PROFESSIONAL EXPERIENCE

Quality Engineering Senior Analyst at Accenture 28-Oct-2021 - Present(4 Years)

Client : British Telecom | EE

- Developed cross-platform (Android & iOS) test automation scripts to validate key EE app features including Search functionality, Product Listing Pages (PLP), and Product Description Pages (PDP), achieving 90% test automation coverage.
- Worked on a Flutter-based application supporting both Android & iOS platforms. Utilized Proxyman & Charles Proxy for advanced manual testing by intercepting and mocking APIs, enabling validation of complex and edge-case scenarios across environments.
- Designed and maintained over 60+ regression test scripts from scratch, ensuring comprehensive test coverage and flexibility. Continuously refined and optimized scripts to align with evolving UI designs and improve efficiency with 85% reduced failure rate.
- Performed critical QA testing for a middleware system integration impacting EE app and web search functionality. Experience includes integration testing with a diverse range of e-commerce platforms such as Commerce Tools, SAP Hybris, Talon.One, multiple CMS platforms, and the Algolia search engine.
- Utilized tools like Kubernetes to verify API and service availability, ensuring Middleware stability during end-to-end validation.
- Leveraged Dynatrace for real-time performance monitoring and Kibana for log analysis, proactively identifying root causes for integration and search-related failures.
- Gained working knowledge of AWS EventBridge, SQS, and DocumentDB, which were part of the Search Middleware ecosystem supporting asynchronous event-driven workflows and data persistence.
- Conducted system validation adhering to Solution Documents, High-Level Designs (HLDs), and Low-Level Designs (LLDs), while proactively identifying design gaps and contributing improvement recommendations to strengthen overall architecture.

Client : British Telecom | Openreach

- Played a major role in optimizing the existing framework by modifying the entire utility package and enhancing it to support cross-browser testing, improving efficiency by 85% and achieving 95% automation coverage for the product.
- Automated more than 100 Test cases using Selenium with Java using Cucumber as a Framework with in 3 months time frame.
- Orchestrated Agile testing strategies, while fostering collaborative partnerships with client product & development team throughout different phases of SDLC and the Bug Life Cycle, receiving exceptional feedback from the client.
- Performed weekly/biweekly/monthly regression and sanity testing of application over web and desktop, logging in excess of 150 defects. Also, supervised QA Offshore team in testing with zero client escalations.

SKILLS

Automation Skills	Selenium, Java, Cucumber, TestNG, WebdriverIO, Appium, Python, SQL, Typescript, Page-Object Model, Extent Reports, CI/CD, Cross Platform Automation
Cloud Testing Platforms	Browser Stack, Headspin, Perfecto
Version Control Tools	Git, GitLab, GitHub, Source tree
Operating Systems	Windows, Mac OS, Android, iOS
AI Tools & Skills	Amazon Q and other LLMs, Experience using the capabilities of Agentic AI.
API Testing	REST, GraphQL – Using Postman, Swagger, Blazemeter.
Testing Skills	Middleware Testing, Functional Test Planning, Regression Testing, Sanity Testing, End to End Testing, Agile Testing, Exploratory Testing, Accessibility Testing, Smoke Testing, Test Estimation + Designing + Planning, Beta Testing

CERTIFICATION

Certified Test Automation Practitioner from the Full Stack Automation Engineering course provided by Accenture

AZ-900: Microsoft Azure Fundamentals

AWS: Certified Cloud Practitioner, Amazon Web Services Feb 2026

EDUCATION

B.Tech, Computer Science and Engineering, Vel Tech — CGPA: 8.75 | 06-07-2017 - 21-06-2021

XII, Sri Chaitanya Junior College — 96.3% | 02-06-2015 - 25-04-2017

X, Sri Chaitanya — CGPA: 9.80 | 12-06-2014 - 26-03-2015
