ABHILESH CHORE

Cloud Engineer

Pune, India | chrabhi0523@gmail.com | +91-9604025544

PROFESSIONAL EXPERIENCE

V2 Solutions **Mumbai, India**
Tech. Cloud Engineer **Dec'2024-May'2025**

- Streamlined deployment workflows by integrating **Jenkins** and **Maven**, which drove down manual work related to build and deployment by 85% and accelerated application delivery.
- Collaborated with the leadership team to enhance wired and wireless network infrastructure resulting in uptime of 99.9%.
- Managed a cross-functional DevOps team in the migration from **AWS** to **GCP**, streamlining cloud operations and achieving a 10% boost in efficiency.
- Reduced security debt by implementing a streamlined system update protocol, resulting in an average of only 3 tickets a week for security issues, easily handled in under 10 minutes.
- Managed Kubernetes workloads on GKE/EKS, enabling autoscaling and zero-downtime deployments.
- Reduced release time from 3 months to 7 days through improved collaboration between Dev and Ops teams.
- Improved test coverage on legacy applications by 67% through automation efforts; received a commendation from senior management.
- Maintained 45+ applications across **Linux** and Windows environments, resolving 90% of production incidents within SLA and ensuring minimal disruption to business operations, enhancing system reliability.

Thoughtworks Technologies **Pune, India**
Cloud DevOps Engineer **Mar'2021-Dec'2024**

- Designed, implemented, and managed scalable **AWS** and **GCP** cloud infrastructure, leveraging tools like Terraform and Ansible to automate provisioning and ensure high availability and security across Dev, QA, and **UAT** environments.
- Built and maintained **CI/CD pipelines** using Jenkins and **Git**, enhancing deployment speed and reliability while collaborating with development, operations, and QA teams for smooth release cycles.
- Managed daily administration and security protocols for the RW main workspace with 76K users, ensuring 99.9% uptime while addressing 10-15 support tickets per week to maintain system stability. Ensuring the system ran smoothly.
- Championed DevOps best practices by driving automation, improving continuous integration and delivery processes, and fostering **cross-functional collaboration** to accelerate software development and deployment.
- Developed **Docker**-based containerized environments to streamline application deployment and scalability, integrating with Kubernetes for orchestration and performance optimization.
- Diagnosed and resolved 50+ system performance bottlenecks by creating custom **CloudWatch** dashboards and alerts, improving application uptime by 99.99% and reducing incident response time by 60%.

EDUCATION

Rashtrasant Tukadoji Maharaj (RTMNU), Nagpur)
Bachelor of Technology (Electronics)

ADDITIONAL INFORMATION

- **Core Competencies:** Cloud Platform Expertise, Infrastructure as Code (IaC), CI/CD Pipeline Development, Configuration Management, Containerization and Orchestration, Monitoring and Logging, Scripting and Automation, Security and Compliance, Version Control and Collaboration, Incident Management and Troubleshooting, Agile Methodologies, Scrum.

- **Technical Skills:** AWS, Azure, GCP, Terraform, CloudFormation, Jenkins, GitLab CI/CD, GitHub Actions, Azure DevOps, Ansible, Docker, Kubernetes, EKS, AKS, Prometheus, Grafana, ELK Stack, CloudWatch, New Relic, Bash, Python, PowerShell, IAM, VPC, SSL/TLS, Git, Bitbucket, Linux, Load Balancers, DNS, CDN, Monitoring, Logging, CI/CD, Incident Management, Disaster Recovery, Network Security, API Gateway.

- **Soft Skills:** Result-Oriented, Team Collaboration, Multi-Tasking, Root Cause Analysis.

- **Languages:** English, Hindi, Marathi
