Venkatesham Mangali

Mobile: +91 8447454447
Email: venkatesh.msit.aix@gmail.com Linux,**LTFS Administrator**

PR0FESSIONAL SUMMARY

- **12+ years of experience in LTFS and GPFS. Linux ,AIX (Oracle Linux, Zlinux,RHEL and AIX)**
- Extensive experience in Administration, Installation, Upgrading, Configuration, and Troubleshooting On LTFS and GPFS Versions Linux falvours (RHEL, Ubuntu,OEL, Zlinux, VMware,CentOS)
- Strong experience in handling 5000+ Applications Data in Archiving process
- Strong experience in resolving tape issue and file system, and Space issues.
- Strong experience online migration data from one tape another tapes.
- Strong experience in handling patching activities and also worked as a Patching technical lead.
- Strong experience in building, Oracle Linux, Zlinux,RHEL servers using OVM, ZVM AND VMWARE
- Strong experience in installation of new VMs , creating file system and applying security baselines
- Strong experience in trouble shooting all Linux Vms(Oracle Linux, RHEL, Zlinux) during patching.
- Good at in installation of OEM in Oracle Linux servers and configuring backup servers.
- Good at in resolving GPO policy issues which are related to the Active Directory in Oracle Linux.
- Good experience adding resources like CPU, Memory, disk using OVM Manager.
- Good experience in configuring and troubleshooting YUM repository issues.
- Strong experience Resolving **GFS2, GPFS Veritas Cluster Volume issues.**
- Good at in troubleshooting of memory ,CPU, network, NFS and file system issues in OEL Vms.
- Good at in resolving problem records and providing the RCA for the cause
- Provided oncall support

EDUCATIONAL QUALIFICATION:

- **MSIT(MS In Information Technology)- IIIT-Hyderabad**
- **PGDIT(Post Graduation in Information Technology)- kakathiya university warangal,AP.**
- **Bsc(Maths) -Bachelor of science from Osmania University-Hyderabad**

TECHNICAL SKILLS

Operating Systems	**: LTFS 1.3.3, GPFS 5.1.3**
Operating Systems	**: Linux(RHEL 5,6 7,Oracle Linux 5, 6,, Zlinux 5,6),**
Hypervisors	**: HMC ,Vmware, OVM,ZVM,TEM,**
Networking	**: SSH,LADP,NFS, DNS, Active Directory**
Clusters	**: OCFS2, GFS2, Veritas Cluster Volume**

WORK EXPERIENCE

Company : Wipro India Pvt Ltd (April 7th 2021 to Present)

Profile : Lead Admin on LTFS Technology (Linear Tape File System)

Project :Citi Bank (Data Protection Services)

Description: The Environment incorporates critical production servers and handles large of number of transactions including user management, high availability and financial operations.

Responsibilities :

- Managing LTFS environment on 6 Data centers in which hosted around 400+ applications
- Supporting BAU activities like recall and migration issues on LTFS Env across all DCs
- Providing Support for applications on On boarding to LTFS.
- Started working on Migrating LTFS data to S3 storage in the decommission process
- Worked on Upgrading LTFS and GPFS versions to latest.
- Good at Resolving tape issue by unassigne and assign tapes from the Library.
- Good at Creating Application file set paths using GPFS commands
- Providing Permission for application servers for accessing LTFS and GPFS path for archaiving
- Worked with Tape Library team to resolve the tape issues when they go to Error state
- Syncing the data between PROD and COB servers.
- Resolved Sev1 and Sev2 issues on priority .

Company : IBM India Pvt Ltd (Oct 2013 - April 5th 2021)

Profile : Technical Service Specialist

Project : National Australia Bank (NAB)

Description: The Environment incorporates critical production servers and handles large of number of transactions including user management, high availability and financial operations.

Responsibilities :

- Managing and configuration of Various Servers like RHEL,OEL,Zlinux, Redhat and AIX servers.
- New system planning, System related problem determination and resolution.
- Coordinating and interfacing with outside vendors, end users, other department team members, and service providers to resolve issues.
- Troubleshooting system/network related issues within SLA framework.
- Keeping the complete backup of the system and restoring data in the event of disk failure.
- Device management, including adding, changing, and configuring physical and logical devices.
- User Management - Creating, maintaining, and removing users and groups. Security settings on user accounts and groups.
- Daily activities include creating/modifying user accounts, password administration and ACL controls.
- System Administration and performance monitoring Task on Unix servers like health checks.
- Participating in cyclic patching activities and managing patching tracker and issues tracker.
- .Trouble shooting in daily patching issues like mounting, NFS, login, disk issues and YUM.
- Resolving cluster (GFS2, OCFS2)related issues in patching activity
- Supporting L3 level technical lead for Dev/Test/Prod patching for 4000 Servers
- NFS Administration, exporting files systems, mounting exported file systems, working with nfs daemons and fixing any mounting issues.
- Disk Storage Management in Unix – Logical and Physical Volume management, configuring disks, and also creating file system.

- Mirroring volumes groups, logical volumes and working ODM and VGDA and fixing related issues.

- Monitoring the system, cpu, memory and disk utilization using topas, sar, vmstat, netstat, nmon, etc.

- Working in OVM manager for adding resources like – CPU, Memory, and disk as per the requirement.

- Working on HMC, administering, resource allocation, moving resources as when required dynamically, performing dlpar operations on dlpar nodes, installing OS on lpars using NIM etc.

- LPAR operations including: scheduling operations, troubleshooting activation errors, configuring and using system profiles, and activating and shutting down partitions, Power on/off partitions.

- Create partitions, partition profiles, and system profiles, Activate partitions, and Schedule operations for partitions, dynamic operations for adding, moving, and removing memory, processor resources, and I/O slots.

Saven Technologies Ltd. (June 2011 to July 2013)
Client: Interactive Data Corporation

- Work on daily issues that are generated by monitoring tool – file system issues, file system housekeeping, and operating system health checks
- Creating new users as per application request
- Rootvg and user defined volume groups backup.
- Working with File systems- creating, removing ,changes such as increasing and decreasing the size of file system
- Perform health checks on servers by monitoring performance related components such as memory, CPU
- Network and disk activates and analyzing these reports and finding any issues that occur using paging space creation, analyzing the usage, increasing, decreasing paging spaces etc
- Using Dump device facility ,invoking dump, and logging call with IBM to analyze the dump and fix the issues as per IBM suggestion
- Configure interfaces, new devices - installation and configuration. Removing the device and work with ODM entries that are related to devices
- Finding hardware and software errors using errpt and taking necessary actions to fix if any errors occurred
- Troubleshooting booting problems, working with bootlist, bosboot commands, fixing file systems integrity issues by running fsck.

- Mirroring and unmirroring rootvg, Exporting and importing volume groups.

PERSONAL DETAILS

Marital Status	:	Married.
Nationality	:	Indian.
Language Known	:	English, Hindi, Telugu.
