Pipelines, Cron Jobs
- **Containerization & Orchestration:** Docker, Kubernetes (manifest testing, staging deployments)
- **OS & Platform Experience:** Amazon Linux, Ubuntu

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate, Certified

EXPERIENCE

L2 Engineer, **HTC Global Services Pvt Ltd** || 02/2024 - 08/2025

- Built and maintained Jenkins pipelines integrated with GitHub for automated deployments.
- Managed CloudWatch Agent installation and custom dashboards using CloudWatch and Grafana.
- Configured Prometheus exporters on EC2 and visualized custom metrics in Grafana dashboards.
- Automated EC2 log uploads to S3 using cron jobs and AWS CLI for backup and audit.
- Deployed containerized internal apps with Docker; tested Kubernetes manifests in staging.
- Wrote IAM policies and managed secure role-based access across AWS services.
- Drafted reusable Terraform templates for provisioning cloud infrastructure as code.
- Implemented proactive monitoring tools to identify potential issues before they impacted users, reducing downtime significantly.
- Reduced ticket backlog by prioritizing tasks and escalating critical issues to appropriate teams.

IT Support Engineer, **VLS Global Logistics Private Limited** || 05/2021 - 02/2023

- Assisted in Jenkins CI/CD execution and gained hands-on experience with build pipelines and infra deployment support.
- Triggered builds, monitored logs, and performed troubleshooting on pipeline failures.
- Supported Git operations (clone, push, merge) and basic scripting tasks for infra support.
- Helped provision EC2 resources and manage IAM roles in support of app deployments.
- Built sample Docker containers and learned Terraform basics for infra-automation.

- Automated internal tasks using shell scripts (e.g., log archiving, backup monitoring).
- Gained exposure to CloudWatch and basic usage of Prometheus for monitoring internal test environments.

Tech Support, **Tech Mahindra Pvt Ltd** || 10/2018 - 04/2021

- Provided L1–L2 support for Telstra's AWS infrastructure, monitoring core services like EC2, S3, and IAM for performance and availability.
- Investigated CloudWatch alarms and EC2 health checks using AWS CLI, escalating critical incidents to backend teams as per defined SLAs.
- Assisted in infra handovers and gained practical exposure to the Prometheus + Grafana stack for system monitoring and visualization.
- Conducted preliminary analysis of recurring alerts, maintaining documentation to enable faster resolution during 24/7 NOC shifts.
- Utilized Linux command-line tools and system logs for troubleshooting, while strengthening core AWS knowledge through live incident handling.

Tech Support, **Sutherland Global Services** || 10/2014 - 03/2017

- Supported enhancement of Dell DOC software by troubleshooting software and hardware issues on Dell machines. - **DELL Computers**
- Detected, removed, and collected malware samples from end-user and enterprise systems, collaborating with the Security Development Team and Symantec to improve threat detection. - **McAfee**

ACADEMIC

University of Madras - MBA: System Management, 06/2023 || **B.A**: Criminology & Police Administration, 06/2018
