Tejash Sawant

Mobile:9325706305
E-Mail:tejashsawant12@gmail.com

Job Objective:

Security Professional with 7+ years of relevant experience in Cybersecurity, SOC Admin, Security operations, Incident Response, Analysis with SIEM, EDR and NDR knowledge of Cloud security technologies to provide a powerful combination of Analysis, Investigation, and Monitoring.

As Assistant Manager– Working on Q-radar SIEM Solution/ EDR/ NDR/ Imperva DAM/ Google SecOps SIEM

7+ years of experience in the areas of IT & Information Security:

Threat Intelligence	Incident Management	Threat Hunting
Malware Analyst	Installation & Configuration	Risk Management

- ✓ A technology with **BE in information technology.**
- ✓ Currently associated with **SMFG India Pvt Ltd as Assistant Manager.**

Technical Skill:

SIEM tools Q-Radar, EDR, NDR & Google SecOps	Q-radar SIEM Tool, SIEM Admin, threat detection, and SIEM Correlation, Fine-tuning Detection Rule, Threat Intelligence, Phishing Analysis, threat Hunting, Incident Response
Trellix EDR, NDR, Microsoft 365 Defender POC (XDR), Google SecOps SIEM, SOAR, UEAB	Endpoint Detection and Response (Trellix EDR HX & NX, Network Monitoring, Threat Hunting, MITRE ATT\&CK-driven, TTPs, MITRE ATT&CK, behavioral analysis
FireEye EDR, Crowd-strike EDR, Imperva DAM	Design, Deployment, Configuration, rule fine-tuning Imperva DAM, Policy Management, Security Monitoring and Analysis, Data Risk Analytics, Reporting and Analytics**.** ISO27001,
Others Skills	ISO27001, SOC2, PCI DSS, NIST CSF 2.0, BCP & DR, Risk Management, AWS, Azure, Google Cloud Platform (GCP)

Organizational Experience: SMFG India (Dec 2023 to till date)

Role & Responsibility:

Designation: Assistant Manager

Q-radar SIEM & EDR

- ❑ Proactively hunt for hidden threats and indicators of compromise across endpoints, network, cloud, and identity.
- ❑ Develop, validate, and tune advanced detection logic and threat-hunting methodologies.
- ❑ Collect, analyze, and operationalize external threat intelligence integrate trillix feeds into SIEM/EDR for enrichment and early detection.
- ❑ Conduct in-depth incident analysis and forensic investigations to determine scope, root cause, and attack techniques.
- ❑ Escalate confirmed threats to the Incident Response team and manage critical incidents end-to-end to contain, eradicate, and recover affected systems.
- ❑ Coordinate with resolver groups, IT, legal, compliance, and external stakeholders during response and recovery.
- ❑ Document incident timelines, findings, remediation actions, and produce post-incident reports and stakeholder updates per SLA.

- ❑ Assist with control assessments and compliance activities, including SOC2 gap analysis and remediation coordination.

Area of Expertise: Tech Mahindra (Oct 2022 – Dec 2023)

Role & Responsibility:
Designation: Sr. Security Analyst:

Google SecOps & Crowd-strike EDR

- ❑ Led migration from legacy SIEM to Google SecOps (Chronicle and SOAR) of onboarded 60+ critical log sources across cloud, network, and endpoints.
- ❑ Designed and deployed log ingestion pipelines; standardized parsing using UDM, JSON, and Syslog to ensure normalized telemetry and data integrity.
- ❑ Configured and tuned detection rules in the Google SecOps Detection Engine using threat intelligence and behavioral analytics to improve alert fidelity.
- ❑ Integrated 100+ log sources including cloud platforms, firewalls, proxies, EDR, identity systems, and application logs to provide unified security visibility.
- ❑ Automated alert enrichment and case creation by building SOAR playbooks integrated with Chronicle, reduced manual triage and accelerated analyst investigations.
- ❑ Implemented data validation and monitoring for ingestion pipelines to ensure completeness and signal quality for analytics and hunting.
- ❑ Developed incident response playbooks and runbooks aligned with SOAR workflows, coordinated cross-functional response for major incidents.
- ❑ Measured and reported outcomes: improved MTTD, reduced analyst triage time, and increased detection coverage through tuned detections and automated enrichment.

Area of Expertise: Inspira Enterprise Pvt Ltd (March 2021 – March 2022)

Role & Responsibility:
Designation: Security Analyst

Security Operation Center (IBM Q-radar)

- ❑ Continuously monitored Q-Radar to identify suspicious activity and potential security incidents.
- ❑ Aggregated, correlated, and analyzed logs from network devices, security tools, and key assets to surface actionable alerts.
- ❑ Created and tuned Q-Radar rules, filters, dashboards, scheduled searches, and reports based on client requirements.
- ❑ Implemented new SIEM use cases and provided recommendations to improve detection coverage and reduce false positives.
- ❑ Integrated logs from Win-collector, Sysmon, Azure Event Hub/Blob, firewalls, and other security tools into QRadar.
- ❑ Performed immediate triage and deep analysis of critical alerts; initiated proactive actions and escalations as needed.
- ❑ Maintained SIEM availability, event source onboarding, reporting, and stakeholder communication.
- ❑ Prepared daily, weekly, and monthly reports, knowledge-base articles, and documented use cases for clients.
- ❑ Coordinated with IT and security teams for remediation, fine-tuning, and troubleshooting of log sources and rules.

Area Of Expertise: Wipro Limited (March 2019– March 2021)

Role & Responsibility:
Designation: Associate Engineer to Administrator
Trellix EDR & Imperva DAM

- Implemented, configured, and optimized Trellix FireEye HX to improve endpoint detection and response capabilities.
- Deployed and managed Trellix EPO/ENS features including AV, encryption, DLP, device control, and application control.
- Configured Trellix FireEye NX as IPS/IDS to detect and prevent network attacks and escalate incidents to SOC.
- Performed endpoint threat hunting using process tracing, heuristic analysis, and IOC/TTP correlation.
- Worked closely with SOC teams to investigate endpoint incidents and execute containment and remediation actions.
- Participated in red and purple team exercises to identify vulnerabilities and implement corrective measures.
- Identified and mitigated 10+ high-impact security risks, strengthening client security posture.
- Analyzed suspicious network activity to refine NDR rules and improve response playbooks.
- Deployed and configured Imperva Secure-Sphere DAM across enterprise database environments to monitor privileged and application user activity.
- Created and tuned detection policies for suspicious SQL patterns, privileged escalation, anomalous queries, and excessive data exfiltration attempts.
- Integrated Imperva audit logs with SIEM for centralized correlation, alerting, and long-term retention.

Area Of Expertise: CMS IT Services (February 2018 – February 2019)

Designation: <u>Customer Support Engineer</u>
Role & Responsibility:

- Installation/ uninstalling Required mitigate compliance software in client systems.
- Installation of McAfee agent to endpoints, Configuration IP Adress, DHCP, DNS.
- Working on BMC Ticketing tool.
- If Any Connectivity Issue Check Configuration IP Adress.
- Troubleshooting McAfee agent and endpoint systems communication issue.
- If any virus found in client system need to full scan AV and collect the logs.
- Troubleshooting DAT issues by providing up to date antivirus with latest signature.

Academic Credentials:

- Completed Course in **Ethical hacking (85.06) courses, Q-radar training Certification, EDR Certification, Azure AZ-900 Certified.**
- **Bachelor of Engineering in Information Technology** from North Maharashtra University in 2016.
- **HSC** in Science under Board of Higher Secondary. Maharashtra. In 2011.
- **S.S.C.** from State Board of Secondary Education. Maharashtra. In 2009.

Personal Details

Age : 32 Years
Marital Status : Single
Languages Known: English, Hindi, and Marathi.
Nationality : Indian
Current Address : FL-B-204, Rajvansh Build. PLOT-E/32, sector-3 , Kharghar 410210
