Profile Summary

Experienced Security Analyst with 5+ years of expertise in McAfee/Trellix ePO, ENS, Threat Prevention, Encryption, Application Control, and Data Loss Prevention. Skilled in L2 support, administering activities, DR testing, policy optimization, installation, and upgrades. Recognized for leading comprehensive training for junior team members and dedicated to continuous professional development in emerging technologies. Proficient in ensuring robust security measures and adept at identifying and addressing vulnerabilities. Committed to upholding the highest standards of data protection. Open to new opportunities in leveraging expertise to fortify organizational security infrastructure.

Work Experience

Analyst

Kennametal Shared Services Private Limited

04/2023 - Present

- Analyzed latest detection vulnerabilities, prepared reports, and provided insights to improve business strategies at Kennametal Shared Services.
- Collaborated with various departments to identify trends and areas for improvement, contributing significantly to informed decision-making.
- Conducted network vulnerability assessments using tools to evaluate attack vectors, identified system vulnerabilities, and developed remediation plans and security procedures.
- Performed routine social engineering tests and clean desk audits to ensure regulatory compliance and protection against potential threats.

- Investigated potential or actual security violations or incidents to identify issues and areas that require new security measures or policy changes.
- Created and fine-tuned DLP policies, installed and upgraded DLP agents, and monitored and troubleshooted DLP incidents.

Software Engineer

Grapple Info Solutions Private limited

07/2019 - 04/2023

- Managed the Antivirus server and ensured all systems were updated with the latest virus definitions and security policies, contributing to 100% compliance.
- Successfully remediated risk entries and potentially unwanted applications, documenting all incidents and resolving them within targeted timelines.
- Upgraded the AV server and clients to the latest releases, minimizing business operation disruption and enhancing system security.
- Conducted vulnerability assessments across IT systems and network devices, resulting in the identification and mitigation of potential security risks.
- Executed AV server and client upgrade activities, streamlined DLP policy creation and fine-tuning, facilitated seamless DLP agent installation and upgrade, and effectively monitored and troubleshooted DLP incidents.
