SUMMARY

Highly skilled **Android Developer** with 3**+ years** of experience in developing **Android applications**. Expertise in **Java**, **Kotlin**, and **JavaScript languages**. Conducted code reviews, troubleshot & resolved issues, bugs & performance bottlenecks to deliver high-quality, bug-free applications, optimized application performance, and implemented enhancements to improve overall user experience. Efficient with Agile development methodology for unit testing and proficient in debugging, fixing errors and building core features for apps and optimize the application for customer satisfaction.

EDUCATION

B.TECH., Information Technology Engineering April 2022
Vishwakarma Institute of Technology, Pune 8.11 CGP

TECHNICAL SKILLS

Core Competencies: Application Performance Enchancement, Software Development Lifecycle, Code Optimization, Debugging & Troubleshooting, Unit Testing, Agile Methodology, Scrum Events, Traning & Knowledge Sharing, JIRA, Github, Push notification , Singleton , Jetpack compose. RESTful APIs, Coroutines, RxJava, CI/CD tools.
Android Application: MVVM, MVP, MVC, SDK, **Android Studio**, APIs, Database, Design, Android testing
Programming: Kotlin, Java, Javascript, C, C++, PHP, Html, CSS, Bootstrap, JavaFX , Swing
Database: SQLite , Room

PROFESSIONAL EXPERIENCE

R Systems Pvt. Ltd, Pune, Junior Android Developer March 2025 – Present

- Worked on a cross-platform mobile app using Kotlin Multiplatform Mobile (**KMM**) to a share business logic across Android and IOS
- Implemented networking using **Ktor** and JSON serialization with kotlinx.serialization in the shared module.
- Used SQL Delight for type-safe, cross-platform local data persistence with offline capabilities.
- Developed secure data sync mechanisms supporting real-time and offline-first capabilities.
- Integrated encrypted storage for **HIPAA**-compliant handling of sensitive behavioral health data.
- Build intuitive Android UI using Jetpack Compose with clean architecture principles.
- Utilized Kotlin **Coroutines** and Flow for asynchronous programming and state management.
- Followed **MVVM** architecture with ViewModel and repository patterns for scalable code structure.
- Built and tested local persistence using SQLDelight with Cursor-based data migration support.
- Wrote unit and integration tests for ViewModels repositories, and sync logic without replying on Mocktio.

Codewalla Software Pvt. Ltd, Pune, Junior Android Developer July 2022 – Oct 2024

- Engineered components for the 1Huddle app, improving workforce education through quick-burst mobile games.
- Designed advanced UI components using **Kotlin** and **XML**, ensuring a responsive and user-friendly experience across multiple devices.
- Implemented and released six key features on Google Play, enhancing app functionality and user experience.
- Integrated **RESTful APIs** and managed dynamic data with **Firebase Realtime Database** and **Firestore** for real-time synchronization and scalability.
- Implemented **Firebase Authentication**, **Cloud Messaging**, and **Crashlytics** to enhance user security, engagement, and app stability.
- Developed **standard**, **deferred**, and **Firebase Dynamic Links** to improve user navigation, onboarding, and re-engagement through targeted links.
- Monitored and resolved app issues using **Android Profiler** and **Crashlytics**, focusing on enhancing performance and user satisfaction.

RESEARCH PUBLICATION

Covid-19 Anaysis and Predication Model 2020

- Published in the prestigious International Journal for Research in Science, Engineering, and Technology (**IJRASET**) [URL: https://www.ijraset.com/fileserve.php?FID=31624]

Face Mask Detection using Optimized 2020

- Paper published in **IEEE** (Institute of Electrical and Electronics Engineers)

Covid-19 Prediction using X-Ray 2021

- Featured in the International Journal for Research in Applied Science & Engineering Technology **(IJRASET**)
