Mahendhar Kanuganti

DevOps Engineer

Address Hyderabad

Phone +91-8985425130

E-mail mahendhar501@gmail.com

Experienced DevOps professional with **10+ years** of background in IT and **4+ years** in DevOps, specializing in automation, infrastructure as code, and continuous integration/continuous deployment (CI/CD). Consistently enhancing system efficiency, reducing deployment times and optimizing operational processes. Proficient in managing cloud infrastructure, implementing automation frameworks, and leading testing phases to ensure high-quality deliverables.

Skills

Operating Systems	**Linux, Windows**
SCM	**Git**
Continuous Integration	**Jenkins**
Configuration Management	**Ansible**
IaaC	**Terraform**
Monitoring Tools	**Prometheus, Grafana, ELK**
Cloud	**AWS**
Scripting Languages	**Shell scripting**
Scanning tools	**SonarQube, Nexus**
Container technology	**Docker**
Container Orchestration	**Kubernetes**

Work History

Jul 2022 - Current

DevOps Engineer

LTIMindtree, Hyderabad

- Formulated automation scripts using **Ansible and Terraform**, reduced infrastructure provisioning and management time.
- Administered **Jenkins CI/CD** pipelines to automate build deployment process, reducing deployment time and increasing deployment frequency.
- Leveraged **Linux command-line tools**, log analysis, and diagnostic utilities to identify and close application-level issues.
- Demonstrated **Docker** orchestration and Docker containerization using **Kubernetes.**
- Experienced in using **Git** commands and tools, such as branching, tagging, and rebasing, to ensure efficient code management and version control.
- Composed **Ansible YAML scripts** to configure remote servers.
- Deployed **Prometheus** and **Grafana** for monitoring and alerting, improving system reliability and response times.
- Constructed and controlled **Docker** images and configurations, streamlining deployment processes and enhancing consistency.

Jun 2019 - Jul 2022

IT Analyst

TATA Consultancy Services, Hyderabad

- Configured **Splunk** tools on target servers and addressed reporting issues, achieving 99% accuracy.
- Used **Ansible** for quality checks on new virtual machines, improving efficiency by 25%.
- Troubleshot **Linux** server issues like single user mode, GRUB failures, and kernel panic mode.
- Patched **Linux** servers as per the client's schedule, achieving 99% compliance twice a year.
- Coordinated team compliance with technical courses as an L&D SPOC, boosting team skills by 15%.

- Conducted patch operations and access checks via the Ignio automation tool, improving reliability by 25%.

Aug 2016 – Jun 2019

Senior Operations Professionals

IBM India Private Limited, Hyderabad

- Supported all **Linux** servers in the client environment, maintaining 99% uptime.
- Raised cases with software vendors (**Microsoft, VMware, Redhat**) for troubleshooting and RCA, resolving issues 20% faster.
- Participated in bridge calls for SEV1 and SEV2 outages, resolving critical issues promptly with multiple teams.
- Performed regular patching on **Linux** servers, maintaining security and compliance.

Jan 2015 – Aug 2016

Associate System Engineer

AT&T Global Business Services India Pvt Ltd., Hyderabad

- Handled AOTS tickets in BMC Remedy, achieving a 95% closure rate within SLA.
- Monitored PROBE HB alerts and initiated Client First Notification (CFN) within 5 minutes of server downtime.
- Analyzed CPU, disk, load average, and memory utilization, engaging corresponding teams, and improving response times by 20%.
- Inspected server hardware status (HDD, battery, DIMM, controller, fan), reducing hardware failures by 15%.
- Coordinated with vendors for hardware and software issues, ordering parts using detailed logs, cutting resolution time by 30%.
- Leveraged AT&T tools (Oasis, Q Messenger, MHO), increasing efficiency by 15%.

Education

Apr 2013

B. Tech: Computer Science and Engineering

Sagar Institute of Technology - Hyderabad

Certificates

- Certified Kubernetes Administrator
