Kubernetes

Certificates and Awards

- **AWS CERTIFIED SOLUTION ARCHITECT ASSOCIATE (SAA-C03)**
- Awarded As **"Star Performer Of The Year 2024-25"** by CRIF Solutions

Employment

Software Engineer (AWS Cloud Engineer) **Mar 2022 - Present**

CRIF, Pune, Maharashtra, India

- Driving operational excellence for a globally accessible applications on AWS, serving users in over 15+ countries.
- Responsible for the reliability and scalability of the infrastructure, including setup, service integrations, user management, monitoring, and troubleshooting.
- Automating tasks with shell scripting and Terraform to keep things running smoothly and efficiently.
- Developed and deployed cloud-based applications using AWS services such as EC2, S3, and RDS, enhancing system reliability and performance.
- Architected and implemented resilient AWS infrastructure solutions to support high availability and disaster recovery scenarios.
- Improved Optimum resource utilization, suggested and implemented Cost efficient strategies resulting cost reduction by around 20%.
- Led initiatives for adopting containerization technologies like Docker on AWS, advancing scalability and flexibility of deployment processes.
- Implemented robust monitoring solutions using Amazon CloudWatch, effectively alerting on performance metrics and system health.
- Spearheaded security best practices for AWS environments, including IAM policies and roles, security groups, and data encryption strategies.
- Designed and implemented automated backup strategies leveraging AWS services to ensure data integrity and availability in disaster recovery scenarios.
- Responsible for infra incident management along with user management service requests.

Technical support **Jan 2021 - Mar 2022**

Sindhsoft Technologies, Kolhapur

- Provided expert technical support for application workflow issues, ensuring optimal functionality and user experience.
- Monitored server performance and application health using AWS CloudWatch and Grafana, proactively addressing potential issues.
- Conducted in-depth analysis of application logs with tools like Kibana and CBS to diagnose and resolve technical challenges.
- Collaborated with cross-functional teams to improve system stability and reduce incident response times.

Franchise Owner **Nov 2014 - Nov 2020**

Chate Coaching Classes and Jr. College of Science, Kolhapur

- Drove business and academic success for a large team, managing finance and operations.
- Effectively responded to the unprecedented challenges faced by the education sector during the pandemic, ultimately leading to a strategic decision regarding the franchise in 2020.

Professional Experience

Project Name: BIF @ CRIF Solutions **Present**
Domain: Banking, Finance and Investments

1. BIF is CRIF Own product dealing with Banking, Finance and Investment Domain.
2. 96 Instances with different configuration spread over three environments.
3. Used Terraform to articulate infra enhancements and changes.
4. Used Shell Scripting to automate server software installations, integrations with environments and some extent of deployment process.
5. Used many AWS services to set up, enhance and troubleshoot infrastructure like VPC, EC2, Load Balancers, Auto Scaling, Route53, S3, Lambda etc.
6. Used other AWS security services like WAF, Security Groups, IAM and secure connection service from OpenVPN.
7. Also used AWS Monitoring service like Cloud watch, Cloud Trail and ELK as well other monitoring and alerts services like Grafana, Zabbix, Site 24*7 etc
8. Successfully experimented multiple Infra Cost Optimization tasks like precise server Configurations, business hours server running for UAT and INT environments, 7+ days logs storing to S3 with optimum defined lifecycle policies etc.
9. Worked on AWS RDS- MySql with dedicated DB team.

Project Name: Contact @CRIF Solutions **Present**
Domain: Finance and Business Processing

1. Contact is CRIF own product providing SaaS to GRAB Taxi and TONIK bank as a client.
2. Worked on standalone Nginx server as well as Docker containers for Deployment of the
Application.
3. Created multiple containers and also used DOCKER-COMPOSE client and created YAML scripts.
4. Deployed a Pipelines through Jenkins on SIT and STG environments and manual deployments for PRD environment.
5. Managed user access with IAM, created various groups, used various AWS policies for granular access. Also worked on creating roles to manage project specific tasks
6. Used Terraform to articulate infra enhancements and changes.
7. Used Shell Scripting to automate server software installations, integrations with environments and some extent of deployment process.
8. Successfully experimented multiple Infra Cost Optimization tasks like precise server Configurations, business hours server running for UAT and INT environments, 7+ days logs storing to S3 with optimum defined lifecycle policies etcs.
9. Used many AWS services to set up, enhance and troubleshoot infrastructure like VPC, EC2, Load Balancers, Auto Scaling, Route53, S3, Lambda etc.
10. Used other AWS security services like WAF, Security Groups, IAM and secure connection service from OpenVPN.
11. Also used AWS Monitoring service like Cloud watch, Cloud Trail and ELK as well other monitoring and alerts services like Grafana, Zabbix, Site 24*7 etc.

I have got chance to work on similar Projects like VIA, BRIQ and Margo which are also CRIF own products dealing with Banking and Finance domain.
