Tusharkumar J Bhandari

Senior Software Engineer

+91-8511654347 bhandari.tushar021@gmail.com

Innovate and implement software solutions as a Senior Software Developer, leveraging extensive expertise in both back-end and front-end technologies to drive project success and enhance user experiences.

Core Competencies

- Software Development Lifecycle
- System Architecture Design
- Database Design and Management
- User Experience Optimization
- Agile Methodologies
- Continuous Integration and Deployment
- Application Security Best Practices
- Code Review and Quality Assurance
- Team Collaboration and Leadership
- Technical Documentation and Reporting

Education

2014: MCA from Gujarat Technological University with 70%
2011: BCA from Veer Narmad South Gujarat University with 60%

Technical Skills

Laravel Framework | React.js and Redux | MySQL and PostgreSQL | API Development and Integration | Microservices Architecture | Linux Server Management | Version Control with Git | Node.js | Typescript

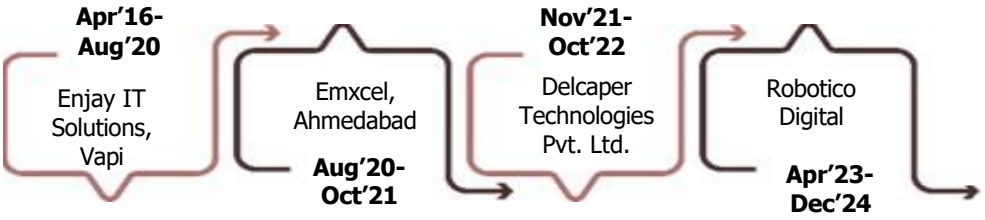

Personal Details

Date of Birth: 21st September 1990
Languages Known: English, Hindi &Gujrati
Address: 2139, Bhandarwad(Sarigam), ta-Umargam, Valsad -396155

Profile Summary

- Results-driven Senior Software Engineer with over 9 years of experience in back-end engineering, API development, and full-stack solutions, specializing in building scalable, high-performance applications using React.js, Node.js, NestJS, JavaScript, and mongodb.
- Guided teams through complex projects, ensuring adherence to best practices, fostering a collaborative environment, and enhancing overall efficiency and project delivery timelines.
- Spearheaded initiatives that led to a significant reduction in API response times and improved application performance through advanced caching mechanisms and optimized database queries.
- Extensive expertise in microservices architecture and modular development, enabling the design of adaptable and future-ready applications aligned with evolving business needs.
- Proficient in implementing robust authentication and authorization protocols, ensuring data security and compliance with industry standards in software development.
- Actively staying updated with emerging technologies and industry trends, driving the adoption of modern development practices to enhance team capabilities and software quality.

Career Timeline

Work Experience

Apr'23-Dec'24, Senior Software Engineer, Robotico Digital

Key Result Areas:

- Designed, developed, and optimized RESTful APIs using Laravel and Node.js for seamless data communication.
- Engineered efficient database schemas and optimized queries in MySQL/PostgreSQL to enhance data integrity.
- Configured and managed Linux-based server environments for application hosting, security, and deployment automation.
- Reduced API response times and improved database performance using indexing and caching techniques.
- Developed interactive and reusable front-end components using React.js, enhancing user experience and system responsiveness.

Achievements:

- Successfully developed and deployed high-performance APIs for web and mobile applications, improving system reliability and speed.

Nov'21-Oct'22, **Senior Software Developer, Delcaper Technologies Pvt. Ltd.**

Key Result Areas:

- Architected and optimized back-end solutions using Laravel, Node.js and NestJS for scalable
- applications. Developed RESTful APIs and integrated third-party services to enhance application
- capabilities.
- Enhanced system efficiency by improving database queries, caching mechanisms, and back-end functionalities.
- Developed interactive and reusable front-end components using React.js, enhancing user experience.
- Designed modular, scalable applications using NestJS and microservices-based architecture.
  Optimized MySQL and MongoDB databases, implemented indexing strategies for performance enhancement.

Achievements:

- Spearheaded the development of a high-performance back-end, while improving application scalability.
- Mentored and upskilled junior developers, enhanced team productivity and code quality.

Aug'20-Oct'21, **Emxcel, Ahmedabad**

Growth Path:
Laravel Developer
Senior Software Developer

Note:-(Company later acquired by Delcaper Technologies Pvt. Ltd.)

Key Result Areas:

- Developed scalable back-end solutions using Laravel and Node.js while improving application architecture.
- Engineered and managed RESTful APIs, integrated third-party services to enhance application capabilities.
- Implemented query optimization and caching strategies, reduced response times and improved efficiency.
- Led and mentored junior developers, conducted code reviews, and provided technical guidance.
- Developed modular applications using microservices-based architecture.
- Developed interactive and reusable front-end components using React.js,
  enhancing user experience and system responsiveness.

Achievements:

- Promoted to Senior Software Developer in recognition of technical expertise and contributions.
- Successfully integrated third-party APIs, enhanced system capabilities.
- Led a team of developers, improved overall productivity and code efficiency.

APR'16-Aug'20, **Enjay IT Solutions, Vapi**

Growth Path:
PHP & Sugar CRM Developer
Laravel Developer

Key Result Areas:

- Designed and optimized Sangam CRM software, streamlined business processes and customer management.
- Developed and maintained web applications using Laravel, PHP, and SugarCRM for enhanced user experiences.
- Engineered RESTful APIs to improve system connectivity with third-party services.
- Ensured code security, efficiency, and scalability by following Laravel best practices.
- Managed MySQL databases, optimized indexing and query performance.
- Coordinated with clients and internal teams to deliver robust technical solutions.
- Managed Git repositories and deployed applications on Linux servers.

Achievements:

- Recognized as "Performer of the Week" multiple times for outstanding project contributions.
- Developed and optimized Sangam CRM software, while improving system performance.
- Led the development of critical Laravel-based features, while enhancing system scalability.

Annexure

MFRS16 – Malaysia Financial Reporting System
Company/Client: Robotico digital LLP.
Duration: 1 year
Team Size: 8
Platform/Tools: Node.js, Laravel, React.js, MySQL, JavaScript
Brief Description: Developed a financial reporting and compliance system aligned with the **MFRS16 standard**, which deals with lease accounting. The system automated lease contract calculations, reporting workflows, and audit compliance for enterprise clients.
Key Contributions:

- Developed robust **APIs in Node.js and Laravel** to handle lease data ingestion, schedule calculations, and reporting workflows.
- Designed and optimized **MySQL schemas** to manage high-volume financial data with integrity and precision.
- Built dynamic front-end components in **React.js** to manage lease forms, amortization schedules, and exportable reports.
- Implemented authentication and role-based access control to meet **financial compliance standards**.
- Enabled export of complex reports in Excel/PDF and ensured version control across financial data revisions.
- Coordinated with finance teams to ensure system accuracy, scalability, and compliance with **MFRS16 guidelines**.

E-commerce Platform Development
Company/Client: Delcaper Technologies Pvt. Ltd.
Duration: 6 months
Team Size: 10
Platform/Tools: Node.js, React.js, MongoDB, Javascript
Brief Description: Developed a full-featured e-commerce platform to manage product listings, user accounts, orders, payments, and shipping workflows. The solution was optimized for scalability and supported a dynamic user experience across web and mobile devices.
Key Contributions:

- Developed RESTful APIs in **Node.js** for handling cart, order, payment, and inventory operations.
- Built reusable **React.js** components for the front-end with a responsive UI.
- Designed scalable **MongoDB** schemas for product catalogs, users, and transaction data.
- Integrated secure payment gateways and implemented user authentication with JWT.
- Enabled order tracking, email notifications, and admin dashboards for real-time analytics.

Society Management Software
Company/Client: Emxcel
Duration: 8 Months
Team Size: 20
Platform/Tools: Laravel, React.js, MySQL, Javascript
Brief Description: Developed a society management platform to streamline daily operations such as **flat owner registration, maintenance billing, visitor tracking, complaint management, and notice board communication**. The application enabled both residents and society administrators to manage their responsibilities efficiently through a unified dashboard.
Key Contributions:

- Developed core modules using **Laravel** for flat records, maintenance schedules, billing, and payments.
- Built a **visitor management system** to log entry/exit of guests, delivery personnel, and staff.
- Created **React.js** front-end for intuitive user dashboards, admin panels, and mobile-responsive components.
- Designed and optimized **MySQL** schema for user roles, flats, complaints, billing history, and visitor logs.
- Implemented role-based access (resident, security, admin) and a dynamic **notice board** feature for real-time communication.
- Integrated email and SMS alerts for visitor approval, dues reminders, and announcements.

CRM Management System
Company/Client: Enjay IT Solutions
Duration: 1 year
Team Size: 15
Platform/Tools: Laravel, MySQL, JavaScript, HTML, CSS
Brief Description: Developed and maintained a CRM system to streamline customer interactions, lead tracking, and sales management. The application included modules for contact management, lead status tracking, reminders, and role-based access control.

Key Contributions:

- Developed modular components for lead capture, task scheduling, and customer communication.
- Integrated email and SMS notification system for follow-ups.
- Optimized MySQL queries for faster report generation and lead filtering.
- Designed responsive UI using Bootstrap to ensure usability across devices.
