PROFESSIONAL SUMMARY

- Having 6+ Years of total IT experience.
- Around **3 years** of exclusive experience in **Hadoop** and its components like **HDFS, Hive, Pyspark** have worked in strong **AWS, S3 bucket, AWS EMR, AWS GLUE, Amazon Redshiftt, SQL.**
- Experienced in working with spark ecosystem using Python and HIVE Queries on different data formats like text file and parquet.
- Experience with all flavor of **Hadoop distributions, including Cloudera, Horton works.**
- Experience in importing and exporting data using **Apache Sqoop** from **Relational Data Base Systems** to **HDFS** and vice-versa.
- Experience in building **hive, pig** and **MapReduce** scripts.
- Designing and creating **Hive external tables** using shared meta-store instead of derby with partitioning, dynamic partitioning and buckets.
- Experience in building **Hive scripts** to extract, transform and load data onto **HDFS** for processing.
- Expertise in **Apache Spark & Python**.
- Experience in developing scripts in Python and **Spark-SQL** for faster testing and processing of data. Import data from different sources like **HDFS/HBase** into **SparkRDD**.
- Having good exposer on **Spark (RDD)** and its working functionality.
- Strong Knowledge of Spark architecture and its integrations like **Spark SQL**, **Data Frames** and **Datasets API.**
- Experience working on **GitHub** and **JIRA** to track issues and crucible for code review.

TECHNICAL SKILLS

Big Data	**: SQL, Hive, Sqoop, HDFS, Oozie, Spark, PySpark, Python**
Cloud	**: AWS, S3 bucketing, AWS glue, Redshift**
Other Tools	**: WinSCP, Putty, Jupiter Notebook, PyCharm.**
Operating Systems	**: Windows, Linux.**
Languages	**: SQL, Python.**
Hadoop Distributions	**: Cloudera, Jenkins.**

EMPLOYEMENT DETAILS:

- HCL, Bangalore Data Engineer | June 2019 – Present

PROJECT# 3:

Client : IKEA
Role : Data Engineer
Environment : Hadoop (Hive), Spark, Spark Batch, Spark-SQL, pyspark, AWS. Apache Airflow, Python, Databricks.

Description:-

Edge Mobility is an internal talent management suite, enables companies to internally allocate resources based on open demands to evaluate against competencies & skills. It seamlessly integrates with 3rd party systems, making it easy to optimize the workforce for profitability.

Responsibilities:

- Designing, developing, and maintaining data pipelines using Spark, Python, Scala and related technologies on Hadoop.
- Handling on high volume data and ensure data quality and accuracy.
- Implement data security and privacy best practices to protect sensitive data.
- Developing data set processes for data modeling, mining and production.
- Monitoring and troubleshoot data pipelines to ensure they are performing optimally. Optimize data pipelines for cost and performance.
- Automate data processing tasks and workflows to reduce manual intervention.
- Working on Agile Feature teams.
- Self-Motivator to perform Design/Develop user requirements, test and deploy the changes into production.

PROJECT# 2:

Client : Commonwealth Bank
Role : Big Data Developer
Environment : Pyspark, Spark, Hive, Python, Hadoop, Linux, Aws S3.

DESCRIPTION:
The Commonwealth Bank of Australia (CBA), or CommBank, is an Australian multinational bank with businesses across New Zealand, Asia, the United States and the United Kingdom. It provides a variety of financial services including retail, business and institutional banking, funds management, superannuation, insurance, investment and broking services.

ROLES & RESPONSIBILITIES:

- Creating HIVE external tables to store the results on top of HDFS.
- Application development by using shell -scripting
- Deployed the spark jobs and monitor their status in the cluster and analysing the EMR logs
- after the job processing done
- Prepared cate ingestion templates for processing the data
- Prepared runbook, paybook and autosys jils
- Implemented Spark RDD transformations to map business analysis and apply actions on top of transformations.

PROJECT# 1:

Client : ISF General Insurance
Role : Data Engineer Trainee
Environment : SQL

Description:

ISF GENERAL covers all major insurance classes of General Insurance. It is easy to use, customization, comprehensive and easy to implement. ISF GENERAL is designed to meet today's business challenges ofGeneral Insurance Organizations. It incorporates the functionalities of a futuristic insurance processing solution.

Responsibilities:

- Creating packages, procedures, functions using SQL coding to implement the complex business logic.
- Writing complex queries using multiple tables.
- Analyzed, developed Packages, Procedures and Functions as per the requirement.
- Optimizing SQLs using explain plan, Auto trace feature and TKPROF to analyze the execution plan andtune the statements.
- Developed the reports through materialized views
- Developed New Form as per the Client Requirement.
- Prepared TSD as per the Client Requirement.

EDUCATION DETAILS:

- Bachelor of Degree (B com) in SRI SRINIVASA DEGREE COLLEGE MADANAPALLI ,Under SVU Tirupathi 2019.
