SUMMARY

Frontend Developer with 4+ years of experience building scalable web and mobile applications using ReactJS, React Native, JavaScript (ES6+), and modern UI frameworks. Skilled in developing reusable components and architecting responsive, accessible interfaces optimised for performance. Experienced in state management (Redux, Context API, React Hooks) and integrating REST APIs to deliver seamless data-driven applications.

SKILLS

Languages & Frameworks: React Native, ReactJS, JavaScript, HTML5, CSS3, Redux, Redux-Saga, Context API, React-Router, Styled Components, Bootstrap, SASS/SCSS
UI & Architecture: Responsive Web Design, Performance Optimisation, Code Splitting, Lazy Loading
Tools & Platforms: Webpack, Babel, NPM, Git, Bitbucket, Jira, Postman, AWS, Agile (Scrum), Confluence
Code Quality: ESLint, Prettier, Unit Testing (Jest, React Testing Library)
Productivity: AI-assisted tools (ChatGPT, GitHub Copilot, Claude.ai)

EXPERIENCE

Software Engineer Sep '23 — Present
Blackhawk Network Private Limited Bengaluru, India

- Built and maintained scalable React Native application using Redux, improving maintainability and modularity.
- Developed reusable, responsive UI using React and built components in close collaboration with design teams, ensuring alignment with UX guidelines and accessibility standards.
- Optimized performance with lazy loading, code splitting, memoization, and efficient state management, reducing load times and improving responsiveness.
- Integrated RESTful APIs to enable seamless, real-time data flow across distributed applications.
- Enhanced cross-browser compatibility and mobile responsiveness, ensuring consistent user experiences across devices.
- Collaborated with backend engineers, QA, and product managers in Agile sprints, accelerating delivery of high-impact features.
- Improved developer efficiency by contributing to shared component libraries, CI/CD pipelines, and code review best practices.

System Engineer Jun '22 — Sep '23
Infosys Ltd. Bengaluru, India

- Developed frontend applications using ReactJS and React Native, integrating RESTful APIs authentication for secure access.
- Improved performance by 40% through dynamic imports, memoization, and debounce techniques, reducing re-renders and optimizing responsiveness.
- Built modular, reusable React components and optimized UIs with Chrome DevTools and React Profiler to ensure scalability and reliability.
- Collaborated with designers, QA, and Agile teams to deliver responsive, pixel-perfect, and user-centric interfaces on time with high quality.

Test Engineer Aug '21 — May '22
Mandovi Casting Pvt. Ltd. Goa, India

- Designed and executed manual and automated test cases for React Native and ReactJS UI components.
- Validated responsive designs across devices, ensuring stability and usability.
- Collaborated with developers in Agile workflows using Git, Jira, and Bitbucket.
