WORK HISTORY

January 2023 - Current

Salesforce QA Led, Cybage Software Pvt. Ltd, Pune, India

- Conducted end-to-end functional testing across multiple **SFMC Studios (Email Studio, Automation Studio, Journey Builder) to ensure flawless campaign execution.**
- Automated **UI test cases for SFMC modules such as Email Studio, Content Builder, Journey Builder, and Automation Studio using Selenium WebDriver.**
- Developed **Cucumber BDD framework to write Gherkin feature files for campaign creation, audience segmentation, and triggered sends.**
- Performed **smoke, regression, UAT, and system integration testing for Marketing Cloud implementations.**
- **Experience in testing Salesforce Marketing Cloud applications using NeoLoad to simulate user load, validate campaign journeys, and analyze system scalability and response times.**
- Designed and **executed detailed test cases and checklists for Email, SMS, Push, and Mobile Studio campaigns.**
- Validated data **flow from Sales/Service Cloud into SFMC using synchronized data extensions and verified data integrity**.
- **Maintained QA documentation, including test plans, test scenarios, test data, and defect reports.**
- Ensured compliance with **CAN-SPAM and GDPR guidelines in all email campaigns and data handling processes.**
- Used **Litmus, Email on Acid, and preview tools in SFMC to test cross-platform compatibility of emails.**
- Collaborated with **developers, campaign managers, and marketing stakeholders to ensure requirement traceability and test coverage**.
- Reported defects using **Jira and participated in defect triage meetings and sprint planning sessions**.
