RESUME

Rabinarayan .sahu

Address: No.15 2nd floor Raghurama Reddy Layout, Doddanekkundi, Bangalore-560037

E-mail: sahu.rabin2020@gmail.com Mob: 9742885156

Summary

- Java/J2EE, Developer with **8+** years of experience with development and maintenance of business applications in client/server technology and Object Oriented programming.
- Working Experience on designing microservices architecture based application using **Kubernetes , Docker**.
- Experience in **Core Java, servlet, Jpa, Jsp,html, kafka & spring auth 2,aws**
- Worked on devops tools like **Jenkin, docker**
- Experience in Oracle database,**Sql,MySQL,Cassandra& elastic search.**
- Experience in implementing Design Patterns like **Builder**, **Mvc** and **Singleton**.
- Design ui pages using **React js,Angular java script, html & css.**

Technical Skills:

- **Programminglanguage :**Java(J2SE & J2EE) and Microservices
- **Web Technologies** **:**Html, JavaScript, jQuery, Ajax, Reacts js.
- **Database** **:**Sql,MySQL,Cassandra,Elasticsearch,.
- **Framework** **:**Spring,spring boot,Spring-cloud
- **Orm Model** **:**Jpa, Hibernate, Spring Data
- **Integration tool** **:**Apache Kafka
- **Version Controls** **:**Svn& Git
- **IDES** :Eclipse & visual studio code

Completed B.tech in computer science from BPUT in 2013

Professional Work Experience:

Worked as a Senior Software Developer in **Wipro**,from 2021 to 2025 may. Worked as a software engineer in **HCL** Technology from june 2019 to Nov 2021 .worked as software engineer in **Harman ConnectedService** from march 2017 to May 2019.

Project # 1

Client **: Cisco (wipro)**
Product name **: EASYPm**
Tools/Utility/Os **: Windows/Git/tomcat**
Environment **: Spring boot, docker, kafka,java, React js,Microservices,Spring auth2**

Duration **: Nov 2021 to June 2025**

Description:
Working on web application , using rest api, bug fixing, deployment with end to end participate.

Responsibilities:

- Involved in making Rest with ui component in react js & angular js

- Writing junit,Azure & aws cloud services
- Involvement in server deployment
- Participate in scaling the apps
- Communication the rest api through Kafka listener

Project # 2

Client : Dell-Emc(HCL Technology)
Product name : Dreamcatcher
Tools/Utility/Os : Windows/Git/tomcat
Environment : Spring boot, docker,Jenkin, kafka, Angular js, Microservices
Duration : June 2019 to oct 2021

Description:
Dell-Emc backend connecting to the third party api for more getting more services.

Responsibilities:
- Involved in making Rest Api.
- Involved on deployment part.
- Involved on end to end area of testing in python for functionality testing.
- Writing junit

Project # 3

Client : MERCEDES BENZ
Product name :Mbrdi Migration(HARMAN)
Tools/Utility/Os : Windows/Git/tomcat
Environment : Spring boot, jpa, docker,Jenkin, Kubernetes cluster.Wso2.
Duration :march 2017 to may2019

Description:
Mb apps are using for entertainment purpose in the Mercedes Benz car. these apps features are Weather, restaurant, evrecharging, cinema halls, and many more. we are migrating these project from old soap based to Microservices based application and for that we changed the framework frontend, environment and many more things. We used for that spring boot, jpa, GitLab, Jenkin, awsAnddevops, docker.

Responsibilities:
- Involved in writing the business logic modification for MBapps car.
- Involved in deployment.
- Involved change the front end jsp to react Js.
- Involved Working on devops tools like docker, Kubernetes cluster, rancher.
- Working on script writing in terra form
- Involved on deployment part.
