Kalyan Vishal
E-Mail: vishalkalyan434@gmail.com **Phone:** +91-8125451260

7+ years experience in Selenium, Cyrpess, Playwright Automation & Manual Testing. Worked in Manufacture, Health Care, Insurance Domains with an organizations of high repute –**WIPRO, COGNIZANT & ABOVEO**

PROFILE SUMMARY

- **6+ years** of experience in **Selenium Automation, Protractor, Cyprees, Playwright & Manual Testing**. Good working experience with **C#.Net, Core Java, OOPS concepts, JavaScript, Typescript.**
- Experience in testing with extensive knowledge of **Automation Framework Design & Implementation using Selenium, Cyrpess, Playwright tools.**
- Experience in **Functional, Regression** and **System** testing using **Manual** and **Automated testing tools - selenium WebDriver, Cypress, Playwright.**
- Extensive working experience on all phases of Software Development Life Cycle (SDLC), its methodologies such as **Agile, SCRUM** and Waterfall Model
- Sound experience on **Cucumber, TestNG framework, Mocha, Maven** for Project building tool**, Jenkins** for **Continuous Integration.**
- Extensive experience in reviewing and analyzing **Business Requirements** and involved **Test Plans and creating Test Cases**, **Test Scripts, Test Estimation**, **Requirement Traceability Matrix**, **Daily Status Report**, **Test Closure Report**
- Good experience on Object Oriented Programming (OOP) concepts. Extensively used Java for test case automation.
- Experience in implementing **TDD** using **Page Object model** and **BDD** using **Cucumber.**
- Used test case and bug management and reporting tools - **JIRA, Quality Center(ALM).**
- Involved in Functional Testing, Regression Testing, Smoke Testing, Sanity Testing.
- Experience in writing down & Execution of Integration, Functional, System Test Cases.
- Ability to write down **SQL Queries** in order to test the **Back-end functionality of the Application.**

TECHNICAL EXPERTISE

Testing Tools	Selenium WebDriver, Cypress, Playwright, TestNG, Jira, Mocha
Languages	Core Java, C#.Net, Java Script, Type Script
Web Technologies	HTML, XML
IDE Applications	Eclipse, IntelliJ idea, Visual Studio Code
Test Framework	TestNG, Data Driven Framework, Cucumber, Specflow
Web Debugging Tool	Firepath, Firebug, Chropath, Xpath checker
Build Tool	Maven, Gradle
Processes	Agile-Scrum
Bug Tracking Tools	JIRA, Quality Center (ALM)
Continuous Integration Tools(CI Tool)	Jenkins, Azure Devops
Version Control	GitHub, Bitbucket
Data Bases	Oracle, Sql Server, My SQL
Operating Systems	Windows 10, Unix

PROFESSIONAL GROWTHPATH

Wipro, Hyderabad **(May 2020 – Apr 2025)**
Software Test Engineer

Cognizant, Hyderabad **(Jun 2018 – Apr 2020)**
Test Consultant

ABOVEO services pvt limited **(Jan 2018 - Jun 2018)**
Test Engineer

PROJECTS EXECUTED

Title: TEXAS
Client: VOLVO
Period: **May 2020 – Apr 2025**

Roles and Responsibility:

- Working with all stake holders to ensure that the quality metrics is reviewed, closed and agreed upon.
- Created a list of milestones and checkpoints and set measurable criteria to check the quality on timely basis.
- Worked on the regression suite with **Playwright in javascript** using Cucumber Framework.
- Designed the test automation framework using **Playwright**
- Developed automations scripts on daily basis
- Integrated CI/CD set up with **Jenkins**
- Involved in release management with stakeholders ensured product is released with good quality
- Performed API automation testing usin **Playwright to test the functionality of REST APIs**
- Compared UI and API results by doing Database testing.
- Ensured all development tasks meet quality criteria through test planning, test execution, quality assurance and issue tracking.
- Ensured the team is focusing on automation along with manual testing.
- Sent status reports for team managers and taking appropriate actions accordingly.
- Understanding and Analysing Test Requirements in JIRA
- Inspecting Elements, Create Test Cases using Element locators and **Playwright in JavaScript** using Jasmine framework.
- Creating reusable components.
- Finding solutions for Object Identification issues and error handling issues.

Title: PATIENT INSPECT
Client: LILLY, USA
Period: **Jun 2018 – Apr 2020**
Description: A Project that is used to issue, amend and Claim“Guarantee” for a trade between Importer and Exporter

Roles and Responsibility:

- Created POCs for automation technical feasibility for test scenarios and test cases and for choice for the appropriate test automation tool.
- Designed automation framework using POM design pattern with BDD approach using Cucumber and Gherkin using **Cypress With Javascript**
- Developed automation test scripts on daily basis using Visual Studio Code IDE.
- Used **Cypress and JavaScript** Programming language to develop the automation test scripts.
- Identifying the angular based locators for recognizing the UI elements
- Utilized jasmine java script test framework to organize test suites and test scenarios
- Worked with SCM tool GitHub for source code management purpose on daily basis.
- For CI/CD set up created pipelines using **Jenkins** for regression, smoke test suites.
- Configure Jenkins pipelines to send email notifications for the generated test reports to all stake holders
- Implemented generic components (JDBC Connection,Browser Actions), Assertion Library, Extent Report, Log4j and application specific components as a part of reusable libraries
- Maintained test data and object repository very well so that if any changes happens on GUI only at central location update is required.
- Co-ordinating Test team members and Development team in order to resolve the issues regarding defects, user story understanding.
- Reviewed test automation scripts prepared by fellow testers
- **Cypress and POSTMAN** tools to test REST API services testing.

Title: Waitrose
Client: Waitrose , UK
Period: **Jan 2018 - Jun 2018**
Description: This project basically helps the customers across the UK for purchasing alcoholic goods.

Roles and Responsibility:

- Created POCs for automation technical feasibility for test scenarios and test cases and for choice for the appropriate test automation tool.
- Designed automation framework using POM design pattern with BDD approach using Cucumber and Gherkin using **Selenium with Java**
- Developed automation test scripts on daily basis using **Eclipse IDE**.
- Used **Java** Programming language to develop the automation test scripts.
- Identifying the angular based locators for recognizing the UI elements
- Utilized jasmine java script test framework to organize test suites and test scenarios
- Worked with SCM tool GitHub for source code management purpose on daily basis.
- For CI/CD set up created pipelines using **Jenkins** for regression, smoke test suites.
- Configure Jenkins pipelines to send email notifications for the generated test reports to all stake holders
- Implemented generic components (JDBC Connection,Browser Actions), Assertion Library, Extent Report, Log4j and application specific components as a part of reusable libraries
- Maintained test data and object repository very well so that if any changes happens on GUI only at central location update is required.
- Co-ordinating Test team members and Development team in order to resolve the issues regarding defects, user story understanding.
- Reviewed test automation scripts prepared by fellow testers
- **Selenium and POSTMAN** tools to test REST API services testing.

ACADEMIC DETAILS

BTech(ECE) from JNTU Hyderabad - 2017.
