**SANJAY V**
Sr. Technical Lead Consultant ~ Developer

Email ID: **sanjayvatsav92@gmail.com**
Mobile No. **+91- 90363 45418**

## Professional Overview:

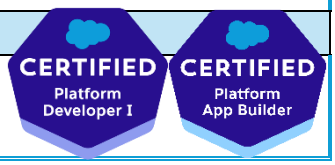

- Experienced **Salesforce Technical Lead Developer** with **9.5** years in IT, including **8** years specializing in developing, customizing, integrating, and configuring Salesforce solutions across multiple clouds.
- Specialized in deployment and release management using **CI/CD tools, Copado**, with a strong track record of leading development teams and managing complex projects.

## Salesforce Platform Skills:

- **Salesforce Clouds:** Sales cloud, Service Cloud (with FSL), Experience Cloud (Community), Marketing, Conga CPQ, Health Cloud & OmniCloud (OmniStudio).
  - **Sales Cloud** (7+years): Developed lead prioritization through lead management, opportunity tracking, real-time forecasting, and automated quote processes.
  - **Service cloud** (3+years): Worked on case management, Field Service Lightning (FSL), Omni-Channel Routing, geographical territory management and Service cloud voice connect & Amazon Voice Center to streamline and enhance customer service operations.
  - **Omni Cloud (OmniStudio)** (2+ years): Designed guided interactions using OmniScripts and FlexCards, with robust data mappings and server-side logic with DataRaptors and Integration Procedures, and leveraged OmniStudio's declarative toolkit to accelerate industry-specific application delivery ops.
  - **Experience Cloud** (2+ years): Developed Customer Communities Plus (B2C) and Partner Communities (B2B). Created self-service and Partner Central templates via Experience Builder.
  - **Health cloud** (1+years): Streamlined patient interactions and appointment scheduling with community pages, live chat, and KB management. Managed patient data, integrated EHR and personalized care plans to improve patient care coordination.
  - **Marketing Cloud** & **Conga CPQ** (1+years): Managed targeted campaigns and streamlined product configuration, pricing, and quote generation with automated approval workflows.
- **Sf Development:** Apex Classes, Triggers, Batch Apex, Visualforce Pages, SOQL, SOSL, Lightning Aura Components, Lightning Web Components
- **Sf Deployment: Copado**, ANT Migration Tool, Workbench, ClickDeploy.io, CI/CD Tools like Gearset, GitLab. **Data Management:** Data Loader,
- **Sf Customization:** Standard and Custom Objects, Fields, Master-detail Relationships, Lookup Relationships, Validation Rules, Approval Processes, Workflows, Process Builder, Flows, Profiles, Roles, Sharing Rules, Security, Reports, Dashboards

- **Integration:** REST API, SOAP API, Bulk API, Pub/Sub API -Platform Events, SAP Integration
- **Project Management:** Agile, Scrum, Waterfall, Test-driven Development.
- **Project Tracking Tools:** Azure Boards, ServiceNow, Jira, Google Sheets, Power BI Reports
- **Languages:** Apex, HTML, CSS, SQL, JS

**SFDC Certifications:**

- **Salesforce Certified Platform Developer I**
- **Salesforce Certified Platform App Builder**

**Professional Experience:**

- **Sr. Technical Lead/Salesforce Consultant** at **MARLABS,** Bangalore (Aug 2023 – Present)
- Technical Lead at **NTT DATA**, Bangalore, June 2022 – June 2023
- Lead Software Engineer at Meta Soft Tech, Bangalore, Feb 2021 – Apr 2022
- Sr. Software Engineer at Birlasoft Ltd., Bangalore, Feb 2016 - Dec 2020
- Software Test Engineer at Keshav Soft Tech Sol., Oct 2014 – Nov 2015

**Project Experience:**

**Project: Bunge CPX EMEA (Sales - Service – Marketing-Omni Cloud)**

**Role:** Sr. Technical Lead ~ Consultant

**Description:** Streamlined and optimized the commercial and pricing processes for Bunge's EMEA BLC business by developing a Salesforce-based solution to automate quote creation, pricing, and contract generation, integrating with SAP for real-time data exchange. Specialized in deployment and release management using Copado to ensure efficient and reliable deployments. Enhanced customer service and marketing campaigns using Service Cloud, Omni Studio and Marketing Cloud.

**Responsibilities:**

- Developed custom Salesforce solution using Apex, Lightning Web Components, and Salesforce Flows.
- Utilized **Copado** for automated deployment processes, managing merge conflicts, and conducting code reviews to ensure smooth and reliable releases.
- Automated quote creation and approval workflows.
- Improved Case management, customer support, and field service operations using Service Cloud features like Omni-Channel, Omni Studio, and Field Service Lightning (FSL).
- Implemented targeted email campaigns in Marketing Cloud, automating customer segmentation and boosting.
- Consulted with business to translate requirements into technical specifications and developed solutions.
- Designed and implemented SAP integrations for real-time pricing and contract creation.
- Led a team of developers, providing technical guidance and solutioning.
- Conducted end - end testing to find and resolve issues.
- Ensured data migration and quality in collaboration with the SAP data team.
- Provided training and support to end-users for solution adoption.

**Acheivements:**

- Awarded **MVP** for consecutively 3 Quarters 2024 and **Customer Delight Champion** for 2024-2025.

**Project: NASDAQ Salesforce Platform Enhancement & Integration**

**Role:** Sr. Technical Lead

**Description:** End-to-end Salesforce development and integration for Nasdaq's enterprise CRM, delivering industry-specific features, automating compliance workflows, and synchronizing critical data across internal systems.

**Responsibilities:**

- Designed custom objects, Apex classes, triggers, and Lightning Web Components to extend Financial Services Cloud and Agent Force functionality for client onboarding, case management, and recall claims.
- Customized Agent Force Cloud's service console: built Omni-Channel routing, macros, quick-actions and contextual page layouts to accelerate trade-desk and support-desk.
- Integrated with market-data feeds, client databases, and Informatica pipeline via REST/SOAP APIs, DataRaptors and Integration Procedures, ensuring secure, event-driven data exchange.
- Developed batch Apex jobs and scheduled processes to reconcile millions of transaction and client records nightly, reducing manual data-cleanup.
- Built Flows, validation rules, and approval processes—aligned to Nasdaq's Data Classification, Privacy and Acceptable Use policies—to automate contract reviews and credit-issuing phases.
- Established a Copado-driven CI/CD pipeline with GitLab version control, static code analysis gates, and automated post-deployment smoke tests, cutting release cycles from 6 weeks to 4days.
- Orchestrated agile ceremonies (sprint planning, demos, retrospectives) and led design workshops with business stakeholders to prioritize features, validate user flows, and manage scope.
- Mentored teams through code reviews, architecture sessions, and best practices for test classes, batch classes, and Apex

Project: **MAERSK 2G Data Migration & Batch Processing with CPQ**

Role: Technical Lead

Description: Enhanced the return and recall claim process by developing a Salesforce platform solution, integrating Informatica for data insertion, and utilizing Batch Apex for data processing.

**Responsibilities:**

- Designed and implemented custom objects and Apex programming.
- Configured CPQ objects and rules for pricing and discounting.
- Integrated CPQ with existing data structures and workflows.
- Developed batch processes for data management.
- Collaborated with the integration team for smooth data flow.
- Participated in manual and automatic processing phases.
- Managed approval sets and credit issuing phases.

**Project**: **Pfizer Lightning Migration & Development**

Role: Sr. Salesforce Developer ~ Lead

Description: Merged and integrated multiple Salesforce Orgs while migrating from Classic to Lightning, supporting the Salesforce Org Merge requirements.

**Responsibilities:**

- Migrated objects, profiles, Apex classes, and triggers.

- Managed multiple sandboxes and staged them for full copy sandbox migration.
- Implemented Azure Pipelines for CI/CD and change management.
- Conducted development, unit testing, deployment, and test case execution.
- Documented best practices for data migration.

**Project: Veolia Co-Collection and VCHP Sales**
Role: **Sr. Salesforce Developer**
Description: Implemented Sales Cloud and integrated Salesforce with ECHO using Platform Events for comprehensive water, waste, and energy management services.
**Responsibilities:**

- Developed Lightning components for mobile and iPad devices.
- Developed Apex triggers, classes, workflows, and process builders.
- Handled deployments using ANT and Click Deploy.io tools.
- Worked on batch and scheduler classes for data transformation.
- Integrated Salesforce with AWS and created connected apps.
- Developed auto-launched flows and screen-based flows for CLM processes.

**Project: Sales Cloud & KPIT Communities**
Role: Salesforce Developer
Description: Developed a CRM system for field sales teams to manage opportunities, key accounts, activities, visit history, and notifications.
**Responsibilities:**

- Created enterprise Lightning apps using Lightning Design System and App Builder.
- Designed, developed, and deployed custom objects, page layouts, and Visualforce pages.
- Customized dashboards to track sales team productivity and performance.
- Deployed applications from sandbox to production.

**Project: TicketNew Billing Application App**
Role: Software Test Engineer
Description: Testing & developing the billing application developed for the Ticket New application. Worked on testing the application's functionality through Selenium powered by Microsoft SQL Server 2005, 2008 R2 Express and 2012 with Service Pack SP2 and .NET framework.
**Responsibilities:**

- Developed and optimized SQL queries to ensure data accuracy and integrity.
- Conducted functional and regression testing of the billing application.
- Created and executed test cases to validate application functionality.
- Code reviews to ensure code quality and adherence to best practices.
- Ensured the application met performance and security standards.
- Experience in SQL Server and .NET development.

**Education:**

- **BTech (CSIT) JNTUk 2014**
