POORU MAHESH

Network & Cloud Security Engineer

Maheshpooru2024@gmail.com | +91 9652307329

PROFESSIONAL SUMMARY

Network & Cloud Security Engineer with **4 years of hands-on experience** in managing **firewalls (FortiGate, Palo Alto, Juniper SRX)**, securing and optimizing **cloud environments (AWS, Azure)**, and implementing **load balancing (Cloudflare)**. Skilled in **infrastructure monitoring (Nagios, PRTG, Site24x7)** and. Proven ability to design, secure, and troubleshoot **scalable network and cloud infrastructures** for enterprise environments network and cloud infrastructures in highly regulated industries such as **Banking & FinTech.**

EXPERIENCE

WIBMO a Payu (Enstage Software Pvt. Ltd.)

Network Security Engineer (Infrastructure Maintenance and Engineer)
August 2022 – Till now

- Managed firewall rules, IOS upgrades, and site-to-site VPN tunnel setups with external partners.
- Configured and maintained **site-to-site VPN tunnels** with multiple banking partners to enable secure traffic.
- **Site-Site VPN & Remote access VPN tunnels** implementation & Troubleshooting
- **Coordination** with Partners / vendors with Site-Site tunnel establishment procedures **Troubleshoot of IPSEC Site-Site VPN issues**
- Administered FortiGate and Juniper SRX firewalls with NAT, IPsec, and SSL VPN configurations.
- Configured and managed **Cloudflare WAF rules** to protect applications.
- Implemented **custom firewall rules** for rate limiting, IP blocking, and geo-based traffic filtering.
- Integrated **Cloudflare security features** including DDoS protection, Bot Management, and Page Rules for application hardening
- Monitored and analysed **WAF logs/events** to identify malicious traffic and fine-tune security policies
- Maintained AWS infrastructure: EC2, Security Groups, VPC, and NACLs.
- Handled load balancing via Cloudflare and network monitoring using PRTG/Nagios.
- Supported L2/L3 routing and switching (OSPF, BGP, VLANs).
- **On-call Support & Rotation support** operations
- **SOP documentation** and **ITIL process**-oriented knowledge.

Tech Stack: FortiGate, Juniper SRX, AWS, Cloudflare, Cisco, PRTG, Nagios, BGP, OSPF

Happiest Minds Technologies pvt. Ltd

Network Security Engineer
Nov 2021 – June 2022

- Configured and maintained Palo Alto Zone-Based Firewall with Panorama.
- Developed security policies and implemented NAT, service policies, and object groups.
- Investigated and resolved security incidents and compliance issues.
- **Remote access VPN, Global Protect VPN** administration**.**
- Knowledge of **Network troubleshooting**, **Organization, Network planning**, **Maintenance, Monitoring protocols and software**.

Tech Stack: Palo Alto, Panorama, NAT, Cisco, Network Monitoring

PROJECTS

Firewall Security: Implemented and managed site-to-site VPNs with banking partners, ensuring secure financial data exchange.

Cloudflare Optimization: Configured load balancing, caching, and WAF rules for enhanced application performance and security.

AWS Security: Deployed a secure web application with DNS failover and VPC security configurations.

Infrastructure as Code: Automated AWS EC2 provisioning using Ansible playbooks (IaC).

SKILLS

- Firewalls & Security: FortiGate | Palo Alto | Juniper SRX
- Cloud Platforms: AWS | Azure
- Load Balancing & WAF: Cloudflare
- Routing & Switching: OSPF | BGP | VLANs | Cisco/Juniper Switches
- VPN Technologies: IPsec | SSL | GlobalProtect
- Monitoring Tools: PRTG | Nagios | Site24x7
- Automation: Ansible

EDUCATION

Bachelor of Technology (B.Tech), Electronics & Communication Engineering (ECE)
Brilliant Institute of Engineering & Technology, JNTU Hyderabad
