Profile Summary

AWS Cloud & DevOps Engineer with 12+ years of experience in designing, deploying, and automating cloud-native infrastructure and CI/CD pipelines. Skilled in AWS services, Infrastructure as Code (IaC), automation scripting, and DevOps methodologies. Proven record in cloud governance, security, monitoring, and operational excellence. Currently pursuing MBA (IUBH, Germany) to strengthen business & technology alignment.

Core Skills

- **Cloud Platforms:** Amazon Web Services (EC2, S3, VPC, IAM, Lambda, DynamoDB, CloudWatch, Transit Gateway, Direct Connect)
- **DevOps & CI/CD:** Jenkins, Git, GitHub Actions,Kubernetes, AWS CodePipeline, Azure DevOps (basic)
- **IaC & Automation:** Terraform, AWS CloudFormation, Ansible, AWS SAM
- **Monitoring & Logging:** Datadog, CloudWatch, ELK Stack
- **Scripting:** Python, PowerShell, Bash, AWS CLI
- **OS & Tools:** Windows,Linux, ServiceNow, JIRA

Work Experience

Tech Mahindra (03/2017 – Present)

Project 1: Verizon As A Senior AWS Cloud / DevOps Engineer (03/2022 – Present)

Responsibilities:

- Architected and deployed **secure, scalable AWS solutions** to support enterprise workloads across multiple accounts.
- Designed **Infrastructure as Code (IaC)** with Terraform and CloudFormation for automated provisioning of VPCs, EC2, IAM, and storage resources.
- Built and optimized **CI/CD pipelines** in Jenkins and Git, enabling automated testing, integration, and deployment.
- Implemented **Datadog monitoring** across 70+ servers, improving system observability and reducing downtime.
- Automated operational tasks using **Python and Bash scripts**, reducing manual interventions by 40%.
- Configured **S3 with lifecycle policies, cross-region replication, and encryption** for secure data management.
- Deployed **disaster recovery (DR) solutions** using Backup & Recovery, Pilot Light, and Standby strategies.

- Ensured **cloud security compliance** via IAM policies, role-based access, and continuous audit processes.
- Collaborated with architects and business stakeholders to align AWS deployments with enterprise strategy.

Project 2 : Nissan As An AWS Cloud Engineer (03/2017 – 02/2022)

Responsibilities:

- Automated full AWS infrastructure provisioning using **CloudFormation**, covering VPCs, EC2, subnets, KMS encryption, and security groups.
- Implemented **SSM automation** for monthly patching and AMI updates across accounts and regions.
- Managed **Linux/RedHat system administration** and automated configuration tasks to improve stability.
- Supported **application teams** by provisioning cloud-native environments and troubleshooting deployment issues.
- Established **CI/CD pipelines with Jenkins & Git**, reducing release cycle times.
- Performed **root cause analysis (RCA)** for outages and applied corrective/preventive actions to improve reliability.
- Enhanced cloud security posture with encryption, IAM policies, and compliance monitoring.
- Migrated workloads to AWS and optimized environments for **performance, availability, and cost savings**.

Harjai Computers pvt. Ltd (06/2016 - 02/2017)

Project 3: SPX FLOW As A System Engineer

Responsibilities

- Installing and configuring ESX and ESXI servers.
- Creating and managing virtual machines and installing VM Tools into VM's.
- Manage VM's using VMware virtual canter and web access.
- Creating and managing VMWare cluster.
- Performing Snapshots, Cloning, cold migrations, and hot migrations.
- Creating templates from VM and deploying VM's from templates and allocate resources.
- Creating duplicate VM's using cloning technology.
- Moving VM's from one LUN to another LUN using Storage VMotion.
- Performance tuning of VMware servers, Virtual sessions, and management of server resources between virtual machines.
- P2V and V2V conversions by using VMware Converter.
- Security hardening and Monitoring of VM's & ESX servers (CPU, Memory, Disk, Network Utilization) for Security Compliance.
- Configurations of Virtual switches and network connections
- Created and modified VMware High Availability (HA), Enhanced VMotion, and ESX Host Profiles.

SNICare Software Solutions Pvt Ltd (01/2013 – 05/2016)

Project 4 : Shared Services As A System Engineer

Responsibilities

- VMware Administrator, along with Active Directory administration and Citrix administration - Provided Technical support services. Reconfiguration of existing Virtual Machines through Virtual Infrastructure.
- Performing Daily health checks on enterprise Domain Controllers, Exchange servers.
- On-call support escalated issues after hours.
- Creation of Changes Management for distributing Hotfixes, patches, and server reboots.
- Experienced on DR plans and Disaster Recovery including documentation.

Innovation Projects

✧ **Automated Log Comparison Tool** – Developed a Python-based automation that retrieves baseline logs from Git and compares them with Jenkins execution logs to produce **pass percentage, runtime analysis, and step-wise failure insights with visualizations**. Delivered **lean savings of $120K** through test optimization.

Personal Projects

✧ **MirrorMe** (Personal Tracker App)**:** Built with Python & Vibe Coding, enabling users to manage **budget, fitness, and notes** in a single lightweight application.
✧ Exploring New Gen AI related trends and building some applications out of it like creating own AI agent using n8n.

Education

➢ **MBA** – IUBH, Germany (Currently Pursuing)
➢ **B.Tech** – Computer Science, JNTU Hyderabad (2008 – 2012)

Certifications

✓ AWS Certified Solutions Architect (2020 – 2023)
