EDUCATION

Smt. Kashibai Navale College of Engineering Pune, Maharashtra, India

Bachelor of Engineering (B.E. in Mech); GPA: 7.5 **June 2018 - August 2021**

SKILLS SUMMARY

- **Languages**: Flutter, Dart, JavaScript, HTML, CSS, SQL, App Development
- **Tools**: Visual Studio, Gradle, Android Studio, Git,
- **Soft Skills**: Excellent communication, Problem Solving, Creativity, Collaboration and teamwork

WORK EXPERIENCE

Future Scape Tech **August 2025 - September 2025**

Flutter Developer

- Contributed to the **new version of the** food app, enhancing UI components, API integrations, and overall app performance using **Flutter.**
- Collaborated with the AI tools team on **AI coding agents (Augment, Cursor)** to streamline developer workflows and accelerate feature development.

Tata Consultancy Services **December 2021 - August 2025**

System Engineer | Banking Platform 2.0 | Flutter Developer **Feb 2023 - Aug 2025**

- Developed and enhanced the Bill Payment section of a digital banking app using **Flutter and Dart**, covering features like electricity, mobile recharges, and credit card bill payments.
- Contributed to code development and enhancement for mobile applications within a digital banking platform, focusing on optimizing functionalities.
- Collaborated with our Mobile Applications team to implement new features and widgets, utilizing APIs and the Dart programming language.
- Engaged in application development processes, including sprint planning, daily stand-ups, and sprint reviews, ensuring timely feature delivery and alignment with industry trends.
- Implemented UI widgets and managed state efficiently using **Mobx** for cross-platform consistency (iOS & Android).
- Conducted unit testing and thorough debugging to identify and resolve issues, ensuring a seamless and optimized user experience across diverse payment categories.
- Coordinated with senior developers, project managers, product managers, designers, and development teams to prioritize tasks, manage resources, and achieve project milestones and deadlines.
- Optimize application performance to deliver a smooth and responsive user experience.

System Engineer | OTPP | SQL Developer | SQL, HTML, CSS, Javascript **Feb 2022 - Feb 2023**

- Supported development efforts of the TFR project, focusing on website improvements and feature additions.
- Partnered with the development team to build new functionalities and enhance the existing website according to project requirements.

Assistant System Engineer | OTPP | SQL Developer **Dec 2021 - Feb 2022**

- Conducted manual testing activities within a migration project, specializing in the Capital Market domain, focusing on CRD and SCD tools.
- Developed and executed test cases and scenarios to ensure the accurate migration of data and functionality within CRD and SCD tools, adhering to client required and industry standards.

PROJECTS

Firebase Real-Time chat application

- Developed a user-friendly using **Firebase Authentication** for user login and registration.
- Real-time messaging features are implemented, around **15-20** users can log in and have realtime chat.
- Used **Supabase** Storage for storing profile photos or other files and used **riverpod** state management.

Anime Scape

- **Anime Scape** is a Flutter-based mobile app that fetches and displays **AI-generated anime images** using public APIs.
- Implemented with **Riverpod** for state management and Dio for networking, it features dynamic category filtering, image galleries, and user prompts via custom bottom sheets..
- The app ensures responsive UI with error handling and loading states, following clean architecture principles.

Acetylene as an Alternative Fuel in I. C. Engine - Academic

- In this project, we changed engine fuel by replacing alternative fuel as petrol is a nonrenewable source.
- In which we run engine with another fuel by modifying petrol engine.
