# RESUME

## MD AGHAZ ALAM

**C++ Developer | Software Engineer**

**Contact No: +91-7070255768**

**Email Id-aghaz.alam1@gmail.com**
**Alternate Id:**
**aghazalam9@gmail.com**

### TECHNICAL SKILLS:

- Programming Language: **C++, C, Data Structure, Shell Scripting, Python (Basics), HTML and CSS.**
- Operating System: **Windows/Linux**
- Tools & IDEs**: Visual Studio, CANoe, ECU Test Tool, Unity, RTC, Confluence.**
- Version Control**: Git, GitLab**
- Database**: MySQL**
- Automotive Protocols: **SOME/IP, Ethernet, CAN, IPC.**
- Methodologies: **Agile (Scrum), SDLC**

### SUMMERY:

- C++ Developer with around **5 years of hands-on experience** in designing and optimizing high-performance software.
- Skilled in **OOPs, modern C++ (C++11/14/17), multithreading, debugging, and memory management**.
- Hands-on experience with **Linux commands, shell scripting**, and **basic SQL queries** for system operations and data handling.
- Well-versed in the **software development lifecycle (SDLC)**, **version control (Git)**, and **Agile methodologies** for collaborative project delivery.
- Committed to writing **clean, maintainable code** and continuously enhancing skills in **system-level and performance-critical development**.

## PROFESSIONAL EXPERIENCE

- **Working** in **KPIT Technologies Pvt Ltd** from **13-Jul-2022 to Till Date.**
- **Worked** in **DCM Infotech Pvt Ltd** from **18-Sep-2020 to 23-May-2022**

## INDUSTRY EXPERIENCE

**KPIT Technologies Pvt. Ltd. Bangalore** **Jan 2024 to Preset**

- **Project : Instrument Cluster System**
- Domain: Automotive Applications | Language/Technology: **C++11/14/17**, **STL**, **Multithreading**, CSS, HTML, ARXML.
- Designed and developed **C++ modules for Instrument Cluster ECUs** to process CAN signals and display real-time driver information.
- Implemented **multithreaded communication handlers** for CAN and SOME/IP message exchange, ensuring smooth **inter-ECU communication.**
- Collaborated with the integration team to **analyze and debug deadlock and concurrency issues** during multi-ECU integration testing.
- Supported **code reviews, unit testing, and maintained project documentation** in Confluence.
- Worked in an **Agile (Scrum)** environment ensuring timely delivery of sprints and release milestones.

**KPIT Technologies Pvt. Ltd. Bangalore** **July 2022 to Dec 2023**

- **Project: Infotainment Media System**
- Domain: Automotive Application | Language/Technology: **C++11/14, OOPS, STL, Multithreading**, CSS, HTML, XML.
- **Analyzed feature specifications** and developed functionalities for **Media (USB), Phone, and Tuner (AM/FM)** applications, ensuring robust performance and compliance with requirements.
- **Designed and implemented a virtual integration framework** on **x86 architecture** for IVI and Cluster systems, utilizing **IPC and WebSocket communication** for efficient data exchange and end-to-end validation.
- **Developed and executed integration and validation test cases** using **ECU Test Tool** and **Vector CANoe**, ensuring functional correctness and system reliability.
- **Automated test execution** and maintained complete **requirements traceability** in **Confluence**, enhancing testing efficiency and documentation accuracy.
- **Collaborated with cross-functional teams** on **requirement analysis, code reviews, and defect resolution**, contributing to timely and high-quality software delivery.

# RESUME

**EDUCATIONAL QUALIFICATION**

- **B.E. Computer Engineering** from Jamia Millia Islamia New Delhi.
- **Diploma In Computer Engineering** from Jamia Millia Islamia New Delhi.
- **12th** CBSE Board SRSVM Araria, Bihar**.**
- **10th** CBSE Board from JNV Kolasi Katihar, Bihar**.**

**CORRESPONDENCE ADDRESS**
GKR Complex, Opposite of Government School Munekolalla, Bangalore, Karnataka-560037.

**PERMANENT ADDRESS**: **Shikarpur,** Katihar**,** Bihar**-PIN: 855113**

**LANGUAGE:** Hindi, Urdu, English

**GENDER:** Male

**MARITAL STATUS:** Married

**DCM Infotech Pvt Ltd Gurgaon** **Sep 2020 – May 2022**

- **Project: BBL Banking Application**
- **Domain**: Payment Processing | **Language:** C++11/14, STL, Multithreading, ISO-8583
- Developed and enhanced **C++ modules** for **payment transaction processing** including Sale, Refund, and Void operations.
- Implemented **thread-safe message handling** using mutexes and locks to ensure synchronization between threads.
- Conducted **integration testing** for ISO-8583 message exchange between payment terminals and backend servers.
- Prepared **technical documentation**, validated test cases, and participated in defect tracking and resolution.

**Quatrro Global Service Pvt Ltd** **Intern-- Feb 2018 to Aug 2018**

- Assisted in C++ application development and functional testing under senior developer supervision.
- Learned practical aspects of Software Development Life Cycle (SDLC) and version control systems.

**Declaration**

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.
