Professional Summary:

Experienced Java Full Stack Developer with around 5 years of hands-on expertise in designing and developing web-based applications. Adept at handling client delivery across global teams, coordinating effectively between onshore and offshore resources. Strong technical proficiency in Java, Spring Framework, JavaScript, and modern frontend libraries..

Experience in developing front-end User Interfaces using JSP, HTML, CSS, Javascript, JQuery,Angular and React JS .

Having good experience in Spring boot,Microservices and Spring frameworks.

Good experience in developing various applications using JAVA/J2EE technologies like Java, JDBC, Servlets, Jsps, Spring IOC, Spring MVC ,Spring boot, Hibernate, Restful Services, Design Patterns .

Contributes to the productivity of the organization through on-time completion of projects associated with meeting departmental objectives.

Having good work experience with SQL and PostgreSQL database.

Ability to Manage and deliver results on multiple tasks by effectively managing time and priority constraints.

Interacting with the users for system study, requirements gathering, analysis and scoping.

Employement:

Software Engineer || Sutherland Global Services || Jan 2021 to Till date.

Project #3:

Title : DTT(Drug Tracking Tool)
Client : HTD Health (USA)
Team Size : 11
Duration : Ar 2024 to till date.

Description: Drug Tracking Tool is a pharmaceutical project with the main intent to track the status of a Drug. Any Pharma company to launch a drug in the country must go through government authority approvals. This project contains multiple modules like Publish Module, QC Module, Batching Module etc. This application is a self-service website for the Medical Agents that enables Agents to easily access drug History information, and frequently asked reports.

Environment:

Java,Microservices,Bit bucket,Rest API
Spring,Spring boot,JPA,Spring IOC,Angular
Node JS,AWS,IntelliJ,Tomcat,Maven,Jenkins
Jira,Junit,GIT,Multithreading,PostgreSQL,Postman.

Responsibilities:

Analyse requirements to define business objectives, Design implement and maintain applications that based on the requirement.
Testing the developed modules to make sure everything working fine and prepare the documentation of test results.
Implementing on Spring Boot and Microservices.
Implementing written Service and Repository interface along with their implementations.
Getting the Requirements from the requirement analysis and Bug Tracking tool JIRA.
Experience in developing highly interactive web applications utilizing Angular.
Good experience in developing the single-page applications using Angular.
Implementing on Spring Data JPA and Restful web services.
Injected the Repository into service classes using Spring IOC pattern.

Project #2:

Title : Cash Management System
Client : Hong Leong Bank
Team Size : 11
Duration : Dec 2022 to Mar 2024

Description: iGTB: iGTB product is corporate banking solution for banks have multiple channels as mobile, internet etc. The product has various verticals of the banking and leaverage solutions each of them. Verticals like Payments, Trade, Liquidity, Collections are integral part of iGTB solution platform and rolling out as features of the product based on bank requirement. Each roll out is different in terms of bank required features, bank required customized features, downstream/ upstream bank systems connectivity along with generic features like multi country, multi-currency. All the features/ services are plug and play, layered properly to make the product more viable and potential.

Environment:

Java,Spring,React JS,Microservices
Spring boot,Hibernate,Eclipse,Maven
Jenkins,Jira,Junit,Kubernetes,Kafka
Collections,GIT,Multithreading,Postman,Junit.

Responsibilities:
Participated in discussions with the Onsite team
Analyze the system requirements
Involved in the designing of activities.
Involved to implement the restful web services.
Writing the Business logic for a given activity.
Implemented Hibernate Components.
Test the Developer test cases and doing the unit testing
Coordinated the Onsite, Offshore teams for Requirements, development, deployment and delivery.

Project #1:

Title : Telenor – Order Management System
Company : Telenor, Norway
Team Size : 7
Duration : Jan 2021 to Nov 2022

Description:OMS (Order Management System) is developed as a generic order management solution to meet today's challenges for the telecommunication industry. OMS is implemented in Telenor, the dominating Telco operator in Norway. The OMS is a system based on general concepts for describing order entry and delivery processes. The system defines processes by parameters according to a set of general concepts, rather than by individually developed code. The set of parameters for a particular OMS operation is maintained through the PM (Product Manager) module.

Environment:
Java,J2EE,Spring,HTML,CSS,Javascript,Hibernate
Spring MVC,Spring ORM,JSP,Junit,Spring ORM
Eclipse,Visual Studio,React JS,Kafka,GIT,SQL.

Responsibilities:
Implementation of Web Pages in JSP using Javascript for validations.
Implementation of Web Pages using JSP and HTML.
Implement the code as per design and developed business logic.
Used Spring Framework for Dependency injection.
Implementation of Web Pages in JSP using Spring Form Tag Library.
Involved in developing JSP forms and navigation using View Resolver.
Used Spring Hibernate for Querying data from the database.
Involved in developing Controllers using Spring ORM.
Develop the site and integrate the dynamic pages with the static designs.

Technical Skills Summary:

Programming Languages	:	Java
J2EE Technologies	:	Servlets,JDBC,JSP
Web Technologies	:	HTML ,CSS,Javascript,Angular,React JS
Frame Works	:	Spring,Spring boot,Microservices,Node JS
Framework Modules	:	Spring Jdbc,Spring ORM,Spring MVC
ORM Tool	:	Hibernate,JPA
Database	:	SQL,PostgreSQL
IDE	:	Eclipse,IntelliJ
Building Tool	:	Maven,Jenkins
Others	:	Rest API,GIT,Bit bucket,Postman,Kubernetes, Kafka

Education:

B.E from St Joseph Engineering College,VTU.
