Profile

I am a DevOps Engineer with 4 years of experience in Automation, Designing and Implementing software services across various development lifecycles. I have successfully led projects in both AWS and Azure cloud platforms and on-premises environments.

Experience

MARCH 2025 - PRESENT

ALVARIA

DevOps Engineer | BANGALORE

- Manage **AWS infrastructure and Amazon Services** for all engineering environments.
- Worked on **AWS Core** services **Amazon EC2, Amazon S3, Amazon ECS/EKS** – cluster-based deployments.
- **Cluster Teardown / Cost Optimization.**
- Programming experience in **TypeScript** and **Python** Programming languages.
- Worked with **AWS technologies** primarily: **Lambda, API Gateways, CodeBuild, Code Pipelines, CloudFront Stacks, S3, WAF, DynamoDB, IAM Roles**.
- Experience working in **Agile development** organizations.
- Demonstrated experience in **CDK/CloudFormation**, **GitHub Source Control** and **GitHub Actions**.

OCTOBER 2021- FEBRUARY 2025

SIEMENS

Software Developer | BANGALORE

- **Microsoft Azure DevOps, Git, GitLab, GitHub, Siemens Mindsphere** and other version control tools.
- Creating **CI/CD Pipelines** for various projects in different build environments
- Scripts to automate tasks with **Python and PowerShell**.
- Automation using **Ansible Tool** for both Windows and Linux.
- Containerizing Tools: **Docker, Kubernetes**.
- **BootStrapper** for bundling the products (MSI).
- Artifactory/Deployment Tools: **JFrog Artifactory, Jenkins, Azure DevOps**.
- Cloud: **VMware (Linux + Windows), Sie Cloud, Google Cloud, WSL systems**.
- Scripting languages: **PowerShell, Bash, Perl, Python**.
- Code Quality Analysis Tool: **SonarQube.**

Education

AUGUST 2017 – AUGUST 2021

BACHELOR OF ENGINEERING

ANJUMAN INSTITUTE OF TECHNOLOGY AND MANAGEMENT, BHATKAL.
(VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGUAM)
Computer Science Engineering, CGPA - 9.32 /10

JUNE 2016 – MAY 2017

XII GRADE

ANJUMAN PRE UNIVERSITY COLLEGE FOR WOMEN, BHATKAL.
Science, 86%

JUNE 2014 – MARCH 2015

X GRADE

ANJUMAN GIRLS HIGH SCHOOL, BHATKAL.
SSLC, 84%

PROFESSIONAL CERTIFICATIONS

- Oracle Certified: OCI Associate
- AWS Certification
- Microsoft Certified: SC-900
- Microsoft Certified: AZ-900
- Google Cloud: Core Infrastructure
- Google Cloud: Build and Optimize Data Warehouses with BigQuery
- CompTIA Network+
- Azure: Virtual Machine and Web Server Deployment
- Google: Python Programming Certification
- SIEMENS: Process Control Engineering

PROJECTS

- **DevOps-Infrastructure Automation using Ansible Tool**
    1. Ansible Tool is used for Infrastructure Automation of the hardware, software, Access information and other miscellaneous information.
    2. It acts as one DevOps environment approach to keep all the machines in the infrastructure with the same version of business applications/ software/tools and no discrepancies between the machines used in the infra.
    3. Achieved: As part of the Auditing measure, it must keep the details (hardware, software, Access info) about the infrastructure updated in an excel sheet with 100% right information so that manual error prone activities can be avoided.

- **Dockerizing the SICAM PAS Build via Azure DevOps Pipeline (Docker)**
    1. The result of the docker based Azure DevOps pipeline should be as equivalent to the SICAM Azure DevOps pipeline build. It should be able to build the SICAM project components, and no configuration should be done either manually or via Azure DevOps pipeline in the machine where the Docker image is running (Zero Dependency).

- **Contributed to many SIEMENS projects (SICAM PAS, DIGSI, POWERMANAGER, SITIPE, TIAP, SYSCON, SIMARIS etc.).**

- Built Travelling Wave and SIMARIS Control project from scratch using **WiX Toolset.**

- **Automation** of DIGSI and Powermanager project using **Python and PowerShell scripting (CI/CD)**

- **Workforce Management Platform (WFX) – Cloud Infrastructure and Automation** using automated **AWS CDK** deployments for multiple environments and managed **ECS/ EKS clusters** for microservices.

SOFTWARE & SKILLS

- Scripting: **Bash, PowerShell, Python, Perl**.
- Languages: **C++, Python, TypeScript.**
- Cloud Technologies: **AWS (CDK, ECS, ECR, Lambda, CloudFormation, S3, IAM, CodeArtifact), Microsoft Azure**.
- Containerizing Tools: **Docker, Kubernetes**.
- Automation Tool: **Ansible (Linux, Windows using WinRM).**
- CQ Analysis Tool: **SonarQube.**
- Version Control System Tools: **Git, GitHub, GitLab, Azure Repos, Siemens Mindsphere.**
- Artifactory: **JFrog, Azure DevOps, Jenkins, Amazon Web Services.**
- **CI/ CD Pipelines, AWS CodePipelines,** Azure DevOps Services, Agile Practices.
- **WiX Toolset** (Windows Installer) and **BootStrapper.**
- Deployment Packages: **NuGet, Conan, NPM, Docker, AWS CodeArtifact**.
- Continuous Integration: **GitLab YAML, Azure DevOps YAML/ vNext, XAML.**
- Monitoring and Optimization: **AWS Resource Explorer** (cost & resource cleanup).
