Software Engineer with 5 Years of Experience in C++ Software Development, specializing in Adaptive AUTOSAR and V2X Domains, and proficient in Agile methodologies.

WORK EXPERIENCE

Senior Software Engineer

KPIT Technologies (Bangalore)
09/2022 - Present

- 2.5 years of experience working in Adaptive AUTOSAR to develop automotive ECU software for a reputed Japanese automobile manufacturer.
- Led a team of 4 in the development of the EV Plug and Charge feature.
- Analyzed customer requirements, created an Open Points list, and actively participated in discussions to address customer queries.
- Developed and tested Adaptive AUTOSAR compliant C++ code using AUBIST SDK.
- I have extensive experience with Test-Driven Development (TDD), automated testing (including Gtest) and CI/CD practice (Jenkins, static code analysis). Also experienced in updating design documents (SRA/SDD).
- Supported the use case team in resolving blockers and clarifying doubts, ensuring smooth progress.
- Took initiatives to achieve Zero Defect Delivery for the product, improving product quality.
- Served as Scrum Master for the team, facilitating Agile processes and ensuring timely delivery.

Software Engineer

NE Technologies Inc (Goa)
12/2019 - 09/2022

- Working on Marben V2X Technology which aims to make road transportation safe and efficient
- Developed C++ language code to be used in embedded systems
- Intensive analysis of the customer requirements and implementing them with high code quality
- Adapted policies to make the product compliant to ASPICE standard
- Improved test coverage of the product and update test documents such as LLD, HLD, HLT and LLT

MY SKILLS

C++, AUTOSAR Adaptive, AUBIST SDK ,
MISRA C++, Python, UNIX/ Linux, HIL testing,
Modern C++, GITLAB, AGILE

CERTIFICATIONS

- C++ programming language course at Diksha Institute, Panjim
- Complete Modern C++(C++11/14/17) - Udemy
- C++ Standard Template Library in Practice
- Complete Python Bootcamp in Python 3 - Udemy

ACADEMIC PROJECTS

- **Key verification using image processing**
- The main aim of this project is to detect the errors in pattern of lever lock key by scanning it using the image processing techniques.

EDUCATION

- Bachelors of Engineering (ETC) - SRIEIT, Shiroda- Goa
