Professional Experience

PurpleTalk India Pvt Ltd | Senior Frontend Developer and MERN Stack Developer

📍 Hyderabad, India | 🗓️ Feb 2017 – Present

Organized and results-driven Senior Frontend Developer (MERN Stack) with 8+ years of professional experience in designing and developing scalable, high-performance web and mobile applications. Successfully delivered 18+ enterprise-grade projects across diverse domains.

Proficient in JavaScript (ES6+), ReactJS, React Native, and Node.js, with a strong focus on frontend architecture, API integration, and performance optimization. Adept at building responsive, maintainable, and user-friendly interfaces while collaborating in Agile, cross-functional teams to deliver impactful digital solutions.

Roles & Responsibilities

● Developed scalable web and mobile applications using ReactJS, React Native, Node.js, Angular, and Ionic, following best practices in performance and maintainability.

● Built and optimized RESTful APIs and GraphQL services using Node.js (Express) for seamless backend integration with frontend systems.

● Translated Figma, Sketch, and Adobe XD designs into responsive, pixel-perfect UIs using HTML5, SCSS, Material UI, and Bootstrap.

● Collaborated in Agile/Scrum environments with cross-functional teams to deliver robust features and enhance user experience.

● Ensured high code quality through clean architecture, code reviews, component reusability, and continuous performance improvements.

Education

Completed Bachelor of Technology (Electrical and Electronics Engineering) at Sri Venkateswara College of Engineering and Technology in Chittoor.

Operating Systems	Linux, Windows, and Mac
Technologies/Frameworks	HTML5, CSS3, SASS, React Js,React Native,Node.js,Mongo DB,Express js, Angular 2+ versions, Javascript, Ionic6, onsenUI, Material UI for React, Bootstrap 5
APIs	Rest APIS
IDE	Atom, Visual Studio Code, Sublime, Visual Studio Community
Tools	Photoshop, Sketch, Postman

Project Experience

● NATIONS BENEFITS FSA

The FSA Store is a responsive web and mobile-based application that empowers members to efficiently utilize their employer-provided Flexible Spending Account (FSA) benefits. By offering a curated marketplace of eligible health and wellness products, the platform promotes a healthier lifestyle through convenient, secure, and user-friendly online access. Members can browse and purchase qualified items using their FSA balance or out-of-pocket (OOP) payments directly through the website or mobile app. The platform supports both authorized users with verified accounts and guest users, ensuring accessibility for all.
Role: Frontend Developer.
Technology stack:NEXT with REACT JS, HTML, SCSS.

● SUNTRUP

Suntrup Automotive Group, with nine brands and eleven locations, is committed to delivering excellent customer service and engaging with the community.
We offer a wide range of vehicles and emphasize reliable, fast, and convenient service.
Designed and developed a unified data lake solution to modernize infrastructure, boost efficiency, and improve customer experience.
Created a scalable, secure web-based application with interactive dashboards, enabling data-driven decision-making.
Role: Frontend Developer.
Technology stack: REACT, Nx MONO REPO, HTML, SCSS,Node.js.

● SPOTCHECKUP

SpotCheckup is an innovative healthcare solution that transforms smartphones into smart stethoscopes. By integrating advanced acoustic sensors and AI-powered analysis, it enables healthcare professionals to record, visualize, and analyze heart and lung sounds in real-time. This cutting-edge technology enhances diagnostic accuracy, improves patient outcomes, and supports telemedicine applications.
Role: Frontend Developer.
Technology stack: ANGULAR 8, HTML, SCSS,Node.js.

● ZOMEDICA(PULSEVET)

Zomedica Multisite and PulseVet are dedicated to addressing the animal health requirements of clinical veterinarians, prioritizing the well-being of both patients and practices. Their mission revolves around enhancing the effectiveness and financial prosperity of veterinary practitioners through the provision of professionally advantageous products and services. [x]Cube LABS is actively engaged in developing a cross-platform mobile application called PulseVet Training Guide, specifically designed to provide comprehensive species-specific training for selected animal types and locations.
Role: Frontend Developer.

Technology stack: ANGULAR, IONIC, CAPACITOR, HTML, SCSS,Node.js.

● AMPLIFY(TSQRD)

AmplifyMD is a healthcare teleconsulting platform founded in 2019 with the aim of connecting medical facilities with Specialists (having specialties like Eg: Cardiology, Neurology, Nephrology, Hematology/Oncology, Psychiatry & more) to deliver the best patient care via medical teleconsultations. [x]cube created a unique solution (SAAS applications- Web, iOS & Android) to facilitate Online Video Teleconsultation for its Users. (Specialist & Hospitalists)[x]cube team also created an Admin Portal (Web app) for Amplify through which User (Admin, Specialist, Hospitalists) creation & management, schedule creation & management, blackout dates, services for specialists, and reasons for consults are also provided.

Role: Frontend Developer.

Technology stack: React JS, HTML, SCSS,Node.js.

● I-HUB

I-hub is an internal product of Dr Reddy's Laboratories. It is a web-based application that serves as an employee portal for all employees. It includes features like Pay Slips, Attendance, Leaves, Medical forms, and many others.

Role: Frontend Developer.

Technology stack: React JS, HTML, SCSS,Node.js.

Nissan CBM is a web-based application. The main purpose of this application is to serve as a CBM to the Nissan Tochigi Plant. A condition-based maintenance strategy that monitors the actual condition of an asset to decide what maintenance needs to be done.CBM dictates that maintenance should only be performed when certain indicators show signs of decreasing performance or upcoming failure.

Role: Frontend Developer.

Technology stack: Angular 8, HTML, SCSS, and jQuery,Node.js.

● Party Poker

PartyPoker is an online poker Cardroom. Partypoker offers a wide variety of tournaments with different prize levels for single-table and multi-table tournaments. Its Sit & Go tournaments run 24 hours a day, and players can register for tournaments with entry fees starting at $1 and ranging in size from 2 to 50 players. They want both web applications and PWAs with an angular framework for tournament registrations and gameplay in poker cardrooms.

Role: Frontend Developer.

Technology stack: Angular 8, HTML, SCSS, and Pixi JS,Node.js.

● Trasers

Trasers is the first Business Research service dedicated solely to the field of digital transformation decision support, giving executives and IT leaders structured, focused, comprehensive research to engage more effectively with their businesses while leading the way in conquering the challenge of digital transformation. Trasers' proprietary library of 1,800 custom industry reports covers each major business function and technology group. Trasers help —the business executive, the company board member, or the CEO—and the impacted leadership understand what transformations mean for these roles, associated functions, and the processes across the entire enterprise.

Role: Frontend Developer.

Technology stack: Angular 5, Turn js, and Electron.

● Pro-Vigil

Pro-Vigil provides video surveillance solutions to customers and gives surveillance solutions that users need to improve performance, safety, and peace of mind through intelligent video insight.

Role: Frontend Developer.

Technology stack: Angular 4, ionic 3, HTML

● Dominos

The project's main theme is a pizza ordering system through the mobile app. PWA-based app.

Role: UI Developer.

Technology stack: React js-based app.

● Honeywell

The project's main theme is the maintenance of electrical devices in the plant's working process, including different categories of devices.

Role: UI Developer.

Technology stack: React JS

● MANN+HUMMEL(MVP ourair)

MVP is the extension of Our Air, where Projects are created for each building and device details are tracked in real time. Details consist of connection status, pollutant levels, RESET indication, monthly calendars, asset management, etc. It's also used to keep track of building floor plans and can drag and drop devices for visual representation.

Role: Frontend Developer.

Technology stack: React JS

● MANN+HUMMEL (ourair)

The MANN+HUMMEL Group is a German manufacturing company headquartered in Ludwigsburg, within the Stuttgart metropolitan area. The company develops products and distributes liquid and air filter systems, intake systems, and cabin filters.

OurAir is a Mobile Application that also has a dashboard in which we can onboard multiple devices, such as air purifiers and monitoring devices, which send data to the server. In the Dashboard, we can add buildings and rooms and assign devices to them. We can analyze Air quality through graphs, charts, and reports.

Role: Frontend Developer.

Technology stack: React JS.

- **Syngenta GGP**

The audit and assessment tool is part of Syngenta's Good Growth Plan, which comprises the Field Audit Process and Annual Assessment Process. The Field Audits further comprise Internal Monitoring System (IMS) Audits, which are done at the Farm level, and Independent External Monitoring (IEM) Audits, which are done at the country level. The Field Audit process has been digitized to replace the existing approach.

Role: Frontend Developer.

Technology stack: React Js and Onsen UI framework
