Career Objective

Solution-oriented and scalable Python Developer with over 4 years of experience in backend development and system integration. Currently serving as Point of Contact (POC) for the Inventory Module in a telecom product. Seeking a Senior Developer role to design, develop, and optimize robust backend systems and data pipelines. Skilled at building scalable solutions, integrating APIs, and collaborating across teams.

Professional Summary

- 4+ years of experience in Backend Development using **Python**, **FastAPI**, and **Elasticsearch**.
- POC for the **Inventory Module** in a telecom product, responsible for automation, ingestion, data processing, system enhancement, performance tuning and vendor management.
- Proficient in building and maintaining **RESTful APIs**, integrating ticketing systems, scalable microservices and developing automation tools.
- Skilled in **data pipeline development**, handling real-time telecom network data, and maintaining production-grade systems.
- Experience in working with both **SQL** and **NoSQL** databases.
- Contributed to discussions on system design and backend optimization strategies.
- Developed and monitored **Kibana** dashboards that improved visibility into ingestion pipelines and system health monitoring.
- Well-versed in Git-based workflows, Agile methodologies, and mentoring new team members.
- Strong experience in **debugging**, **unit testing**, and maintaining scalable codebases.
- Developed and maintained automated unit and integration tests using **Pytest**, improving code reliability and reducing bugs.
- Effective team player in Agile environments with strong analytical and communication skills.

Technical Skills

- **Programming:** Python, Shell Scripting
- **Web Frameworks:** FastAPI, Flask (Basic)
- **Architecture:** Microservices, Modular Design, API-Driven Architecture
- **Databases:** Elasticsearch, MySQL, SQL
- **Tools:** Postman, Pytest, Git, Dockers,GitHub, WinSCP, Kibana, Logstash, Apache Kafka
- **Cloud:** Google Cloud Platform
- **Others:** JSON, YAML, Linux/Ubuntu, Application Deployment, ITSM Ticketing

---

Professional Experience

Tata Consultancy Services – Product Engineer
May 2021 – Present | Bengaluru, India

Project: TCS CNOPS (Cognitive Network Operations)

Responsibilities: Backend Development and data management
- Developed and maintained **RESTful APIs** for integrations using FastAPI.
- Managing the **Inventory Module**, integrating multiple vendor data formats and automating ingestion pipelines.
- Built a **Test Data Generator** tool simulating EMS data for dev/test environments.
- Integrated ticketing tools (manual C automatic) for Network Faults and Alerts.
- Created automation scripts to clean, parse, and ingest telecom data into **Elasticsearch**.
- Improved ingestion performance and reduced processing time by 30%.
- Participated in discussions on architecture, data models, and pipeline optimization.
- Debugged, tested, and maintained complex backend systems in a Linux environment.
- Actively contributed to Agile sprints: grooming, planning, retrospectives.
- Documented processes including RCA, release notes, bug fixes.

Technologies Used: Python, FastAPI, Elasticsearch, SQL, Linux, Git, Postman, Kibana, Kafka, JSON

Education

Bachelor of Engineering (B.E.) – Civil Engineering
KPR Institute of Engineering C Technology, 2017–2021
CGPA: 8.42

Higher Secondary (HSC) – Maths Biology
PSGR Krishnammal HSS for Girls, 2016–2017
Percentage: 86%

Declaration

I hereby declare that the above information is true to the best of my knowledge.

Date: 17/09/2025
Place: Bengaluru
