Sandip Kumar Sethy

MERN STACK Developer

- Senior Software Engineer
- Almost 7 years of experience
- Leetcode : https://leetcode.com/u/sandip_96/
- GitHub : https://github.com/sandipkumar96

TECHNICAL SKILLS

Backend : NodeJS, ExpressJs, Javascript, Typescript
Frontend : ReactJS, NextJS, JQuery, HTML, CSS, Bootstrap
Database : MySQL, MongoDB
ORM Tools : Sequelize, Mongoose, Eloquent
Tools/Platforms : JIRA, Confluence,GitHub, Bitbucket,SonarQube, Postman
Others : Apache Kafka, RESTful APIs, ElasticSearch, Agile/Scrum, MVC Architecture, MicroService

CAREER HIGHLIGHTS

- Integration of RESTful APIs using ExpressJs, MongoDB, MySQL
- Real-time data handling using Apache Kafka in my current project.
- Reduced page load time by 30% through lazy loading and react performance optimizations in my last company
- Cut down bug rates by 15%
- Experienced in both Product and service-based environments with strong knowledge of Agile methodologies using JIRA and Confluence.
- Experienced in implementing and optimizing ElasticSearch for analytics.
- Mentored 3+ junior developers, improving code quality by reviewing and refactoring.

WORK EXPERIENCE

Happiestminds Technologies Pvt. Ltd. | Cinepolis **Mar 2023 – Present**

Currently working for Cinepolis Data Management System to design and develop a centralized platform to manage all data related to **F&B, movies, and ticketing** for Cinepolis operations in the Mexico region.

- Enabled **admin-level CRUD operations** (Create, Read, Update, Delete) for all data types through a secure web interface.
- Implemented **data streaming via Apache Kafka** and **REST APIs** to ensure real-time synchronization between backend and frontend systems.
- Analyzed requirements, estimated effort and collaborated with PMs, designers, QA and devOps to turn business needs into scalable technical solutions.
- Technical Stack : NodeJS, ExpressJS, ReactJs, MySQL, Apache Kafka, REST API,AWS Basics

MUVI Entertainment Pvt. Ltd. | MUVI **Nov 2020 – Feb 2023**

A white-label OTT platform that enables users to launch multi-device streaming services with centralized control via a unified CMS. The platform supports content delivery across web, mobile, and smart TVs, with features like CDN integration**,** DRM protection, and multiple monetization models (SVOD, AVOD, TVOD) to ensure secure and scalable video distribution.

- Integrated third services such as ElasticSearch, payment gateways and RESTful APIs
- Estimated user stories and delivered enhancements requests(ERs) with deadlines.
- Involved in requirement analysis, planning, SOP prepare and given demos to customer support team.
- Reviewed code, identified issues through debugging and implemented effective fixes.
- Technical Stack : NodeJs, ExpressJS, ReactJS, ElasticSearch, MySQL, MongoDB, GitLab

Adiwebtech Solutions Pvt. Ltd. **Aug 2018 – Oct 2020**

Worked on multiple projects including a **School Management System** to track daily student activities (homework, exams, admissions, messages, notifications) and manage teacher workflows (assign homework, review exams, manage salaries, send communications). Also contributed to an **eCommerce platform** supporting product browsing, shopping cart management, payment processing, and order tracking.

- Analyzed client requirements, planned implementation, and ensured timely delivery
- Estimated pull requests (PRs), planned code structure, and maintained technical documentation.
- Technical Stack : NodeJs, ExpressJS, MySQL, ReactJs, HTML, CSS, BootStrap, GitLab
