Email: kachamsanthosh442@gmail.com
LinkedIn: www.linkedin.com/in/santhosh-kacham-90453723b

Objective:

To be in a position in a result-oriented company that seeks an ambitious and career conscious where acquired knowledge and skills gained during my professional experience will be utilized towards continuous growth and development of the organization

Professional Experience:

- Overall, 7 years of Experience in IT industry with expertise in C/C++ and SQL.
- Participated in various projects at various stages from conception to implementation and maintenance.
- Hands-on experience in OOPs concepts and its applications and implementing the OOPS concepts like Abstraction, Inheritance, Compile Time/Run-Time Polymorphisms
- Good exposure to version control tools like Git, SVN.
- Have knowledge of Banking & Finance domains.
- Software/Application development, Support and related operations.

Organizations:

- TechMahindra from July 2018 to Auguest2019
- BeesSoft solutions (Oct 2019 – March 2021).
- Empower (June 2021 – Sep 2025)
- Designation: Software Engineer.

Tools & Technology:

- Programming Languages: C, Pro*C, C++(V14), SQL and Linux, Unix, Oracle PLSQL, JAVA Spring batch, Multithreading, threading, synchronization, STL RAII, data structure, standard library, smart pointers, move semantics
- Software Development Tools: Git, GitHub, SVN, Putty, Cygwin, ORACLE.
- Database: Oracle 12C.
- Platforms: Windows, LINUX, UNIX.

Educational Qualification:

- Completed B-Tech (ECE) from JNTU Hyderabad in 2016 with 70.90%.
- Inter from Geethanjali Junior College 2012 with 70.1%.
- SSC from Board of Secondary Education Srivani Vidayalayam High School 2010 with 79%.

Professional Experience:

Project 1#:

- Company: **Empower**

- Project: Money Out (DDRV).
- Technologies C, C++, Pro*C, Oracle SQL, Perl

Project Description:

Money for retirement time, tax savings. They are opening the retirement account So, the Empower will keeping the record / transaction data whatever the business flow happening in the retirement flow. We just keep the records for entire flow. That what empower is doing. We don't to pay any tax for that particular portion of our salary. Focus areas or business terms. PPTS || Beneficiary || Alternative payee PPTS nothing but owner of the plan or employee of US organization. Employer has provided the plans to PPTS we can choose n number of plans provide by it. And we can choose that plan to invest into that retirement account.

DDRV is a disbursement drivers process/rebuild. Through autosys, PERL controls script run and monitor the entire jobs, DDRV processes/rebuilds disbursements. And will finish only after all DDRV in BATCH jobs have completed successfully.

Each job stream processes or rebuilds the disbursements that correspond to its stream number and select_type, depending on the job type (see below). Individuals are selected for processing by a particular stream by taking the

mod(ind_id,total_streams) + 1 and checking that number against the stream number.

Project 2#:

- Company: **Empower**
- Project: Money Out (TX99).
- Technologies C, Pro*C, Oracle PLSQL, Perl

Project Description:

The Money Out (TX99) project is part of Empower's retirement services domain, focusing on processing withdrawals, disbursements, and tax updates for participant transactions across all U.S. states and the IRS/Federal level. The primary objective was to enhance the accuracy and automation of tax calculations during disbursement processing through the EASY and CSAS applications.

Roles & Responsibilities:

- Designed and implemented automation to eliminate hardcoded tax calculation logic within C and Pro*C modules.
- Developed a new PL/SQL stored procedure to dynamically compute and update both state and federal tax rates.
- Enhanced system flexibility and maintainability by centralizing tax rate logic in the database layer.
- Integrated and tested new components within existing Perl and Autosys job streams to ensure seamless batch execution.
- Performed code optimization and database query tuning to improve processing efficiency and reduce runtime.
- Collaborated with business analysts to validate tax rules and ensure compliance with IRS and state-level requirements.
- Participated in end-to-end testing, debugging, and deployment activities across multiple environments (DEV, UAT, PROD).

Key Achievements:

- Reduced manual effort and errors in tax updates by automating tax processing logic.
- Improved maintainability and scalability of the system for future tax changes.
- Achieved faster turnaround in state and federal tax updates during Money Out disbursement processing.

Project 3#:

- Company: **Bess Software Solutions Pvt.Ltd**
- Project Name: BMCL (Batch message clearance).
- Technologies C, C++, Pro*C, Oracle SQL

Project Description:

This process will delete old messages in batch msg and batch msg receiver tables and/or close messages in batch msg. A series of actions will be done based on the age of the messages and whether or not the messages have been cleared. Whatever the messages logged from different modules that can be cleared by using this module.

Autosys Job Description: This job will be scheduled from autosys in daily each bus_cal WORK day. This process will delete old messages, A series of actions will be done based on the age of the messages and whether or not the messages have been cleared.

Roles & Responsibilities:

- Analysis of the Specifications provided by the clients.
- Involved in meeting with functional team to understand the functional specification documents.
- Debugging and finding errors.
- Involved in the bug fixes as well as enhancements to the existing project.
- Developing the application and do the unit testing.
- Involved in the bug fixes as well as enhancements to the existing project.
- Understanding the design requirements specification algorithms.

DECLARATION

The above said information are true to the best of my knowledge, and hope this will be a brief reference for you to give me an opportunity to prove myself to serve your well-directed needs.
