Professional Summary

Skilled Full Stack Developer with 8 years of experience in designing and developing dynamic web applications using Java, Spring Boot, Microservices, Angular, and cloud-native technologies. Strong expertise in building scalable distributed systems with Docker, Kubernetes, and Kafka for messaging and event-driven architectures. Proven track record of delivering high-quality solutions in Agile environments. Adept at collaborating with cross-functional teams and utilizing modern tools like GitHub Copilot and ChatGPT-4 to enhance development efficiency.

Technical Skills

Languages & Frameworks: Java(11, 17), Spring Boot, Spring MVC, Spring Security, Spring Webflux, JPA, REST API, Microservices
Frontend: Angular 6/8/9, HTML5, CSS3, Bootstrap, JavaScript
Database: MySQL, Oracle, DB2, Sybase, MongoDB
Tools & Platforms: Git, ALM, Maven, JBoss, TIMS Server, LARA, Docker, Kubernetes
Monitoring & Automation: Splunk, GitHub Copilot, ChatGPT-4, Kafka
Methodologies: Agile – Scrum

Professional Experience

Senior Software Engineer – Wipro, Bangalore, Karnataka

June 2022 – Present

Project Name: RAPID
Client: Visa

Description: Developed and maintained the back-end for the Risk Alerts Payment Incident Detection (RAPID) project to support the Risk Operation Centre (ROC).

Technologies Used: Java 17, Spring Boot, Spring Security, Spring Data JPA, Angular, Microservices, Docker, Kubernetes, Kafka, Splunk, GitHub Copilot, ChatGPT-4

Responsibilities:

- Designed and implemented RESTful APIs using Spring Boot and Microservices architecture.
- Utilized Spring Data JPA for efficient database access.
- Secured services using Spring Security.
- Deployed and orchestrated services using Docker and Kubernetes.
- Integrated Kafka for real-time event-driven communication.
- Integrated Splunk for real-time monitoring and logging.
- Collaborated with front-end developers to integrate Angular dashboards.

Technology Analyst – Infosys Limited, Bangalore, Karnataka

June 2018 – May 2022

Project Name: AAC - Covalent
Client: American Express

Description: Insurance application offering trip-related protection services.
Technologies Used: Java 11, Spring Boot, DB2, JSP, TIMS Server

Responsibilities:

- Developed REST APIs using Spring Boot.
- Deployed WAR files using LARA.

Project Name: GUIDE
Client: Fidelity Investments

Description: Migrated a legacy banking app to Angular 6 and integrated REST services with a Microservices-based backend.

Technologies Used: Java 11, Angular 6, Spring Boot, Spring Webflux, Microservices, Docker, Kubernetes, Kafka, MySQL, NoSQL (MongoDB), Bootstrap

Responsibilities:

- Migrated JAM/JPL application to Angular with a modern responsive design.
- Built shared Angular components for reusability.
- Developed Microservices using Spring Boot for modular backend services.
- Deployed services in Docker containers and managed orchestration with Kubernetes.
- Implemented Kafka for asynchronous communication between services.

- Integrated RESTful services and managed version control using Git.

Software Developer – Adi Search System, Bangalore

Sept 2017 – May 2018

Project Name: DIVA (Data Integrity and Validity Analysis)

Technologies Used: Spring Boot, Spring MVC, Spring JDBC, Sybase, JBoss
Tools: Maven
IDE: STS (Spring Tool Suite)

Description:
In DIVA, the Internal Controls module minimizes operational risks by ensuring that internal controls exist, are documented, and are regularly tested. The Intermediary Contracts module provides a centralized platform for workflow and documents related to MFS's dealer agreements and strategic partnerships.

Responsibilities:

- Modernized Struts to Spring Boot with RESTful backend services.
- Fixed Sonar issues.
- Resolved security vulnerabilities.

Software Engineer – NextRow Pvt. Ltd., Hyderabad

Feb 2016 – Aug 2017

Project Name: Remote Monitoring Center (RMC)
Role: Team Member (Java Developer)
Environment: Spring MVC with Security, Spring JDBC, MySQL 6.0x, Apache Tomcat
Tools: Eclipse

Description:
RMC is a web application used for monitoring registered CQ servers and tracking server statuses.

Responsibilities:

- Coordinated with project leader to gather requirements and develop Java code.
- Redesigned the application using Spring MVC and RESTful services.
- Designed frontend screens using Angular 2 and HTML.

- Developed DAO layer with Spring JDBC for MySQL access.
- Created frontend graphs using PlotlyJs.

Education

MCA – Guru Jambheshwar University of Science and Technology, Hisar
