JAINISH GUPTA

Software Developer

- **Mobile:** +91 80000 71238
- **Email:** jainishgupta2000@gmail.com
- **Location:** Mumbai, Maharashtra, India

MY JOURNEY IN CODE

An enthusiastic software developer with expertise in Node.js and MongoDB, specializing in robust backend architecture. Also proficient in game development using Unity 3D and C#. Demonstrated success in leading projects, designing resilient systems, and delivering impactful software solutions. Possesses a curious, collaborative, and results-oriented approach to creating sustainable solutions.

MY DIGITAL TOOLKIT

- **Languages:** C#, JavaScript (Node.js)
- **Data:** MongoDB (schema, optimization, data flow)
- **Game Alchemy:** Unity 3D (2D/3D), Simulation Weaver (training/operational simulations), Level Genesis (dynamic levels)
- **Backend Architecture:** API Artisan (RESTful APIs), System Architect (scalable, secure, future-proof)
- **My Process:** Git (collaborative), Agile/Scrum (iterative, flexible), Team Synergy (collaboration)

MY ODYSSEY THROUGH PROJECTS

Co-Founder & CTO | Trustopay Innovations Pvt. Ltd. (Fintech Startup) | Feb 2024 - Present

As CTO at Trustopay, I led the technological vision and execution, building a robust, secure, and scalable fintech platform. I spearheaded the architecture and development of our core financial operations backend, ensuring seamless and secure transactions. My responsibilities included comprehensive MongoDB lifecycle management, optimizing performance and data integrity. I fostered strong collaboration with cross-functional teams, translating business objectives into innovative technological solutions that drove the company's growth and competitive edge.

Game Developer | Coincade Studio (under Hind Rectifiers Pvt. Ltd.) | Aug 2023 - Aug 2024

At Coincade, I contributed to game development, creating "Racecade," a 2D blockchain game with an in-game inventory. I used Node.js and MongoDB for the backend. My work included dynamic car selection, optimized spawning, procedural level generation, editor scripting for level creation, and refining game mechanics for immersion.

Junior Game Developer | Tecknotrove Pvt. Ltd | November 2022 - July 2023

Developed high-fidelity industrial training simulations using Unity 3D, Node.js, and MongoDB, including a drill simulator for Tata Steel and JSW Steel. Enhanced user interactions and immersion in driving simulators by integrating input devices like Logitech G29/G27 and implementing real-time communication via WebSockets. Collaborated with diverse teams to deliver tailored solutions, significantly improving training efficacy and reducing operational costs.

Game Developer Trainee | AAC Studio | July 2022 - November 2022

This role honed my skills in hypercasual game development and 3D mechanics. I contributed to three hypercasual mobile games: "Runner Pusher 3D," "Perfect Hit 3D," and "Money Run Water 3D," each hitting over 100k+ installs, developing unique features and ensuring fluid interactions.

Co-Founder & CTO | Find and Analyze Pvt. Ltd. | Oct 2020 - August 2022

As a co-founder, I led the technology of an educational startup, driving the development of our Node.js backend and Flutter-based mobile application. I was central to the concept, launch, and evolution of "Class and Class," an app connecting learners with classes, scaling it to over 500+ classes. I managed and mentored a team of four developers, overseeing all technical aspects from design to deployment, gaining entrepreneurial insights.

MY ACADEMIC LANDMARKS

Bachelor of Engineering | Government College, Dahod | July 2018 - August 2022

Graduated with Distinction.

Higher Secondary Certificate | L.P.S High School , Surat, Gujarat | July 2016 - July 2018

Achieved a Distinction rank.
