NUKALAPATI SANDIP REDDY

Senior DevOps and Cloud Engineer

+918008630480 reddynsandip@gmail.com https://www.linkedin.com/in/nsandipreddy/
Hyderabad, India

EXPERIENCE

QUADRATIC SOFTWARE SYSTEMS PRIVATE LIMITED

02/2013 - Present

Senior DevOps Engineer

Nike

09/2023 - Present Hyderabad

- Streamlined CI/CD pipelines using Maven and Python, reducing build and deployment times by 20%.
- Pioneered Kubernetes adoption with Route53 & ALB orchestration, achieving 20% cost savings.
- Implemented Terraform remote backend, improving infrastructure stability and security.
- Reduced bug density by 20% through SonarQube audits and quality sessions.

DevOps Engineer

Walmart

09/2020 - 08/2023 Hyderabad

- Automated server configuration and patching with Ansible, improving release efficiency.
- Built and maintained CI/CD pipelines with GitHub Actions, Maven, JFrog, and Ansible.
- Implemented blue/green Kubernetes deployments, ensuring zero downtime.
- Streamlined Docker files and multi-container apps using Docker Compose.

Senior .NET Developer

Rpm

02/2017 - 08/2020 Hyderabad

- Improved system reliability by {30%} by designing secure WCF and SOAP services and integrating AWS Lambda with .NET Core.
- Boosted system performance by 30% through Elasticsearch and refined workflows.
- Designed and developed microservices-based architecture using .NET 6 and Docker, improving scalability by 35%.
- Optimized SQL queries and stored procedures, resulting in 25% faster data retrieval.

Junior .NET Developer

Manage My Business

02/2013 - 01/2017 Hyderabad

- Automated Git workflows and improved deployment consistency by 25%.
- Managed IIS hosting and ensured 99.9% uptime through tuning and load balancing.
- Developed REST APIs consumed by Angular front-end, supporting 10K+ daily active users.
- Created unit and integration tests using xUnit achieving 85% test coverage.

B.TECH(ECE)

Pondicherry University

SUMMARY

Senior DevOps & Cloud Engineer with 12+ years of IT experience, specializing in cloud automation (AWS, Azure, GCP), CI/CD pipelines, Infrastructure as Code (Terraform, Ansible), and Kubernetes-based microservices. Proven record of improving deployment efficiency, system reliability, and cost optimization through modern DevOps practices.

CERTIFICATION

DevOps Engineer Certificate of Achievement

Docker Essentials

DevOps Fundamentals

Scalable Web Applications on Kubernetes

KEY ACHIEVEMENTS

Star of the Month Award
Received star of the month award for implementing cost reduction using Terraform and Kubernetes

Community Engagement
Participated and presented at various local meetups for community sharing and learning

KEY SKILLS & TOOLS

Core DevOps:

Jenkins GitHub Actions Maven Terraform Ansible Docker Kubernetes Helm Git Linux CI/CD Pipelines Agile SDLC

Cloud Platforms:

AWS Azure GCP

Monitoring & Security:

Prometheus Grafana SonarQube DevSecOps

Scripting & Languages:

Python Bash YAML C# ASP.NET
