SUMMARY

Experienced and results-driven HCM & MR professional delivering digital transformation programs across global enterprises. I specialize in Human Capital Management (HCM) & Market Research (MR) solutions and have led enterprise-scale implementations using HCM Solutions, integrating with platforms like Salesforce, JIRA, Banking Systems & Legacy Systems.

At Adrenalin & HDFC Bank, I have helped enterprise clients streamline complex processes, reduce cycle times, improve compliance, and achieve end-to-end visibility. I thrive at the intersection of business, technology, and strategy—partnering with various stakeholders to define winning solutions, lead product demos, and ensure seamless delivery.

At Merkle, optimized survey programs and transformed complex raw data into interactive, insight-rich dashboards—cutting reporting time, improving data accuracy, and empowering stakeholders with clear visual analytics to drive faster, informed business decisions.

KEY SKILLS

HCM Consultant | Business Analysis | Qualtrics BX & CX Consultant | Agile Project Management | Solution Design | Stakeholder Management | Integration Strategy | UAT & Governance | CSPO | CSM | Change Management | Digitization | Sample Management

PROFESSIONAL EXPERIENCE

Lead Analyst **Jun 2021 – Present**
Dentsu Global Services (Formerly Merkle & Ugam) -
Mumbai, MH, India

Dentsu Global Services is a Japanese international advertising and public relations joint stock company headquartered in Tokyo. It specializes in Customer Experience, Marketing Communications, Advertising, Media Planning, Media Buying, People-Based Marketing, Innovation, Data, Technology, Artificial Intelligence, Creative, Analytics, Customer Data Services, AI Automation, and CX&C

Led end-to-end Implementation programs focused on Market Research (MR) across multiple geographies, enabling enterprise clients to drive business agility and compliance by designing and delivering interactive dashboards and visual insights, simplifying complex data into business-ready charts and metrics for stakeholders.

Facilitated and managed Daily Scrums, Sprint Planning, Retrospectives, and Backlog Grooming to ensure smooth delivery of projects and alignment with business goals.

Delivered comprehensive sprint reports (burndown, velocity, risks, and task statuses) to support informed decision-making.

Trained and mentored a team of Project Managers in executing quantitative research projects, fostering consistency and quality.

Managed cross-functional teams (Business Analysts, Solution Architects, Developers, QA) in onshore-offshore delivery models—driving project planning, execution, governance, and stakeholder engagement across all phases of the transformation.

Promoted Agile delivery practices as a certified CSPO/CSM, defining KPIs and dashboards to track project health, delivery performance, and team velocity using Azure DevOps.

Business Analyst **Mar 2019 – Jun 2021**
HDFC Bank – Mumbai, MH, India

HDFC Bank is India's largest private sector bank, offering a comprehensive range of financial products and services to our customer base of over 92 million. With a single-minded focus on product leadership, customer focus and operational excellence, it has emerged as a leading player in all our business segments.

Led the implementation for 96,000 employees, integrating geo-fencing via Map My India API, from requirements gathering to post-Go-Live support across all HCM Modules from On-Boarding, Employee LifeCycle, Compensation, Learning & Development, Compensation & Performance Management.

Led cross-functional teams (Business Analysts, Architects, Developers, QA) in onshore- delivery models, overseeing end-to-end project planning, execution and stakeholder engagement.

Gathered and refined business requirements, led discovery and design workshops, and authored key documentation including BRD, IRD, FRS, GAP analyses, wireframes, and application configurations.

Coordinated with various teams (Security, IT, User Management, Audit) to ensure system security protocols and timely sign-offs.

Acted as the primary liaison with client leadership, facilitating strategic roadmap sessions to align digital initiatives—such as Human Capital applications—with enterprise architecture, regulatory compliance, and transformation goals.

Key Achievements

- Achieved **99%** adoption of the new Attendance System among **96,000 employees**, reducing attendance-related issues by 30%.
- Successfully migrated **90,000+ users from SAP** to the new HCM system, reducing errors by **25%** and ensuring business continuity.
- Maintained a **95% on-time delivery rate** for project milestones by driving stakeholder alignment and timely sign-offs.
- Enhanced testing efficiency by **20%**, minimizing post-launch defects through comprehensive test case development and UAT.

Business Analyst **Jan 2015 – Feb 2019**
Adrenalin E-Systems Ltd (an Intellect Design Arena Ltd group company - Mumbai, MH, India

Adrenalin (NSE: INTELLECT)) is web-based Human Capital Alignment (HCA) Software available on Microsoft .Net and IBM Lotus platforms. It automates business-to-employees administrative and strategic processes. It is workflow based and is accessible to every employee with self-service features.

Led server and infrastructure setup for application deployment, including Microsoft Server configuration, IIS setup on application servers, and SQL Server installation and readiness.

Interfaced with clients to gather requirements and finalize functional specifications, while identifying system issues, root causes, and recommending technology-driven solutions to improve efficiency and meet business objectives.

Facilitated discovery and design workshops, and prepared comprehensive documentation including BRD, IRD, FRS, GAP analyses, wireframes, prototypes, and application configurations.

Collaborated across development, QA, system testing teams, and third-party vendors throughout the software development lifecycle, ensuring seamless delivery, change management, and stakeholder alignment.

Developed and executed test plans for SIT and UAT, trained end users, and led Go-Live coordination and post-deployment support, including incident resolution and system maintenance.

Ensured compliance with regulatory standards, conducted risk assessments, and supported governance activities including VAPT and SOC audits to maintain system integrity and security.
