

DEEPAK PIPLANI

Test Manager

A seasoned QA Test Manager with a proven track record of 16 years. As an experienced Test Manager, I develop and implement comprehensive test strategies that ensure software meets the highest quality standards. I lead and mentor teams of QA professionals, fostering growth and delivering exceptional testing outcomes. Efficient resource management and well-prepared testing environments are key to meeting project timelines and objectives. I oversee all testing phases and ensuring thorough test coverage and managing the defect lifecycle to maintain open communication with development teams. Additionally, I collaborate closely with stakeholders to align testing activities with project requirements and continuously improve testing processes for enhanced efficiency.

PROFESSIONAL SUMMARY

- Seasoned QA/Test Manager with 16 years of experience in software testing and quality assurance, specializing in both Functional and Non-Functional Testing across Salesforce, SAP, ServiceNow and Web based apps, as well as AI/ML-powered applications.
- Proven expertise in leading end-to-end testing for complex enterprise platforms including Salesforce, SAP SuccessFactors, ServiceNow.
- Expert in the implementation and execution of a performance test framework for non-functional testing (load, volume, stress, capacity, and scalability) which validate business non-functional requirements.
- Managed performance & automation testing using Tricentis NeoLoad & TOSCA tool and simulating real-world scenarios to identify bottlenecks, optimize system performance, and ensure scalability post-migration.
- Leveraging HCL's AI Force tool for intelligent test case generation, with hands-on experience in AI-driven automation testing using tools like TestRigor and Mabl to enhance test efficiency, coverage, and accuracy.
- Proficient in a diverse array of testing tools, including Azure DevOps, JIRA, QC, NeoLoad, IBM RPT, TOSCA ,AppDynamics and Grafana.
- Skilled in gathering non-functional requirements (NFRs) and translating them into actionable performance test objectives.
- Led planning, design, and execution of comprehensive test plans and strategies, covering functional, regression, performance, and automation testing, while ensuring compliance with industry standards and project goals.
- Strong background in Agile/Scrum, actively contributing to continuous delivery cycles and cross-functional team collaboration. Domains covered include HRMS, Retail (ORPOS, SIM-EBS), e-commerce, Defined Benefits & Contributions, Insurance, and Telecom.
- Delivered detailed test progress reports, risk assessments, and quality metrics to stakeholders, promoting transparency and informed decision-making throughout the SDLC

TECHNICAL SKILLS

Functional & Mobile app Testing | Performance Testing | Azure Devops | Jira | Tricentis Neoload, IBM RPT, Jmeter , Postman

WORK EXPERIENCE

Test Manager

HCL Technologies (Noida) *(Aug 2010 - Present)*

Leading a team of testers to ensure quality and efficiency in all testing activities.

Supervised Functional & Non-Functional testing across various enterprises applications (Salesforce, SAP, ServiceNow , AI/ML & web apps).
Worked across multiple domains, including HRMS, e-commerce, retail, Insurance, Health & Benefit etc. Salesforce CRM, SAP SuccessFactors & UKG WFM implementations, clients based in the USA and Europe.
Guidance, mentorship, and support throughout the testing lifecycle.
Monitoring and tracking testing progress ensuring adherence to project timelines and milestones.
Designed and implemented test plans and strategies for functional and non-functional testing.
Conducted regular defect triage meetings to review issues, allocate resources, and track resolution progress.
Designed & developed performance test scripts and scenarios and executed tests to identify bottlenecks and issues.
Communicated findings to stakeholders, and prepared detailed test summary reports with walkthroughs for all key stakeholders.

Sr. Software Engineer

Infogain Pvt. Ltd (Noida) *(Feb 2010 - Aug 2010)*

Sr. Test Engineer

Mercer India Pvt. Ltd (Gurgaon) *(Oct 2008 - Feb 2010)*

Associate QA

Sapient (Gurgaon) *(Dec 2006 - Oct 2008)*

EDUCATION

Bachelor of Engineering (B.E)
M.D. University Rohtak, Haryana

CERTIFICATIONS

- **Tricentis NeoLoad Product Consultant Certification** (2024)
- **Tricentis NeoLoad Fundamental** (2023)

- **Tosca Fundamentals(AS1 & AS2)** (2018)
- **ISTQB Foundation Level** (2011)
- **Financial Market & Mutual Fund certification** (2008)

ACHIEVEMENTS

- Successfully oversaw and coordinated the testing activities for multiple enterprise applications, leading to a 20% reduction in critical defects post-launch.
- Enhanced the testing process resulting in a 15% reduction in test cycle time.
- Improved defect resolution times by 25% by optimizing the defect triage process.

PROJECTS

SAP SuccessFactors(Implementation)
Taking care of testing initiatives for the implementation of SAP SuccessFactors, transitioning from legacy H2R web-based applications to a unified platform.
Led the testing of modules including Demand, Onboarding, Recruitment, Reporting and Employee Central Payroll ensuring seamless functionality and data integrity.
Managed manual, performance & automation testing efforts to validate system reliability, scalability, and compliance with business requirements.
Defined and executed comprehensive test strategies, including manual, performance and automation testing, leveraging tools like Tricentis Tosca & NeoLoad, Azure DevOps
Coordinated end-to-end integration testing with downstream & upstream applications including third-party applications like Kalido ensuring flawless interoperability across systems.
Collaborated with cross-functional teams and stakeholders to align testing deliverables with project goals.

Excalibur – Salesforce CRM
Excalibur is HCL's enterprise CRM solution developed on the Salesforce Sales Cloud platform to enable end-to-end pipeline and sales management. The platform supports streamlined handling of leads, accounts, contacts, contracts, and opportunities, enabling faster and more efficient sales operations using Salesforce Lightning features. Key modules included Opportunity and Pipeline Management, Account & Contact Management, Lead Management, and Executive-level Reports & Dashboards. As a Test Manager, I was responsible for defining the test strategy, managing end-to-end testing activities across modules, and ensuring timely delivery of high-quality deliverables. I worked closely with EY consultants to align testing efforts with business expectations and validate end-user workflows.

HCL ONE Connect-ServiceNow Implementation – ITSM Transformation
Led the end-to-end testing for ServiceNow implementation replacing legacy ITSM applications. Ensured successful migration and validation of Incident, Change, and Problem Management modules. Defined test strategy, coordinated SIT & UAT cycles, tracked defects, and ensured alignment with business requirements. Worked closely with stakeholders to validate integration touchpoints and data consistency between legacy and ServiceNow systems.

TCoE(EDS BU)
I am responsible for overseeing and coordinating testing activities for multiples H2R (HRMS) & O2C, ITSM, SAP and Non-SAP enterprise applications. This includes Performance, Manual & Automation testing efforts across various projects within the TCoE, collaborate closely with stakeholders to understand project requirements, provide testing estimations, and ensure effective test planning and execution, I lead a team of testers, providing guidance, mentorship, and support throughout the testing lifecycle. Monitor and track testing progress ensuring adherence to project timelines and milestones.

E-commerce Platform Enhancement & Migration – J.CREW, USA
J.CREW, a leading fashion retailer in the USA, aimed to enhance their e-commerce platform by migrating from a monolithic architecture to a microservices-based system. The project involved end-to-end testing of the new platform to ensure seamless user experience, secure payment processing, and high-performance scalability during peak shopping seasons.

ORPOS Integration for Sunrider International (Hongkong)
At Infogain, we assisted SUNRIDER in Integrating their Store Inventory Management (SIM) & Oracle retail store solution (ORSS) with the Enterprise business suite (EBS) using Oracle SOA. EBS served as the master system, housing all the essential master data, which then seamlessly flowed into SIM and ORSS for efficient operations and data management.

Prudential Annuity (DC&DB)
Prudential capitalizes on unique combination of life insurance and investment management expertise to provide compel-ling asset growth and protection solutions for the ever-increasing retirement needs of individuals and businesses. The Annuity project creates new Retirement Income functionality that will support both the core Annuity infrastructure and Prudential as the first Annuity vendor to enter a relationship with Mercer utilizing this new platform. A feature of the core Annuity infrastructure will be transmissions of participant-level data from Mercer to an Annuity vendor.

SKILLS

Core Competencies: Team Management, Cross Functional Collaboration, Reporting, Stakeholder Communication
