Technical Exposure:

- **Intune & Modern Device Management (MDM/MAM)**
- **Windows Autopilot & Zero-Touch Deployment**
- **Enrolling the devices (windows ,android,ios/ipad,macOs)**
- **Application Deployment (Win32, MSI, Microsoft Store, LOB apps)**
- **Application protection policies (Windows & Android & IOS)**
- **Conditional Access & Security Baselines**
- **Deploying PowerShell scripts using Intune**
- **BitLocker Encryption & Antivirus & Firewall**
- **Azure ADJoin, Hybrid Join, Role-Based Access Control – RBAC**
- **Patch Management (Windows Update for Business – WUfB)**
- **Intune Reporting & Troubleshooting**
- **Co-management**
- **SCCM - Application deployment, package deployment, patching, client installation, collections.**

PROJECT 4:

Organization : Capgemini , banglore
Project : Aptiv
Duration : Feb 2025 to Sep 2025
Role : Intune Administrator

Roles and Responsibilities :

- **Managed and administered Microsoft Intune for Windows, Android, iOS/iPadOS, and macOS**

devices, ensuring secure and compliant endpoint management across the organization.

· Created and deployed Configuration Profiles, Compliance Policies, and Custom Configuration Profiles (OMA-URI / PowerShell-based) to enforce organizational policies and security standards.

· Developed and deployed PowerShell scripts through Intune for custom device configurations and automation of administrative tasks.

· Configured and maintained BitLocker encryption policies for Windows devices to enhance data protection and meet compliance standards.

· Performed primary user assignments and changes within Intune, resolving ownership conflicts and ensuring accurate device-to-user mapping.

· Executed application deployment and troubleshooting via Intune — including Win32, Microsoft Store, and LOB apps — ensuring smooth delivery and functionality on user devices.

· Windows Autopilot enrollment processes, including hardware hash collection, uploading, assigning group tags, and profile deployment for zero-touch provisioning.

· Designed and deployed Kiosk Profiles for single-app/multi-app kiosk scenarios, enabling secure and controlled access on dedicated devices.

· Deployed security patches and feature updates with minimal disruption to end-users.

· Supported and maintained co-managed devices integrated with SCCM and Intune for hybrid management.

· Managed Android Enterprise enrollments using Samsung Knox portal for secure onboarding and configuration of mobile devices.

· Handled Apple device management using Apple Business Manager (ABM) — including iOS, iPadOS, and macOS device enrollment and supervision setup.

· Collaborated with team leads and cross-functional teams during critical incidents and escalations, ensuring timely issue resolution and minimal user disruption.

· Generated and shared detailed Autopilot enrollment and compliance reports with clients for transparency and operational tracking.

· Managed connectors and tokens (Apple MDM Push Certificate, VPP, DEP, and Knox tokens) to maintain integration between Intune and third-party platforms.

· Provided end-user support and resolved Intune-related tickets involving device enrollment, compliance, and policy application issues.

PROJECT 3:

Organization : Tata consultancy services, banglore
Project : Microsoft

Duration : April 2024 to June 2024
Role : Intune Administrator

Roles and Responsibilities :

- **Managed Intune-based endpoint security, compliance policies, and app deployments for users.**
- **Configured Windows Autopilot profiles for zero-touch deployment across global teams.**
- **Troubleshot Autopilot deployment failures by analyzing logs (MDMDiag, event viewer, ESP logs)**
- **Resolved device enrollment failures due to Hybrid Azure AD Join issues, compliance policy conflicts, and network restrictions.**
- **Worked with OEM vendors (Dell, HP, Lenovo) to ensure accurate Autopilot device hash uploads.**
- **Configured Windows Update for Business (WUfB) policies to automate Feature & Quality updates .**
- **Managed software updates and enforced macOS update policies to ensure devices remain compliant.**
- **Implemented Intune Update Rings with deferral, deadline, and grace period policies to minimize user impact.**
- **Monitored patch compliance & generated Intune Update reports using Log Analytics, Power BI, and Intune Reports.**
- **Troubleshot Windows Update failures using Intune logs, Event Viewer, and PowerShell.**
- **Deployed security patches and feature updates with minimal disruption to end-users.**
- **Deployed and managed Win32, MSI, and Microsoft 365 apps using Intune.**
- **Configured and managed Application Protection Policies (APP) to secure corporate data on personal (BYOD) and managed devices.**
- **Implemented Conditional Access policies to allow/block app access based on compliance and security posture.**
- **Implemented Conditional Access Policies to enhance security based on compliance status.**
- **Configured BitLocker and FileVault encryption to protect corporate data.**
- **deploying Microsoft Defender Antivirus & Firewall & real-time threat detection and remediation.**
- **Provided L2/L3 support for device enrollment, application deployment, and compliance issues.**
- **Generated Intune compliance reports to analyze security trends and optimize policies.**

PROJECT 2:

Organization : CMS IT services Pvt Ltd, Chennai.
Project : Southerland
Duration : June 2022 to October 2023
Role : System Administrator

ROLES AND RESPONSIBILITIES :

- **Managed Intune for device provisioning, security policies, and compliance management across devices.**
- **Configured Windows Autopilot for automated device setup, reducing deployment time**
- **Troubleshot Autopilot deployment failures by analyzing logs (MDMDiag, event viewer, ESP logs)**
- **Implemented App Management for macOS, deploying PKG, DMG, and VPP apps through Intune.**

Designed and managed compliance policies for macOS, enforcing password policies.

- **Managed software updates and enforced macOS update policies to ensure devices remain compliant.**
- **Resolved issues related to Conditional Access and compliance failures preventing macOS access to corporate resources.**
- **Resolved device enrollment failures due to Hybrid Azure AD Join issues, compliance policy conflicts, and network restrictions.**
- **Worked with OEM vendors (Dell, HP, Lenovo) to ensure accurate Autopilot device hash uploads.**

- **Troubleshot Autopilot deployment failures by analyzing logs (MDMDiag, event viewer, ESP logs).**
- **Deployed and managed applications (Win32, MSI, Store, and LOB apps) via Intune.**
- **Configured and managed Application Protection Policies (APP) to secure corporate data on personal (BYOD) and managed devices.**
- **Implemented Conditional Access policies to allow/block app access based on compliance and security posture.**
- **Implemented Conditional Access policies to ensure secure device access based on compliance status.**
- **Enabled BitLocker & FileVault encryption to protect corporate data.**
- **Deploying Microsoft Defender Antivitus & filewall to enhance endpoint security.**
- **Provided L2/L3 support for Intune policy troubleshooting, compliance issues, and device conflicts.**
- **Monitored device health, software updates, and compliance reports using Intune Analytics.**

Project 1

Organization : Smartbeings Software Innovations Pvt Ltd , Banglore .
Project : infosys
duration : April 2020 to May 2022
Role : System Analyst

ROLES AND RESPONSIBILITIES :

- **Assisted in deploying and managing Windows, iOS, and Android devices using Microsoft Intune.**
- **Configured Intune MDM policies to ensure secure device provisioning and compliance.**
- **Enrolled and managed devices using Windows Autopilot and Apple Business Manager.**
- **Troubleshot Autopilot deployment failures by analyzing logs (MDMDiag, event viewer, ESP logs)**
- **Deployed and updated corporate applications via Intune App Management.**
- **Implemented compliance policies to enforce security standards across company devices.**
- **Configured BitLocker encryption and Defender Antivirus policies to enhance endpoint security.**
- **Assisted in setting up Conditional Access policies with Azure AD to protect corporate data.**
- **Managed App Protection Policies (APP) to secure company data on BYOD devices.**
- **Intune-related issues, including device enrollment, app deployment, and policy conflicts.**
- **Diagnosed and resolved MDM enrollment failures, compliance errors, and security misconfigurations.**
- **Created documentation and user guides for Intune device enrollment and troubleshooting.**
- **Collaborated with IT teams to improve Intune policy deployment and device performance.**
