Professional Summary

🔷 I'm a Salesforce QA – ISTQB certified with 12+ years of IT industry experience, specializing in testing Salesforce CRM solutions—**Sales Cloud, Service Cloud, and Salesforce CPQ, Omni studio**—across complex, enterprise-level projects. I bring deep functional knowledge, a passion for quality, and proven leadership in managing test teams and defect lifecycle across Agile environments.

🔷 I lead QA efforts from Requirement Analysis to Release. Th at includes Test Planning, Test Estimation, Test Case Preparation, Test Execution, Documentation, Bug Reporting, Maintaining Test Results, Reviews and Defect Management. I ensure strong collaboration between QA, Development, and Business teams, facilitating daily Defect triage, Retesting, and closure using JIRA and following all Agile best practices.

🔷 I have strong hands-on experience in Salesforce security model validation, including profiles, permission sets, role hierarchy, OWDs, sharing rules, and manual sharing to ensure secure, role-based access.

🔷 In Sales Cloud, I've worked extensively on the complete Lead-to-Cash flow: Lead creation → Conversion → Opportunity → CPQ Quoting → Pricing → Approval Workflow → Contract → Order.

🔷 In Service Cloud, I've validated Case lifecycle management, including case creation (Email-to-case/Web-to-case), Auto-Assignment, Escalation rules, SLAs, entitlements, and resolution tracking with integrated knowledge articles.

🔷 4+ years of Salesforce QA testing experience FOR Omni studio components Flex cards, Omniscripts, DataRaptors and Integration Procedures for healthcare domain projects.

🔷 Good experienced in Functional, Integration, Regression, Re-testing and User Acceptance Testing, A/B Testing, Data Migration Testing, RCA,Software Testing Life Cycle (STLC) and Defect Life Cycles.

🔷 Proven ability to Lead and mentor QA teams (3-4 team size), Manage client relationships, collaborate with cross-functional stakeholders, developers, BA during sprint planning, sprint reviews, and retrospective meetings to provide QA insights and handling tasks independently as a SME.

🔷 Hold strong knowledge of web testing methodologies, tools, Mainframe Testing, API Testing and Database Testing.

🔷 Collaborated with development teams to design, implement, and maintain automated test scripts for regression and integration testing. Strong communication, leadership abilities and problem-solving skills

🔷 Led UAT activities single handedly among the team of 12 stakeholders. Developed UAT plans, Test scenarios and Test data creation, analyse UAT results, training, & demos to business stakeholders. and work with development teams.

.

Skills

Software Testing | Agile | Postman | Salesforce Test | Sales Cloud | Service Cloud | CPQ
Telecom | Jira | Confluence | Test Rail | API Testing | SQL | Zephyr Scale | FSC
GitHub | Jenkins | Team City | Gen AI | Mainframe | Docker | Provar | Regression
XRAY tool | Q2C | Effort Estimation | Test Planning | RTM | Smoke/Sanity Testing | Scrum

Work Experience

Project – Norlys /Telia (Oct -2022 – Present)

• Functional Testing for Sales force Lightning Applications, SFDC Testing, Sales Cloud and Service Cloud, CPQ

• Expert in testing various Product Configuration**s**, Pricing, Discounting, Approvals, Amendments, Renewals**.**

• Worked extensively on Quote templates and Contract templates.

• Carried out E-2-E testing for order life cycle management.

• Extensively validated Discount Pricing, Promotional discounts, Bulk pricing and Tiered discounts.

• Hands – on knowledge on Product bundles, Approval process, Activation of order and contract creation for subscription products.

• Good experience on Salesforce standard object, custom objects, custom fields, page layouts, custom Tabs, Reports as per application requirements.

• Good experience in Salesforce Application in Profile, Users, Roles, Leads, Contacts, Accounts, Cases, Campaigns and Opportunities.

• Good Experience in Creating and Modifying Reports.

• Have extensive experience in implementation of Workflow Rules; Role based Page Layouts, Record Types, Approvals and Assignment Rules.

• Good Knowledge in Sales Cloud and Service Cloud Process.

• Extensively worked on System Testing, Regression, UAT, A/B Testing and API testing in Salesforce Applications.

• Experience in Designing Test Cases using Provar, Execution of Test Cases and Logging Defects.

• Experience working with Jenkins and GitHub, HP/ALM, XRAY tool in Jira and some basic functionalities of Provar tool.

•Participated in sprint planning, sprint reviews, and retrospective meetings to provide QA insights and contribute to process improvement efforts.

Project – MetLife Insurance (Jan 2019 – Sept 2022)

• Carried out functional Testing on Omnistudio components (Flex cards, Omniscripts, DataRaptors and Integration Procedures) and other Salesforce cloud (Sales cloud, Service cloud, Data migration)

• Extensively worked on Flex cards information validation for displaying policy information for an insurance customer with actions to Pay Premiums, Modify Coverage, or File a Claim.

• As per business requirement carried out validation for guided, step-by-step workflows/omni scripts that simplify complex business tasks such as guiding customers through a selling process, selecting an

insurance policy.

• Integration testing for verifying integration procedures (Email action, Http action, Remote action, Response action) to connect to external system.

• carried out Functional, Integration, Regression, Re-testing and User Acceptance Testing.

• Had worked on DataRaptors (Turbo Extract, Extract, Load and Transform) for data transformation and moving of data in the form of JSON.

• Expertise in preparing Test data by using Black Box Testing Techniques like BVA, ECP etc.

• Experienced working in Data import and export on Salesforce platform using workbench, data loader.

• Good experience writing SOQL and SOSL queries in Salesforce Inspector or Query Editor.

Project – TD Bank (Oct 2014 – Dec 2018)

- As a QA, I was responsible for collaborating with business analysts, developers, and stakeholders to understand system requirements and user stories.
- Created test plans, test cases, and test scripts based on functional and technical specifications
- Worked extensively on Validation rules, customization and configuration testing and its integration with onboarding portal for data mapping and synchronization on Sales cloud.
- Extensive worked on different Salesforce Modules like Configuration and Setup, Object Manager and Lightning App builder, Salesforce Security, Automation Rules, Analytic management, Profiles etc.
- Executed scenarios based related Salesforce lightning App, Salesforce standard object, custom objects, custom fields, page layouts, custom Tabs, Reports and various other components as per application requirements.
- Validated Workflow/Process automation which includes Flows, Process builder, workflow rules, and validation rules.
- Worked on Reports and Dashboards creation.
- Validated basic functionalities for Data Management: Data Loader, Import Wizard
- Was actively involved in Functional testing, Regression testing, smoke/sanity testing, and addressing issues related to different environments (Sandbox, UAT, Production).
- Strong experience with Agile software development (Scrum) process.
- Participated in sprint planning, sprint reviews, and retrospective meetings to provide QA insights and contribute to process improvement efforts.
- Communicated with designers, Architects, Developers, QA and UAT teams during development, testing and implementation phases.

Project – British Airways (Jan 2011 – Sept 2014)

•Extensively worked on Traceability matrix creation, Software Cycle (SDLC) and STLC

•carried out Mainframe testing using (VSAM, JCL, CICS) for fewer applications while working in project.

•Expertise in analyze requirements test cases creation, Test execution, Defect logging, Test plans, Test Strategy documents accordingly.

•Ability to work on multiple projects independently and expertise in handling client communication effectively.

•Attended defect Triaged meetings, brainstorming session for root cause analysis.

🎓 Education

B.Tech. – Electronics and Telecommunication

(2006 – 2010)

First class with distinction

Certifications

- ISTQB
- NCFM – Banking and finance Domain
