SWARNALATA DAS

Embeded C++ Developer

Bangalore, Karnataka | 8792746719
visionstride14@gmail.com

Embedded Software Engineer with 4+ years of experience in C++ development for Linux-based systems in Automotive and Consumer Electronics. Skilled in multithreading, STL, modern C++ standards (C++11/14/17), OOP, and memory management. Experienced in designing, developing, and maintaining firmware in Agile environments. Focused on building efficient, reliable, and easy-to-maintain software for complex embedded systems.

Professional Experience

Sr. Software Developer

GlobalLogic India Pvt Ltd, Bangalore, Karnatak *January 2025 - August 2025*

- Developed and enhanced features for a proprietary Smart TV OS on **Embedded Linux**, including media playback, voice assistant integration, and third-party app support.
- Utilized **STL containers and algorithms** for efficient data management and processing.
- Applied modern **C++ practices** such as smart pointers (unique_ptr, shared_ptr), move semantics, and RAII for improved memory safety and performance.
- Implemented **multithreading** with thread creation, synchronization, and mutexes to ensure safe concurrent execution.
- Conducted **root cause analysis (RCA)** on system issues using application and kernel logs, reducing recurring production failures.
- Managed **build and release processes** with CMake and Make in an **Agile/Scrum** environment integrated with CI/CD pipelines.
- Added **performance hooks** for benchmarking and stress testing critical modules.
- Achieved **100% unit test coverage** for key modules, improving software reliability and minimizing regressions.

Software Developer

Sasken Technologies Ltd, Bangalore, Karnatak *December 2023 - October 2024*

● Responsible to develop variety of Functionalities, new features and enhancements for instrumental Cluster.

● Support of engineering changes and tasks.

● Involving in Software release process.

Involved in Fixing implementation related issues

Software Developer

ACTEVIA TECHNOLOGY SERVICES PRIVATE LIMITED, Bangalore, Karnatak *January 2023 - November 2023*

- Fixed **internal testing bugs** and ensured software stability.
- Worked on **HMI framework development** and gained hands-on experience.
- Added **new features** and made minor modifications to existing programs.
- Strong knowledge of **Embedded C++ (C++11, C++14,)** and modern C++ practices.
- Experienced in **Adaptive AUTOSAR** for Instrument Cluster development on Vector Stack Board 8295.
- Implemented **software components** using proxies and skeletons as per SRD requirements.
- Developed and integrated **business logic** according to functional requirements.

- Verified code functionality and features through **CANoe simulation**.
- Familiar with **software-defined vehicle development** and enabling autonomous driving features through Adaptive AUTOSAR.

S1
ICICI BANK LIMITED, Hyderabad, Telangana *July 2019 - December 2021*

Key Skills

- **C++**
- **Embeded**
- **C Programming**
- **DataStructure**
- **GIT**
- **JIRA**
- **Linux**
- **OOPs**
- **Multithreading**
- **STL**
- **Smartpointer**
- **VisualStudio**
