VIKASH KUMAR

: 8882807422 : Bangalore Email: vksanalyst@gmail.com LinkedIn: https://www.linkedin.com/in/vksyp222/

PROFESSIONAL SUMMARY:

Data Engineer with 4+ years of experience in designing and developing scalable data pipelines and ETL workflows using Python, SQL, and Azure Cloud. Hands-on expertise in automating data ingestion, transformation, and quality validation across heterogeneous systems (SQL Server, PostgreSQL, Snowflake, APIs, and flat files). Proficient in metadata-driven pipeline frameworks, SCD Type 2 data warehousing, and analytics enablement using Databricks and PySpark.

TECHNICAL SKILLS:

- **Languages & Scripting:** Python, SQL (T-SQL), Pandas
- **Databases:** Microsoft SQL Server, PostgreSQL, Snowflake
- **ETL & Data Processing:** Manual ETL using Python, JSON/XML parsing, stored procedures, window functions, CTEs
- **Data Modeling:** Star schema, Snowflake schema , SCD Type 2
- **Big Data & Cloud Tools:** Azure Data Factory, Azure Databricks, ADLS, PySpark
- **File Formats:** CSV, Excel (XLSX), JSON, flat files, Parquet file
- **Tools**: Jupyter Notebook, VS Code, Git, SSMS, pgAdmin
- **Soft Skills:** Analytical thinking, problem solving

PROFESSIONAL EXPERIENCE:

Data Engineer — XCALIBER INFOTECH PVT LTD (Hybrid)
Aug 2023 – Sep 2025

Revolutionized data integration strategies by designing a platform that aggregates data from diverse sources such as CSV, Excel, SQL Server, PostgreSQL, and Snowflake.

Championed the automation of KPI generation and visualization, significantly enhancing business user experience.

Pioneered the development of a configurable ETL automation framework, enabling seamless data import/export across various databases and file formats.

Implemented robust logging and schedule management features, ensuring efficient and reliable data processing operations.

Executive Systems SQL – METRO Cash & Carry
Feb 2023 – June 2023

Increased efficiency in SQL and SAP Database operations by developing automated scripts using Python. Enhanced data analysis capabilities, leading to improved business decision-making processes.

Software Engineer – SquareFeet Modular
Aug 2021 – Feb 2023

Optimized SQL Server databases, enhancing data retrieval speeds by 30%.
Streamlined Excel data processing tasks, reducing manual effort by 20 hours monthly.

ACADEMIC CREDENTIALS:

Bachelor of Technology in Electronics and Communication Engineering
BIET, West Bengal — 2014

PROJECTS

Project 1: Analytical Web-Based Dashboard Tool

Technologies: Python, Pandas, SQL Server, PostgreSQL, Snowflake, Excel/CSV

Built automated data pipelines integrating 5+ sources (CSV, SQL Server, PostgreSQL, Snowflake).
Designed parameterized stored procedures and window functions for dynamic KPI computation.
Delivered unified reporting dashboards used by business users to monitor performance

Project 2: Config-Driven ETL Automation & Scheduling Framework

Technologies: Python, Pandas, SQL Server, PostgreSQL, Snowflake, JSON, T-SQL, Stored Procedures

Engineered a metadata-based ETL framework supporting dynamic source-target mapping.
Introduced automated scheduling and logging modules improving reliability and traceability.

PROJECTS (Hands-on):

PySpark on Databricks

- Building distributed ETL pipelines using PySpark and Databricks notebooks
- Working with Spark DataFrames, Delta Lake tables, and cluster-based transformations
- Exploring cloud-based workflows and scheduling options
